CERAMIC SEMI-METALLIC PADS

Aramid fiber, ceramic fiber, carbon fiber and metal (copper and brass powder) fiber, etc. Soft–mild braking control, controllable pad on first braking with safety. Good initial bite. HH stopping power pad (Ameca test result). Low disc attack. Long life pad.

BRAKE PADS

SINTERED METAL PADS

Pad consists of 50-60% copper combined with carbon, ceramic, tin and abrasives. Pad material is aramid fiber, metals, abrasives and lubricants mixed with Phenol Resin.

Slightly more progressive feel at the lever. Metal powder components exceed 50% of pad material. Excellent initial brake pad bite that is not as aggressive as the RJL compound. Iron backing plate is plated with copper to make it a stronger bond with the pad friction material. Powerful stopping power in wet or dry conditions. Excellent initial pad bite, lower lever effort and minimal pad bed-in time required. Hard brake pad backing plate will not warp, even under extreme use. Superior stopping power with no fade.

ENGINE GASKETS

Precision-cut gaskets utilize materials that are engineered to endure the high temperatures and pressures of today's engines.

INTAKE & EXHAUST VALVES

Precision manufactured from top-quality materials to match OEM valves exactly.

BRAKE SHOES

High friction, 100% non-asbestos material for quicker stops.

METRO

AIR FORCE® BLASTER

AIR FORCE® BLASTER®

Metro's classic Air Force® Blaster® has taken the motorcycle industry by storm, quickly earning a reputation among professionals and bikers alike as the most powerful and efficient dryer available. With a body of steel and powerful 4.0 Peak Horsepower motor, the Blaster® produces 29,250 ft./min. of clean, dry, warm, filtered air and blasts water off off bikes in seconds cutting drying time by 80%! The Blaster® leaves no spots or oily residue and completely eliminates "after-streaking" ™, those annoying streaks that appear out of nowhere when you start riding because of hidden water. With the Blaster®, water has no place to hide™! The Blaster® is also safer (great for older bikes and expensive customs) and more efficient than compressed air or leaf blowers.

962500 289.50 ea B

- Cuts drying time by 80%
- Blows warm, dry, clean, filtered air
- Eliminates "afterstreaking" ™
- Water has no place to hide ™
- Better/safer than compressed air or leaf blowers
- Rugged all-steel construction
- Lightweight and portable
- Heavy duty neoprene blower nozzle plus 5 interchangeable attachments
- 10ft x 1.5" flexible commercial strength hose

SAFETY FLAG

With increasing snowmobile traffic, safety is a great concern. Be seen! Sno-Stuff Safety Flag has a stainless steel telescopic mast that extends from below the top of the windshield to over 62" high. The spring base allows the flag to flex up to 90 degrees without breaking. Top-quality, vinyl flag. Fast, easy installation!

FIRESTIK WHIPS SAFETY FLAGS

These FireStiks have a special blend of fiberglass and resin that offers strength and durability that is always flexible, never brittle.

Each whip is shrink-wrapped in a protective layer of PVC tubing that eliminates sun-splintering and deterioration. Other benefits are increased durability and enhanced color visibility. The 3/8" - 24 threaded base is compatible with a large variety of brackets, mounts, springs, quick disconnects and other mounting hardware.

The 12" x 8" orange rectangular safety flags are made 100% oxford polyester: a durable fabric proven to resist fraying and color fading better than nylon or vinyl. Flag is removable and/or replaceable and rotates freely on the rod.

CLYMER SERVICE MANUALS

Clymer repair manuals are written specifically for the do-it-yourselfer. With step-by-step procedures, detailed photography and extensive use of exploded views, each manual is based on the complete disassembly of the machine. Unlike OEM manuals, which are purposely designed for the professional technician, with an impressive array of specialized tools, equipment and knowledge, Clymer manuals are designed for the first-time user complete with full color wiring diagram.

