LOAD STAR TIRE & WHEEL ASSEMBLIES

Computer designed tread features a radial tire appearance with bias tire's durability.
Advanced rubber compound gives longer tread wear and low rolling resistance.
Flatter tread profile allows for increased towing stability.

RUBBER TORSION AXLES

- 3 sizes
- All beams are E-coated
- Rubber cushioned inside steel bar absorbs road shock and provides torque action that improves load handling and reduces shock transfer and trailer swaying
- All axles come cambered with one piece forged spindle and arm

FLEXIRIDE SUSPENSION UNIT

- Flexiride allows independent suspension for each wheel
- Each piece is completely independent of one another
- Will fit any width trailer. Weld base plate to cross member, check to be square with frame (very important)
- Bolt flexiride arm to base plate with arm trailing to rear of trailer
- 3 sizes available
- Sold in pairs
- Base plates extra - sold each (order 2 for pair)
- Note: Spindle nut, washer, and cotter pin must be ordered separately

TURBO LUBE COMPLETE HUB KITS

- Turbo Lube oil bath lubricating system rotates individual roller bearings over four times through oil for each wheel revolution keeping your hub and bearings cooler, reducing wear and friction, and actually increasing tow vehicle mileage
- The unique see through threaded oil cap assures a leak proof seal and lets you know if your bearings have adequate lubrication for the next long haul
- 75-90 weight gear oil recommended (not included)

FLEX-COIL HEAVY DUTY ADAPTERS

Flex-Coil™ adapters provide the user with increased durability and additional length that may be necessary to reach between the tow vehicle's socket and the trailer/towed vehicle's plug.

In addition, Flex-Coil™ adapters with Nite-Glow™ illuminate upon activation of the taillight function.

This enables the user to find the electrical connection in the dark and show that the vehicle's trailer wiring system is working properly.

TAILLIGHT CONVERTERS

WHICH CONVERTER DO I NEED?

POWER TAILLIGHT CONVERTER

These units completely isolate the tow vehicle from trailer malfunctions. Power is taken directly from the battery for isolation and brighter trailer headlights. Each unit can power up to 2 sets of stop/turn signals (8.0 amps) on the trailer.

SHORT-PROOF POWER TAILLIGHT CONVERTER

Protects tow vehicle electronics and itself from wiring shorts. Self-resetting.

PART #	MFG #		
646365	46365	89.05	G

Short circuit protected. Can power up to 8.0 amps per output.

POWER TAILLIGHT CONVERTER

Solid state electronics. For vehicles equipped with independent bulb turn signals and brake lights or common bulb systems.

PART #	MFG #		
646255	46365	72.70	G

Short circuit protected. Can power up to 5.0 amps per output.

NEGATIVE INPUT SHORT-PROOF POWER TAILLIGHT CONVERTER

Protects tow vehicle electronics and itself from wiring shorts. Self-resetting.

PART #	MFG #		
646345	46345	89.05	G

Short circuit protected. Can power up to 8.0 amps per output.

ELECTRONIC TAILLIGHT CONVERTER

Electronic taillight converters adapt an independent bulb taillight system of the tow vehicle to the common bulb taillight system of the trailer. Each unit can power 2.1 amps per stop/turn signal.

UNIVERSAL KIT

Complete with splices and circuit tester.

VEHICLE WIRING KITS

NO CUTTING! NO SPLICING! SAVES TIME!

Unplug your vehicle's factory wiring harness and plug in a Hopkins® vehicle wiring kit. That's how easy trailer wiring is with a Plug-In-Simple® wiring kit, featuring OEM connectors for a perfect, weather-tight fit!

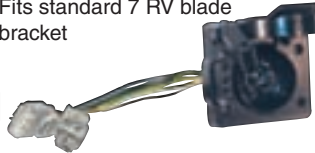

These kits provide a 4-wire flat connector for your trailer. Optional "pre-wired" 4-wire flat to 6 pole round and 4-wire flat to 7 RV blade round extension adapters are available to custom install the vehicle side wiring to most trailer configurations.

INDUSTRY LEADING TRAILER BRAKE CONTROLS

P3® TAKING INNOVATION TO A WHOLE NEW LEVEL

After receiving valuable insight from industry experts and our own customers, Tekonsha® did something truly amazing: We listened and responded. The result is the P3; the industry's most advanced trailer electric brake control. A true proportional braking system, P3 has several added features, making it the new standard for electric trailer brake controls.

- A distinct, easy-to-read LCD display with multiple screen color options
- "Up-Front" controls provide easy access to all P3 features
- Easy to understand diagnostics show output current, battery/brake/output voltage
- A "flashing red" warning system alerts user to "No Trailer Brake" situations
- Select Electric over Hydraulic or Electric trailer brake mode
- Screen information display in English, French or Spanish
- "The Original Boost" feature allows for different levels of customized braking
- Compact, dash-hugging design
- Unique, easy-to-use, clip-mounting system
- Quick disconnect feature for easy storage
- Electric trailer brake control for up to 4 braking axles
- Limited lifetime warranty (some conditions apply)
- Display boxed - complete as shown