Whether you're interested in routine maintenance tasks, troubleshooting, or more extensive repairs, the in-depth coverage provides indispensable information about your ATV.

HAYNES SERVICE MANUALS

What sets Haynes Manuals apart is the attention to detail that goes into the production of each book. Every manual is written from hands-on experience based on a complete teardown, which is the step-by-step procedure of dismantling a particular vehicle part-by-part. This is followed by the detailed rebuilding of the specific model it documents. Writing each manual takes 30 man-weeks, with authors working as teams to shorten the production time and avoid fatigue during the difficult process. Hundreds of photographs accompany each manual's step-by-step instructions. The books are written from the actual experience of Haynes' own expert personnel using only a basic set of tools and presented in a style that any DIYer can follow, even a beginner. The DIYer can save a great deal of time and money, not to mention feeling proud of the job, by using a Haynes book..

RAM MOUNTS

RAM stands for Round-A-Mount. Most of the product line is based on a patented design revolving around a rubber ball and socket system. RAM products have quickly become an essential mounting component for a wide variety of applications requiring a robust mounting solution. Incorporating a non-slip feature as well as shock and vibration dampening, our mounting solutions are truly one of a kind and enhance every application they are used in. RAM products are available to support devices from less than a pound up to 185 pounds. Utilizing the finest assembly hardware, durable composites, steel, stainless steel, rubber, and aluminum, our mounting bases and complete kits are manufactured to perform above expectations and remain cost effective. Mounts for most any two or four wheel mode of transportation. Several versions of handlebar kits are available to accommodate the most popular makes and models. Most any portable electronic device can be quickly and securely mounted with RAM. Cell phones, radar detectors, GPS, and XM Radios are just some of the items we offer mounts for. Designed for rugged outdoor use, RAM is the ideal accessory for your electronics when you need a motorcycle, ATV or UTV mount.

RATCHETING TIE DOWN WITH WEB CLAMP

Erickson's NEW WEB CLAMP was designed to address the problem of what to do with excess webbing. The WEB CLAMP mechanism is much like a mouse trap, lift the spring loaded clamp and place the folded webbing under the clamp, release the spring loaded WEB CLAMP and you have trapped the excess web. Very simple and effective. SO NEAT!!

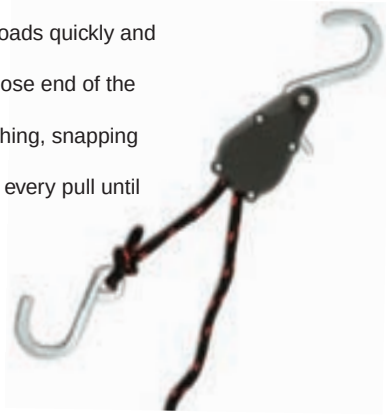
Rope RATCHET



- The Rope Ratchet's construction lets you secure a wide variety of loads quickly and easily
- With Rope Ratchet, you simply attach the two hooks and pull the loose end of the rope to the secure tightness you need
- With Rope Ratchet tie-downs, you never have to worry about stretching, snapping back, or loosening
- Your load stays secure because the rope stays locked in place with every pull until you release it by pushing the convenient thumb lever

DUAL BATTERY CONTROL KIT

- Lets you use two batteries, but saves the main battery for essential functions, such as starting the vehicle
- Engineered specifically to give maximum power during winch power-in operation
- For use with 12-volt accessories such as winches, lights, stereos and more
- Minimizes charging system overload; if both batteries need charging, the main battery is charged first
- Optional manual override forces a parallel connection when you need extra power for charging a weak battery or jump-starting another vehicle
- Designed for use with 12-volt DC magneto or alternator charging systems
- Easy to install; includes all necessary hardware (**Second battery not included**)

WR77977	**286.99**	G

REMOTE CONTROL UPGRADE KIT

For Warn 2.5ci and 1.5ci.
Comes with Remote control, socket and express install wiring.