PRODIGY® P2 ADVANCED INTELLIGENCE

- Reverse battery protection for both vehicle and breakaway
- Designed to work with electric over hydraulic brake systems
- Numerous mounting options – including 360 degree vertical rotation
- Digital display depicts voltage delivery to trailer during braking
- No level adjustment necessary – adjusts to varying terrain as you drive
- Great for backing into tough spots! Works proportionally in reverse - with the ability to disable when not needed
- Produces stops that are in proportion to vehicle's deceleration rate
- "Boost" feature gives users the ability to apply more initial trailer braking power when towing heavier trailers
- Continual diagnostics check for proper connection, shorted magnet conditions and much more
- Quick and easy disconnect feature allows user to remove and store the control when not in use
- Electric trailer brake control for up to 4 braking axles
- Limited lifetime warranty (some conditions apply)

7-WAY TRAILER EMULATOR

7-Way Trailer Emulator is used for the proper installation and set-up of a brake control when a trailer is not readily available. Brake control set-up is accomplished using a built-in load module that will stimulate electric magnet brakes on a trailer. (The emulator will also check electrical continuity of all circuits in the 7-way blade style connector.)

TRAILER

PRODIGY® RF ELECTRONIC BRAKE CONTROL FOR 1 TO 3 AXLE TRAILERS, TRAILER MOUNTED, PROPORTIONAL

Utilize for rental businesses, fleet ownerships or multiple tow vehicles. Requires no leveling.

Remote Hand Held Unit

- No under dash wiring necessary – utilizes wireless communication
- The original "Boost" feature allows for different levels of customized braking
- System runs continual diagnostics and displays fault codes in hand held unit's display
- Plugs into standard 12-volt power accessory adaptor
- 5 year limited warranty

Trailer Mount (Power Module) Unit

- Utilizes standard sealed 8' blade style 7-way connector
- Multiple mounting positions on tongue or front of trailer
- 15 year limited warranty on power module
- 1 year limited warranty on cord

If you take to the road with multiple vehicles, there's really only one solution: PRODIGY® RF. Consider all it offers:

- User does not need a dash mounted, hard wired brake control
- True proportional trailer braking, forward or reverse
- No level adjustment necessary
- Trailer braking power supplied via 7-Way Connector from the vehicle
- Suitable for use on any trailer with up to 3 braking axles

In the Tow Vehicle (Hand Held unit):

- Wireless communication between the remote hand unit and trailer mounted power module eliminates the need for under dash wiring
- Easy to see LED display for trailer brake voltage, power output and diagnostics
- Easy to use remote hand control; includes the Prodigy® "Boost" system to allow for different levels of customized braking
- Unit provides continual diagnostic scanning with a visual warning display
- Hand held unit plugs into any standard 12 volt power accessory adaptor
- Hand held unit has a 5-year limited warranty

On the Trailer (Power Module Unit):

- Power module uses standard RV Blade style (Bargman) 7-Way truck and trailer connectors
- Trailer Power Module is watertight and is powered through 7-way cable from the tow vehicle.
- Multiple mounting options on the tongue or front of the trailer
- Trailer mounted power module has a 15-year limited warranty (1-year limited warranty on cord)

INDUSTRY LEADING TRAILER BRAKE CONTROLS

PRIMUS™ IQ THE SMARTER BRAKING SOLUTION

Primus IQ is a totally proportional electric trailer brake control. This easy-to-set system allows the driver maximum flexibility when determining how the trailer should respond to a braking event. Snap-in dash mounting clip and removable electrical connector allow the unit to be quickly stored (or moved to another vehicle) when not in use.

- Works proportionally in reverse
- No level adjustment necessary, adjusts to varying terrain as you drive
- Digital display shows voltage to trailer during braking
- "The Original Boost" feature allows for customized braking
- Pre-assembled wire harness for simple hook-up and quick disconnect
- Diagnostic features incorporated in LED display
- Electric trailer brake control for up to 3 braking axles

VOYAGER®

The Voyager incorporates Tekonsha's patented braking sensor and is the best value you'll find for smooth and secure trailer braking. It's compact size and features, like a bicolored LED brake monitor (to assure a complete connection to trailer brakes and give an indication of relative braking power being applied) make the Voyager extremely versatile. Voyager minimizes interference with tow vehicle electrical systems, uses a four wire hook up, has a broad setting range and is compatible with most any vehicle.

- Broad control range makes setting quick and easy
- As braking power is applied, the LED changes color gradually from green (completed circuit) to red, to indicate relative braking power
- Advanced electronics minimize false braking for smoother ride
- Electric trailer brake control for up to 4 braking axles
- 5-year limited warranty
- Display boxed - complete as shown

I-STOP™ IQ BRAKE CONTROL

A totally proportional electric trailer brake control, the new Draw-Tite I-Stop™IQ is self-leveling so no level adjustment is necessary.

Utilizing the primary sensor technology from Draw-Tite I-Stop™Ultra, the Draw-Tite I-Stop™IQ now includes the "Boost" feature that gives users the ability to apply more initial trailer braking when towing heavier trailers. It works proportionally in reverse for backing into tough spots and includes a snap-in dash mounting clip and removable electrical connector that allows the unit to be quickly stored when not in use. You will appreciate the digital readout depicting a secure electrical connection, amount of voltage delivery to the trailer brakes and diagnostic features incorporated in the LED display.

- Utilizes "Plug-N-Play" port for 2-plug adapters
- Self-diagnostics features will illuminate LED readout when issues occur
- Includes a "Boost" feature
- Works proportionally in reverse

PILOT® BRAKE CONTROL

Pilot has a dark, smoke lens that is ideal for direct light applications, creating optimum visibility to read the large, two-digit display. Pilot has flexible mounting options and can be installed in any direction. Our microprocessor allows you the ability to read the display even when mounted upside down. The Pilot's digital display shows voltage output to the brakes.

- Large easy to read dual digital display shows:
- Properly wired control
- Voltage output to brakes (vs. a percentage)
- Connection to trailer
- Dark smoke lens ideal for direct light applications; performs better than red lens
- Protection against short circuit/loss of ground

TEKONSHA® REESE® BRAKE CONTROL WIRING HARNESSES

All vehicle specific brake control wiring harnesses are available in 2-Plug styles and are clamshell packaged. 2-Plug units are designed for brake controls that have a wiring port built into the back of the unit. Simply plug the brake control end of the wiring harness into the back of the brake control and the vehicle end into the automobile's port. Brake controls that utilize the 2-plug style of wiring harness will be identified with the Plug & Play logo.

TRAILER ELECTRIC BREAKAWAY SYSTEMS & ACCESSORIES

For use on 1, 2, 3, and 4 axle trailers equipped with electric brakes. These complete systems incorporate the highest quality components in trailer breakaway systems. Meet or exceed Department of Transportation (DOT) specifications regarding trailer breakaway and holding requirements. If a breakaway occurs between your tow vehicle and your trailer, the breakaway systems will automatically apply consistent braking power to your trailer brakes. Quick and easy to install, the systems come with a weather/corrosion resistant, heavy-duty polymer case to protect the battery and charger.

BREAKAWAY SWITCHES

852010

Completely sealed breakaway switches to automatically set trailer brakes in case of accidental trailer breakaway. Required by law in some states. Emergency use only, not to be used to lock brakes when parked or stored. **852010**, and **852005** have reinforced nylon case, weldable metal tab, nylon pin assembly and are rust and corrosion free. **852009** has all metal parts and a brass pin assembly. Clamshell packaged.

PART #	DESCRIPTION
852010	8.94 E Breakaway Switch w/48" wires w/Cable & Nylon Pin Assembly
852005	8.90 E Breakaway Switch w/48" wires w/Cable & Nylon Pin Assembly (for use with 1-3 axle trailers)
852009	23.47 E Breakaway Switch w/48" wires w/Cable & Brass Pin Assembly
852010A	6.66 E 48" Replacement Cable & Nylon Pin Assembly (for 852010 Switch)
852009A	11.48 E 48" Replacement Cable & Brass Pin Assembly (for 852009 Switch)

BATTERY CHARGER

For all 12v battery systems with a 4 amp-hr minimum output. **851024** will return trailer breakaway system batteries to their maximum potential.

PART #	DESCRIPTION
851024	9.55 E DC-to-DC Accelerated Battery Charging Device (ABCD)

BATTERY POST ADAPTER

Battery Post Adapter for General Motors side post batteries. Allows stud for attaching accessories wires. Sold as a pair. Clamshell packaged.

PART #	DESCRIPTION
853194	16.77 E Side Post Adapters for General Motors

BATTERY ISOLATORS

Cadmium plated isolator with terminal nuts and lock-washers. 3 terminal isolator for metal frame ground systems, 4 terminal has insulated ground terminal for use with fiberglass or other non-conductive materials. Isolates starting battery, provides secondary battery current for auxiliary power and full time charging of both batteries. Clamshell packaged.

PART #	DESCRIPTION
857000	32.54 E Battery Isolator - 3 Terminal
857001	30.56 E Battery Isolator - 4 Terminal

857000

857001

CIRCUIT BREAKERS

Used in 6, 12, and 24v DC applications. Automotive, R.V., air conditioners, battery chargers, any application requiring over-current protection. Non-corrosive molded cover eliminates grounding when operating against a fault line. Includes mounting bracket and installed nuts and washers. Clamshell packaged.

PART #	DESCRIPTION
857010	8.33 E 15 Amp Circuit Breaker
857011	9.72 E 20 Amp Circuit Breaker
857012	8.48 E 30 Amp Circuit Breaker
857013	8.61 E 40 Amp Circuit Breaker
857022	8.69 E 50 Amp Circuit Breaker

ELECTROTEK® NON CONDUCTIVE DIELECTRIC SILICONE COMPOUND

ElectroTek® is to be used for all electrical connections, where a dielectric compound is required to prevent voltage loss from arcing and to protect contacts from corrosion. Suppresses radio frequency interference, dissipates heat, insulates trailer wiring connectors and seals out moisture. Effective for automotive, RV and marine electrical applications. Non-water soluble. 3 oz. tube. Clamshell packaged.

PART #	DESCRIPTION
857200	21.49 E 3 oz. tube ElectroTek®

DIELECTRIC GREASE

Using dielectric grease on electrical connectors helps prevent corrosion and increases reliability. Display packaged.

PART #	DESCRIPTION
LB11755	21.49 E 2 oz. tube dielectric grease

TRAILER BRAKE CONTROLS

AGILITY™

Packed with features to provide the ultimate ease in setting and adjusting for safe, smooth stops.