WR64259	**94.41**	G

For Warn 2.5ci and 3.0ci
Remote only - does not include socket.

WR64849	**64.23**	G

WARN MINI ROCKER WITH CORDED REMOTE

This kit allows you to plug in a corded remote directly into the mini-rocker switch - no need to drill and install the socket like on existing systems. This allows you to conveniently winch while on or off the vehicle. Kit includes mini-rocker switch with socket, corded remote, and all necessary hardware.

WR80588	**106.09**	G

6' REMOTE WIRING HARNESS & SOCKET SPADE TERMINAL

Fits A2500 only.

WR37678	**31.35**	G

REPLACEMENT MINI-ROCKER CONTROL SWITCH

Handlebar mounted control. Replacement part for the Warn 3.0ci and 2.5ci ATV winches, includes switch and mounting hardware.

WR64851	**52.75**	G

WARN WINCH UPGRADE KIT

Converts the Warn A2000 to the Warn 2.5ci ATV winch. Comes with the contactor, express Install wiring and mini rocker switch control.

WINCH ACCESSORIES

WINCH ACCESSORIES

REPLACEMENT WINCHES

In the event you need to replace your WARN Powersports winch, a WARN replacement Winch can be a cost-effective option. These units consist of the winch's core, (motor, drivetrain, brake, drum, etc.), but do not include a winch rope, hook, fairlead, contactor, wire or control. Simply remove those parts from your previous WARN winch, and you'll be ready to "Go Prepared" again with a genuine WARN winch.

25/30 Winch Replacement for WARN RT / XT and many ci applications.

WR74915	**283.73**	G

40 Winch Replacement for WARN RT / XT and many ci applications.

WR74929	**463.10**	G

PREMIUM TREE TRUNK PROTECTOR

The Premium Tree Trunk Protector is designed to help protect a live tree from damage during winching operations and self-recovery situations. The strap is constructed of premium quality nylon with an encased red warning marker to indicate damaged webbing. Plus, end loops are reinforced with durable forged steel ring connectors and coated with Cerakote for premium protection against wear and abrasion. 1" x 8' (2.5cm x 2.4m) Rated to 7,200 lbs. (3265 kg).

208139	**64.99**	G

ROLLER FAIRLEAD

Replacement for 2.5ci, 3.0ci, A2500. Upgrade from Hawes Fairlead on 1.5ci and A2000 winches.

WR28929	**45.87**	G

FOR USE WITH ALL WARN MOUNTING KITS EXCEPT

WR29256	**52.55**	G

Replacement fairlead for 4.0 Utility Vehicle Winch

HAWES FAIRLEAD

For the A2000 ATV winch

WR36265	**30.14**	G

WR28930	**33.10**	G

ROLLER FAIRLEAD FOR ATV PLOW

- Designed for use with winches that raise and lower ATV plow blade. Larger diameter lower roller reduces wear on wire rope.

WR69373	**51.98**	G

PLOW ROLLER FAIRLEAD FOR RT/XT40 WINCHES

For use on vehicles that use a winch to raise and lower a plow blade, this fairlead has a larger diameter lower roller that reduces wear on the winch's rope.

WR82550	**65.71**	G

ATV SYNTHETIC ROPE EXTENSION

ATV users can now extend the reach of their WARN winch with the new 50' WARN Synthetic Rope Extension. The 1/4" diameter rope is lightweight, easy to handle, and won't rattle in a cargo box. Easily attaches to the winch cable to provide an additional 50 feet of distance. Rated to 4000 lbs.

WARN ATV BUMPERS

Warn ATV bumpers give your ATV extra protection from trail hazards! These new bumpers are built especially for big utility ATVs. Made of 1/8" laser-cut steel and powder coated to resist corrosion, Warn ATV bumpers are contoured to give your bike a bold, customized look. Use it with our new trail lights, the Warn winch and winch mounting system, and even our plow. Now you can protect your bike and enhance its appearance too!