THE EASIEST TO USE ADVANCED BRAKE CONTROL AVAILABLE

Digital Sensitivity Adjustment
5 settings for different loads and driving conditions

Innovative Braking Override

Large Digital Readout
Easy to read 5-99% power scale

Digital Power/Gain
Easy to set, easy to adjust stopping force

Towing large trailers hinders your ability to stop quickly. Protect your trailer and vehicle investment with the Agility™ trailer brake control. Most states and provinces have specific laws requiring brakes on trailers depending on weight or stopping distance.

AGILITY™ PLUG-IN SIMPLE!®

The very best!

- Cuts installation time by hours
- Allows for quick removal
- Breaking capacity: Up to 8 trailer brakes

PART #		
647294	124.00	G

INSIGHT™ FLEX-MOUNT™ BRAKE CONTROL

Providing the Ultimate Braking Experience!

The InSIGHT™ brake control with Flex-Mount™ versatility solves the problem of inconvenient mounting while increasing user safety and convenience. This is achieved by bringing the display within the driver's line of sight and the controls within easy reach...**all with no tools required** and Plug-In Simple!® installation.

- Flex-Mount™ Versatility -- Multiple mounting locations in any vehicle
- No Tools Required Installation -- Plug-In Simple!® components
- Increased User Safety -- Keeps eyes on the road and controls within easy reach
- Advanced Proportional Technology -- Mirrors braking action of the towed vehicle for safe, smooth stops
- Digital LED Display -- Intuitive 0-99 scale of power setting
- 7 Sensitivity Settings for Advanced Braking Control
- Short Proof Protection for up to 8 Trailer Brakes
- Electric or Electric/Hydraulic Trailer Brake Compatibility
- Flex-Control™ features a soft glowing light for easy location at night

MAGNET IDENTIFICATION

MAGNETS CAN BE IDENTIFIED BY THE COLOR OF THE WIRE USED

Dexter 7" x 1-1/4"

The magnets are round. Prior to April 1990 they had yellow wires, after 1990 the magnet has white wires. Replacement of magnets will need to be done in pairs and updated to the new magnet along with the lever. The early levers are weak and will bend and hang up as they wear.

Dexter 10" x 1-1/2"

The magnet wires for the early model round magnets are white and the late model oval magnets are yellow.

Hayes 10" x 1-5/8"

The magnet wires for the early model round magnets are red and the late model oval magnets are green.

AL-KO 10" x 2-1/4"

It will have light green wires.

Hayes 10" x 2-1/4"

The early model round will have red wires and the late model will have oval green wires.

Dexter 10" x 2-1/4"

It uses green wires.

Fayette 10" x 2-1/4"

The round magnets will have white wires (obsolete).

AL-KO 12" x 2"

It will have white wires.

Hayes 12" x 2"

The early model round magnet will have red wires, the late model will be an oval magnet with white wires.

Dexter 12" x 2"

It will have white wires.

Dexter Centerline 12" x 2"

The 4.5K axles will have red orange wires, the 6/7K axles will have red wires (obsolete for both sizes).

TRAILER BRAKE ADJUSTMENT**

Brakes should be adjusted after the first 200 miles of operation when the brake shoes and drums have "seated" and at 3000 mile intervals, or as use and performance requires. The brakes should be adjusted in the following manner:

1. Jack up trailer and secure on adequate capacity jack stands. Follow trailer manufacturers recommendations for lifting and supporting the unit. Check that the wheel and drum rotate freely.

WARNING: Do not lift or support trailer on any part of the axle or the suspension system.

2. Remove the adjusting hole cover from the adjusting slot on the bottom of the brake backing plate.
3. With a screwdriver or standard adjusting tool, rotate the starwheel of the adjuster assembly to expand the brake shoes. Adjust the brake shoes out until the pressure of the linings against the drum makes the wheel very difficult to turn.

Note: With drop spindle axles, a modified adjusting tool with about an 80 degree angle should be used.