HEADLIGHT LIGHT LIFT

455438 26.95 B

The big center headlight on a Honda 400, 450 or 500 Rubicon is a great help when riding your ATV before daylight or after dark. You learn to depend on it, particularly when the small headlights in the fenders are covered with mud or blocked by a snow plow or other utility instrument. But when you use the front rack, or worse, install a front basket with equipment or other items in the basket the headlight gets blocked. The light lift is an inexpensive set of brackets that, when installed on your Honda Foreman, raise the center headlight 2-1/4" to 3-3/4", depending on your needs. The kit includes complete instructions and hardware, giving back the use of the front basket and the headlight at the same time. The light lift can also help if you have a snow plow on the front of your Honda that frequently blocks all three headlights. Many times, when an item is placed on the front rack, the glare from the light reflecting off of it can be distracting. The light lift raises the headlight up and the glare is reduced.

ATV light AFTER light lift. It raises the Headlight up so that contents on front rack or snow plow blades do not block the light.

HOW TO ORDER YOUR WARN PROVANTAGE FRONT MOUNT ATV/UTV PLOW SYSTEM

SELECT THE PART NUMBER FOR:
1) PLOW BLADE 2) PLOW BASE ASSEMBLY 3) MOUNTING PLATE ASSEMBLY 4) PLOW BLADE-RAISING MECHANISM

STEP 1) ORDER YOUR PLOW BLADE

ATV

TAPERED PLOW BLADE

- Tapered design with aggressively curved profile to move snow or dirt up and away from the surface you are clearing
- Made from thick 11-gauge steel with extra-heavy ribbing for added rigidity. Boxed design adds further support
- Special low-friction powder-coated finish helps keep material from sticking to the blade
- Thick, sturdy wear bar has steep angle of attack for maximum surface scraping

LENGTH	TAPERED BLADE		
54" Yellow	**WR80954**	**372.39**	G
60" Yellow	**WR80960**	**434.82**	G

STRAIGHT PLOW BLADE

- Made from thick 12-gauge steel with heavy-duty ribbing and a center cross member for added rigidity. Boxed design adds extra support
- Special low-friction powder-coated finish helps keep material from sticking to the blade.
- 54" and 60" blades have top lips with pre-drilled holes for accessories.
- 17 3/4" blade height.
- Thick, sturdy wear bar has steep angle of attack for maximum surface scraping.
- **50" plow is 14-gauge, no top lip, 16-3/4" height

UTV

RAPID CONNECTION, DURABLE CONSTRUCTION, AND TOP QUALITY - SPECIFICALLY FOR UTVS

STRAIGHT PLOW BLADE

Get your UTV ready for plowing with the WARN ProVantage Plow System. The system has been engineered from the ground up and extensively tested to give the product years of service, so you and your vehicle can plow season after season.

The ProVantage UTV Plow system has the same rapid connection system as the ATV system, but it uses a big UTV specific 72" plow blade to move material. Just add the UTV blow base, your plow lift mechanism (either the ProVantage Power-Lift of a WARN XT40 or XT30 winch), order your accessories of choice and you're ready to get to work!

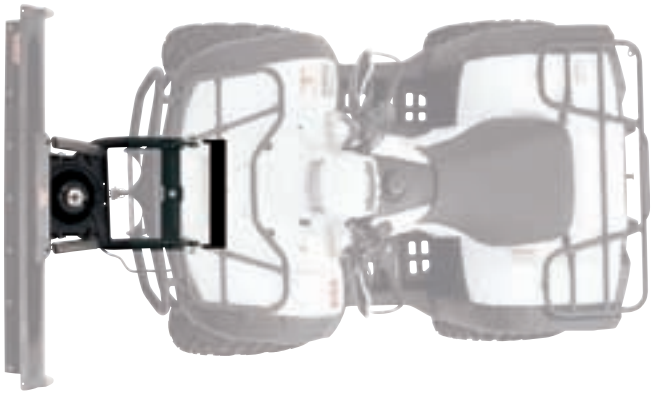
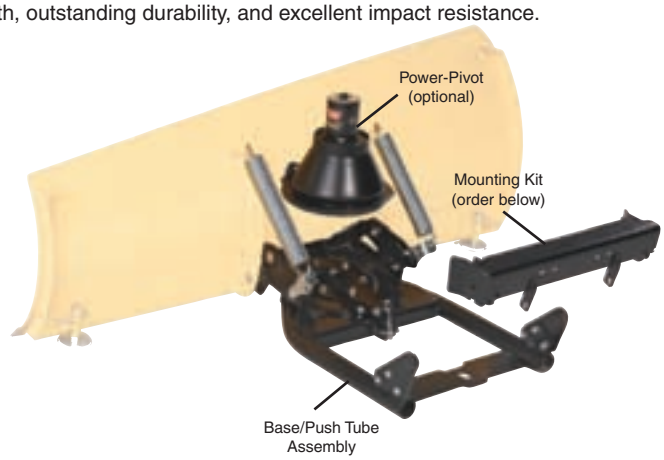
WARN ProVantage™ FRONT MOUNT PLOW SYSTEM

STEP 2) ORDER YOUR PLOW BASE/PUSH TUBE ASSEMBLY

The WARN Plow Push Tube assembly features an extra-wide design for increased stability and durability, a forward trip system, and an interlocked rotating base plate for great strength, outstanding durability, and excellent impact resistance.





ATV	WR92100	Standard Front Mount Plow Push Tube Assembly	193.77	G
UTV	WR79805	Standard SXS Plow Push Tube Assembly	441.65	G

STEP 3) ORDER YOUR PLOW MOUNTING KIT

- Rapid connection system: easy-on, easy-off, thanks to self-locating pin design
- Mount is located at the front of the vehicle - no need to crawl under the ATV or UTV
- No need to remove mount during non-plowing seasons; no reduction in ground clearance
- Each kit is engineered to fit a specific ATV/UTV make and model. See application guide below for availability of front plow mounts for your vehicle.

WARN PROVANTAGE BUCKET CONVERSION KIT

Turn your ProVantage plow blade into a powerful and versatile bucket loader with this easy to install conversion kit. With a 200 lb. capacity, the ability to move up to five cubic feet of material, and a 60 degree dump angle, you'll be able to get more done in less time. This durable unit is made from sturdy 14 gauge steel with added reinforcement. It's easy to use: the dump release is operable from the driver's seat and when you lower the bucket, it automatically resets to the "ready" position. A must have tool for anyone wanting to get the job done.

1) PLOW BLADE 2) PLOW BASE ASSEMBLY 3) MOUNTING PLATE ASSEMBLY 4) PLOW BLADE-RAISING MECHANISM

STEP 1) ORDER YOUR PLOW BLADE

TAPERED PLOW BLADE

- Tapered design with aggressively curved profile to move snow or dirt up and away from the surface you are clearing
- Made from thick 11-gauge steel with extra-heavy ribbing for added rigidity. Boxed design adds further support
- Special low-friction powder-coated finish helps keep material from sticking to the blade
- Thick, sturdy wear bar has steep angle of attack for maximum surface scraping

HOW TO ORDER YOUR WARN STANDARD CENTER MOUNT ATV PLOW SYSTEM

SELECT THE PART NUMBER FOR:
1) PLOW BLADE 2) PLOW BASE ASSEMBLY 3) MOUNTING PLATE ASSEMBLY 4) PLOW BLADE-RAISING MECHANISM

STEP 1) ORDER YOUR PLOW BLADE

- Warn Plow blades are made from high-strength low alloy steel with 3/16" outer blade ribs to provide superior strength and rigidity. These ribs also allow a weight reduction that gives you better handling and performance while plowing.
- Warn uses large bushings - 6" in the base and 1-1/2" in the blade ribs - to dramatically reduce wear and absorb the shock of plowing. A large, replaceable wear bar and adjustable gravel skids make fast work of difficult jobs.
- And, with the Warn Integrates Accessories Systems, you can change blade widths without buying new mounting kits, lift mechanisms or base/tube assembly.