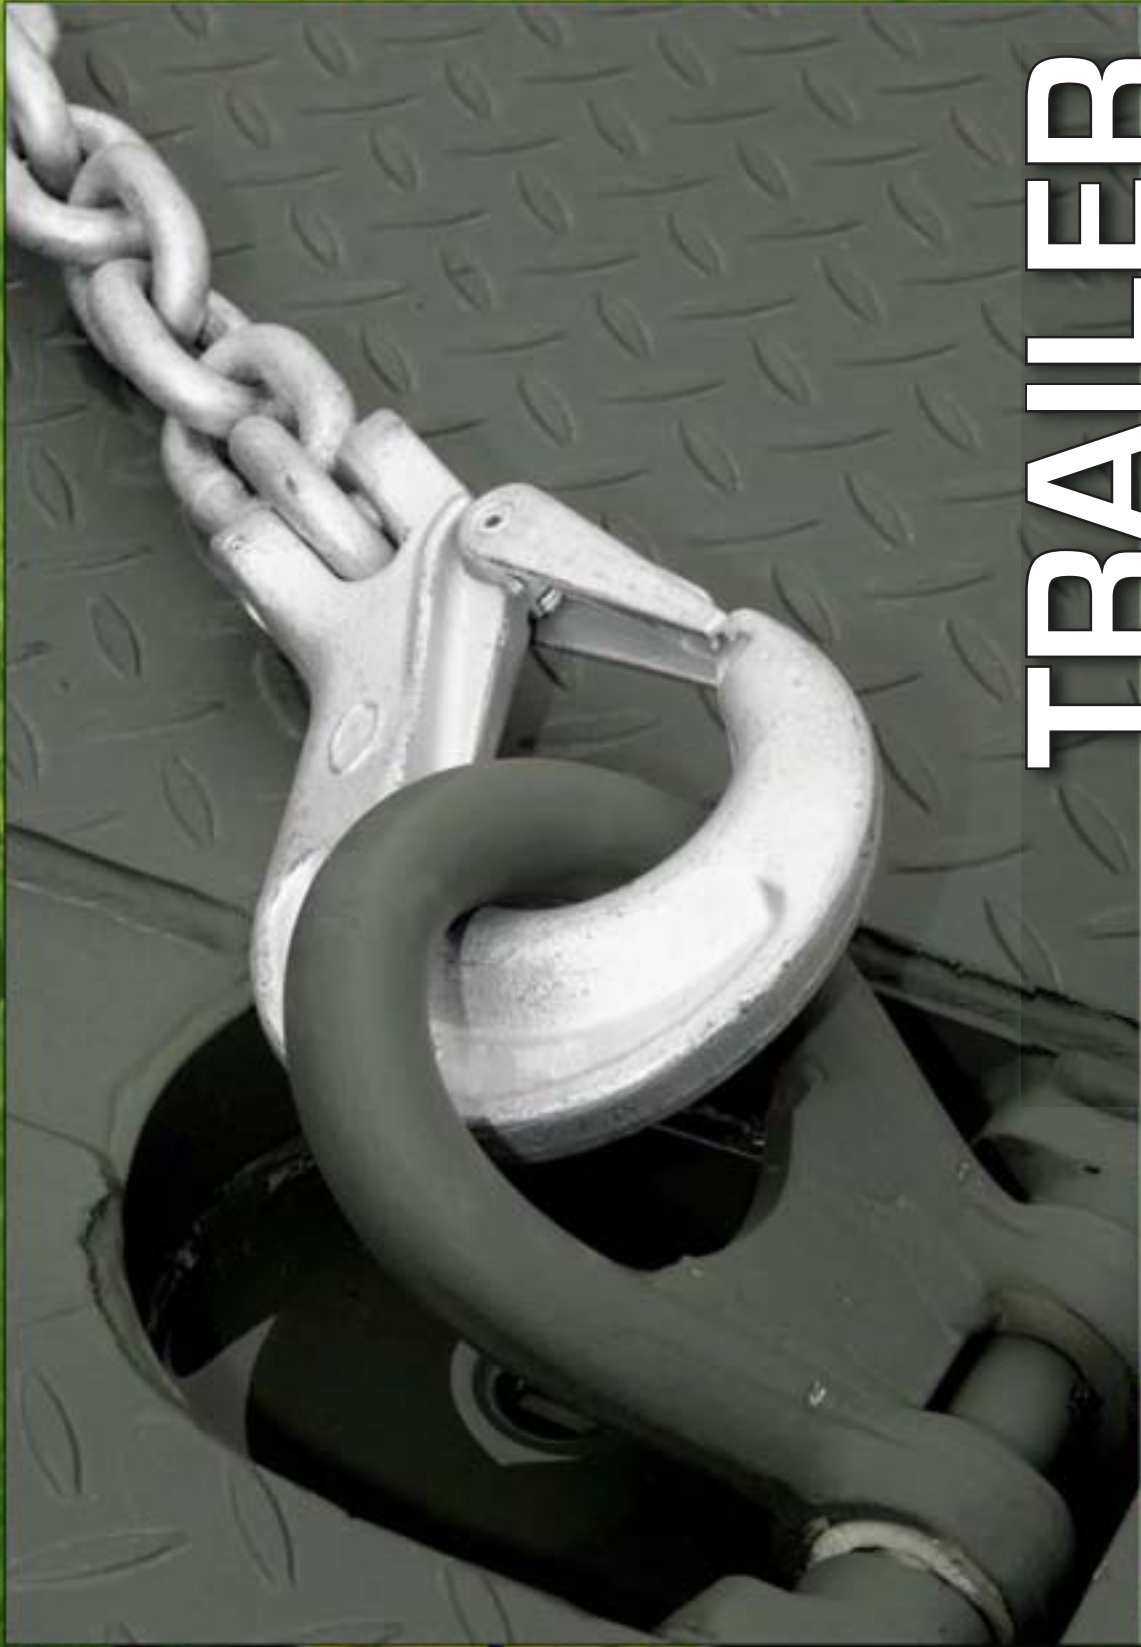

4. Then rotate the starwheel in the opposite direction until the wheel turns freely with a slight lining drag.
5. Replace the adjusting hole cover and lower the wheel to the ground.
6. Repeat the above procedure on all brakes.

WARNING: Never crawl under your trailer unless it is resting on properly placed jack stands.

Follow the trailer manufacturers recommendations for lifting and supporting the unit. Do not lift or place supports on any part of the suspension system.

CIPA UNIVERSAL CLIP ON MIRRORS

CLIP ON TOWING MIRROR ▶

CIPA's Clip-On Towing Mirror was designed to fit large factory truck and van mirrors. Rubber straps secure the Clip-On Towing Mirror to your vehicle's existing mirror, and easy-to-adjust arms fit tightly for a steady vibration-free ride. The Clip-On Towing Mirror extends your vision further than any OE mirror ever could with a total extension of 7 inches. This mirror will not obstruct your vehicle's existing viewing area. The Clip-On Towing Mirror has a 5" by 7.5" mirror face that widens visibility, in addition to your factory mirror, for peace of mind while towing. It will fit up to a 10" mirror. The Clip-On Towing Mirror is not position specific, so it can accommodate the driver side or the passenger side of your vehicle. Installation is simple and no tools are required. The Clip-On Towing Mirror is perfect for temporary or light towing needs. It is not recommended to be used as a full time heavy-duty towing solution. For best results, remove the towing mirror when not in use, and store in a cool dry place. Expand your Horizons.

530040 25.95 B

◀ DUAL VIEW CLIP ON TOWING MIRROR

The Dual-view Clip-On Towing Mirror provides better towing vision than any towing mirror out there! This innovative product features two fully adjustable mirror surfaces that allow you to fully customize your viewing area. The Dual-view Clip-on's large, flat mirror surface gives an accurate perspective of what is behind you, while the smaller convex surface acts as a built-in spot mirror for increased safety while driving, passing or changing lanes. Plus the fully enclosed mirror head design not only reduces wind vibration, but also ensures that the Dual-View's adjustable mirror surfaces stay right where you put them. This universal mirror features two adjustable arms and rubber straps that will not obstruct your existing mirror. Fits most 7" to 10" mirrors. Expand your Horizons.

UNIVERSAL TOWING MIRROR ▶

CIPA's Universal Towing Mirror is the mirror that you have been looking for! This member of CIPA's towing line is designed to fit the majority of vehicles, and reduce vibration, while maintaining a clean aerodynamic look on your existing mirror. This towing mirror is sure to surpass your expectations in all situations! The Universal Towing Mirror will provide enhanced safety while towing by extending your vision by a full 5 inches. This mirror features a 5 inch by 4.5 inch mirror face, and will not obstruct the view from your original factory mirror. The moveable feet, sturdy clamps, and tightening knob give you a secure fit without annoying vibration. This mirror's aerodynamic styling compliments virtually any vehicle. The Universal Towing Mirror accommodates the driver side or passenger side of your vehicle. Expand your Horizons.

TRAILER WINCHES

- Comfort grip handle
- Zinc plate finish
- High carbon steel gears
- Heavy duty rib reinforced frames
- Engineered to keep handle effort low for smooth and easy operation
- Drums drilled for winch strap installation
- Only winches that are shown to accommodate steel cable should be used with steel cable
- Cable keeper kits are included with the winches specifying steel cable
- Winches rated for steel cable have a larger drum hub to reduce or lessen the chance of kinking or fraying
- **NOTE:** FULTON Winches are **NOT** designed to be a human hoist and should never be operated when there are persons on or under the load being moved
- All Fulton winches are attractively boxed for display

BRAKE WINCHES

Fulton brand K-Series self-activating automatic brake winches hold the load securely when the crank handle is released. Typical applications include boat lifts, grain augers, manual fork lifts, retractable swing keels, dumpster lid lifts, and manual hoists. Drum hubs are 10 times the recommended cable size to maximize cable life. The KX series offer plated gear covers for improved gear train protection and a dual ratchet system.

ROPE RATCHET TIE DOWNS

- The Rope Ratchet's construction lets you secure a wide variety of loads quickly and easily
- With Rope Ratchet, you simply attach the two hooks and pull the loose end of the rope to the secure tightness you need
- With Rope Ratchet tie-downs, you never have to worry about stretching, snapping back, or loosening
- Your load stays secure because the rope stays locked in place with every pull until you release it by pushing the convenient thumb lever
- Display packaged
- 3 sizes

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel by Mr. Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

What Model Do I Need?

The Mr. Funnel Fuel Filter comes in four different fast-flow models (See below). Models differ mainly on flow rate. If your need is to transfer five gallons or less of fuel, then the F1 and F3 are for you. If you are transferring more than 5 gallons, then the F8 and F15 are right for you. Our F15 is our fastest flow model at up to 15 gallons per minute! This model can also be used at a fuel pump. Get your Mr. Funnel Fuel Filter today, and keep your engine running smooth!

MODEL: F1

MINI TACH

This Mini-Tach is the ultimate tuning device! It accurately records up to 10,000 RPMs and also meters total engine run time. RPM is recorded as the engine runs; engine run time is displayed when the engine is off. This is the best way to determine proper sled gearing, and it's also an excellent way to monitor engine use for proper on-time maintenance. Mini-Tach will work on all 1 or 2 cylinder 4-stroke engines with electronic ignition. Installs in just minutes with no special tools or mechanical experience.

BEL-RAY

BEL-RAY BRAKE & PARTS CLEANER

Bel-Ray Brake & Parts Cleaner is a unique low VOC product specifically designed to clean and degrease all metal surfaces. This unique product will clean brake components and remove carbon and oil build-up. It dries in seconds leaving no residue. Bel-Ray Brake & Parts Cleaner can be used to clean fouled spark plugs, carburetor parts, gear boxes, and other engine parts, as well as other areas that require a quick-drying spray. Should not be used on painted surfaces or come into repeated or prolonged contact with plastic or rubber materials.

MARINE BIODEGRADABLE MULTIPURPOSE LUBRICANT

Marine Biodegradable Multipurpose Lubricant is a rapidly biodegradable, multi-purpose, penetrating lubricant that cleans, lubricates and protects. It contains superior anti-wear additives that provide high film strength and low film thickness to prevent metal-to-metal contact. Marine Biodegradable Multipurpose Lubricant displaces moisture and can be applied to wet surfaces. Marine Biodegradable Multipurpose Lubricant is greater than 60% biodegradable making it the perfect multipurpose lubricant option for recreational and commercial marine users.

MARINE WATERPROOF GREASE

Marine Waterproof Grease is a mineral oil based, aluminum complex grease. Because it is an aluminum complex grease, Marine Waterproof Grease exhibits all of the beneficial properties of that thickener, including being virtually waterproof. It is a severe duty grease providing maximum protection against wear, rust, corrosion and water washout. Marine Waterproof Grease is formulated to provide for wet-duty performance including the wheel bearings of boat trailers in fresh or salt water. Marine Waterproof Grease repels water and is an excellent seal for bushings, bearings, all chassis lubrication points.

J-B PERM-O-SEAL RADIATOR STOP LEAK

Great for:

- Permanent Repairs for All Car, Truck, Van, Bus and Tractor Radiators
- Will Not Clog or Harm Cooling System

J-B Weld Perm-O-Seal is a specially formulated non-toxic compound ground to a very fine particle size to quickly mix and flow into all areas of the cooling system to find and seal leaks. The powdered concentrate allows for an economical repair as compared to liquid based alternatives that use similar technology. The special compound will quickly seal leaks and will also act as a rust inhibitor and lubricant to internal cooling system parts. It will not clog or harm your cooling system.

IMPORTANT NOTICE After installing Ride-On TPS Motorcycle Formula sealant into your tires you may notice a slight vibration until the sealant has warmed up and distributed evenly in your tires. This process usually takes 2 to 5 miles. Please DO NOT attempt to rebalance tires after the installation of Ride-On TPS Motorcycle Formula. Ride-On TPS is a balancing compound. Ride-On TPS will act as a balancer and will result in erroneous readings from a dynamic spin balancer that does not compensate for tire deflection, weight of the bike, brakes, or other suspension components. Ride-On is TPMS friendly, however it is not recommended for use in 2009, 2010, and 2012 Honda Gold Wings as their TPMS Sensors are not hermetically sealed.

BALANCE With one installation of Ride-On, lead weights become a thing of the past. While Ride-On works in conjunction with traditional weights, you won't need them anymore. Ride-On is specially formulated to hydrodynamically balance high-speed tires and dampen road noise and vibrations that cause a rough ride. The great thing is Ride-On will continue to adjust and literally rebalance your tires as you ride for the legal life of the tires. So go ahead, pop off those wheel weights, shine your wheels, and enjoy the smoothest ride you have ever experienced on your bike.

SAFETY FIRST With Ride-On TPS tire sealant, your tire literally fixes itself! If your tire is punctured, the centrifugal force of the rotating tire and the internal air pressure force Ride-On into the hole, sealing it virtually instantly. Since it helps eliminate porosity leaks that cause tires to deflate over time, your tires stay properly inflated, last longer, your bike handles better and gets more miles per gallon.

WORKS IN TUBE AND TUBELESS TIRES Ride-On TPS eliminates 85-95% of flats in tubeless tires from objects up to 1/4" (1/8" for tube tires) that penetrate the contact patch of the tire. Since puncturing objects often tear tubes, Ride-On's efficiency in tube tires is reduced to 55-65%. If the puncturing object remains in the tire, it is vital to remove it as soon as possible to prevent further injury to the tire or tube. Our company takes the position that any repair in a motorcycle tire should be treated as temporary.

RIDE-ON LED SMART CAPS

DESCRIPTION	PART #		
LED SMART CAPS			
LED Smart Cap (2 Pack)	650277	34.95	B
LED Smart Cap Small Display w/Wired Cap	650278	23.95	B

The LED Smart Cap Tire Pressure Monitor (TPMS) valve cap is a must for people that want to make sure that their tires are properly inflated. Once installed the LED Smart Cap TPMS valve cap will alert you if the tire pressure drops by a setpoint pressure. The Light Vehicle version of the Smart Cap Tire Pressure Monitor system is available for automobiles, SUVs, light trucks, vans, motorcycles, scooters, trailers, ATVs, etc. with a pressure range of 10 to 70 psi and a low pressure warning trigger of 4 psi (with a +/- 10% accuracy).

- Easy to Install - Simply screw valve caps onto tire valve stems.
- Bright blinking LED light that is visible in daylight and night time
- Self-Calibrating - Automatically calibrates to pressure the tire was set at when the cap was installed. The same valve can be used with tires from 10 psi to 70 psi (Auto and Motorcycle Version with a 4 psi pressure drop alarm) or 30 to 170 psi for commercial version (available in 4 psi or 8 psi pressure drop alarm)
- Automatically compensates for ambient temperature changes to avoid false alarms.
- Comes with integrated anti-theft device.
- Long lasting low pressure alert - blinking red light alerts of low pressure for 750 hours (more than a month).
- Low battery alarm - the led valve cap will blink yellow for up to 100 hours to alert you that the batteries are running low.
- Long Lasting 3 year battery shelf life.
- Great compliment to Ride-On TPS filled tires - 100% compatible and now you can be alerted of a slow leak.
- Proper tire inflation pressure helps extend tire life.
- Proper tire inflation pressure helps optimize fuel economy and save up to 3% in fuel.
- Available in 2 and 4 pack blister Packaging, as well individual and bulk packaging.

HARDLINE PRODUCTS

RX UV PROTECTANT CLEANER AND POLISH

Rx UV Protectant Cleaner & Polish™ was specifically made for the Power Sports Industry and is quickly becoming the standard for protecting plastic and metal surfaces found on boats, motorcycles, PWC, ATV's, UTV's and all the accessories that go with them. Seals the surface with a micro-thin layer of UV protectant. Restores nutrients that sun, water and dirt take away. Just one use moisturizes and restores shine quickly and easily. Cleans and protects any plastic and metal. Just spray and wipe clean.

- Boaters use Rx on your Isinglass®, Strata Glass®, plastic, stainless steel, aluminum, gel-coat or any painted surface
- Vinyl windows will stay cleaner longer from water spots, salt spray and resist damaging UV rays from the sun
- Provides 100% UVA and UVB protection
- Cleans and protects from dirt, water spots, salt spray and grime
- Use on gauges, instruments, windscreens, bezels & trim to protect from the sun and add shine to your surfaces
- Its anti-static formula reduces salt and dirt buildup

ULTIMATE CORROSION PROTECTION

NEW PRODUCT

Kills existing corrosion and prevents new
Easy and quick to apply
“ACTIVE”
for up to 12 months
Contains no wax, silicone, teflon or water
As close to ZERO CORROSION as nature will allow

Proven chemistry for Powersports. It will make maintenance and cleaning the bike or quad easier and save you money. It will also help prevent surface, structural and electrical corrosion related failure thereby increasing reliability and the bike's/quad's value.

HOW IT WORKS:

ACF-50 chemically treats metal using advanced polar bonding technology. It forms a “hydrophobic” film as it removes moisture from the metal surface. When applied it forms an ‘Active’ ultra-thin clear film that will kill any existing corrosion cells and will protect your bike or quad against new corrosion forming. It contains no water and is approved for electrical switches and connectors. It will create a “water resistant” film in all these parts. ACF-50 has a strong capillary action so will creep into all the areas that moisture can; actively pushing out moisture and replacing it with protection. Use ACF-50 anywhere, except the brakes, on your bike or quad including the engine and exhaust. Safe on paintwork, most rubbers and brings up black plastic trim a treat.

Excellent lubricant and penetrant

Approved for use on electronics and engines

Non-drying, ultra thin, clear film

All year round service spray

Very economical

Protects • Penetrates • Lubricates!

- Forms an “Active” ultra thin, clear film that kills existing corrosion cells, and will protect your quad or bike against new corrosion forming and last for 12 months
- “ACTIVE” which means that it ‘creeps’ and ‘keeps on working’ DOESN’T NEED REAPPLYING AFTER EVERY WASH!
- Contains no water, silicon, teflon or wax - no sticky build up, no risk of existing corrosion being sealed in and no risk of water remaining where it will cause corrosion and damage, even on electronics
- Chemically neutralizes road salt
- A clean, clear ultra thin fluid
- Dries out moisture
- Safe on all components; electronics, chrome, paint and plastic
- Use on heads, cooling fans, throttle linkages, brake cables, battery terminals, voltage regulator, suspension, engine components, torsion bars, fuel control units, fuse box, swingarm, relays / connectors, undercarriage, chain, ignition switch, security systems / FOBs and more!
- ACF-50 can be sprayed on, wiped on with a rag, or professionally fogged for complete protection

CORROSION BLOCK

High Performance WATERPROOF GREASE

NEW PRODUCT

CORROSION BLOCK LIQUID • AEROSOL

Kills Corrosion on Contact!

- Protects metal and electronics during play and storage
- Chemically neutralizes salt water
- A clean, clear ultra-thin fluid which leaves a non greasy atmospheric barrier to protect all metal surfaces
- Leaves no gummy residue because it does not contain wax, resin, tar, asphalt, silicone or Teflon
- Can be sprayed, brushed or wiped on
- Hydrophobic film provides corrosion protection all season
- Protects metal components down to -70°
- Keeps ice and mud from sticking
- Combined with its excellent penetrating and strong dielectric properties (40Kv), have brought electronics "back from the dead"
- Removes moisture from the corrosion by-product and isolates it from contacting the metal surface, restoring continuity to electrical circuits
- Can be used in many different electrical and electronic applications without fear of damaging the conformal coatings used
- Does not harm plastics or painted surfaces
- Improves reliability, reduces repair and labor cost

CORROSION BLOCK WATERPROOF GREASE

- Out performs lithium and most synthetic greases and meets or exceeds requirements for NGLI Service Classifications GC-LB (automotive wheel bearing and chassis lubricants) conforming to ATM D4950 performance requirements
- Excellent extreme pressure properties
- Excellent thermal / oxidative stability
- Resists bleeding / melting at high temperatures
- Suitable for sealed for life applications
- Dielectric / non-conductive
- Workplace safe and environmentally friendly
- Out performs competitive grease 5:1
- Waterproof

Prevention is better than replacement!

Corrosion Block is a unique product that has the ability to both prevent and stop corrosion in more places on Powersports Equipment than any other product of its type.

Corrosion Block is superior anti-corrosion compound. It kills corrosion in progress, prevents new corrosion cells from forming for 12-18 months, is an excellent penetrant and is an excellent light lubricant.