MODEL SPECIFIC PLOW MOUNT

APPLICATION STARTS ON NEXT PAGE

The Warn Plow Mounting Kit remains attached to the ATV and becomes a structural component adding rigidity to the ATV during plowing operations. Placement is forward of the foot pegs to avoid any reduction of ground clearance or operating interference. Quick release pins attach or detach the Warn Plow Blade and base assembly in a matter of moments.

FOOT NOTES
AO. Does not work with UML
AL. Kit must be revision B2 for mid-05 and later
L. This kit requires using a WARN ProVantage plow lift to raise plow.
Y. Not Compatible with Manual Plow Lift

STEP 4) ORDER YOUR PLOW RAISING MECHANISM

You have two choices of how you can raise and lower your Warn Blade. You can pick one now and add to it later. It's all part of the Warn Integrated Accessories approach. **Choose: Winch lift, or Manual Lift.**

ORIGINAL ATV/UTV PLOW SYSTEM

STEP 4) ORDER YOUR PLOW RAISING MECHANISM

UNIVERSAL MANUAL LIFT

One kit will fit all makes and models. The Lift Handle attaches to the plow frame, not the ATV. When the plow is removed, so is the handle. The Hand Lift will raise the blade higher and easier than any other brand. The front lifting point is adjustable so you can choose how high and easy the blade will raise. The handle itself is padded, height and width adjustable for operator comfort. New, stronger 3/8" short lift rod, no longer 5/16"!, New cable lift design. Longer stroke bell crank provides better lifting action.

GEN-II FRONT MOUNT ATV PLOW SYSTEM

STEP 3) ORDER YOUR PLOW MOUNTING KIT

The new front plow mount system hooks up and disconnects in seconds making it one of the easiest plow mount hook ups around. One piece front mount that easily bolts on made from heavy duty 7 ga steel. Hook up points are 5/8" round rod and use the same proven quick latch system as our regular plow has used for years. The push tubes are built out of 1-1/2" square 11 ga tubing (the heaviest in the industry). The mount part is made of 1/4" steel. All you do is simply lift your push tubes up and roll your atv into the mount, swing the quick latches in place, hook your winch cable to the push tubes and you are ready to go!

BOOT GUARDS

You can't bend 'em or smash'em. CV joints, rubber boots, and drive shafts on ATVs are expensive and they need to be protected. Typical boot guards are installed with U-Bolts, this makes it difficult to install and the exposed threads are usually bent or smashed. These boot guards are designed with weld on clamps specifically located to fit to your quad. They are fastened with f at headed bolts. 10 and 12 gauge steel.

FRONT TOW HITCH

This heavy duty front tow hook consists of a high strength bracket that bolts to the front end of an ATV. This bracket provides a secure point to attach tow straps, ropes and winch cables for pulling. Installation requires no welding or drilling. Bracket bolts on in minutes using only simple hand tools and is zinc plated for rust resistance.

SEIZMIK PURSUIT SIDE VIEW MIRRORS FOR ROLL CAGES

- The cast aluminum housing can withstand the most extreme punishment
- Weather sealed caps keep out debris
- Fully adjustable and serviceable
- Rubber vibration isolator means a clear image and keeps the mirror from sliding
- Position tension adjustment bolts
- Cast aluminum and steel clamp has low-mass design allowing it to work with virtually any windshield
- Notched Delrin® detents allow the mirror to fold in when hit and be returned to its original position in one move
- The adjustable independent glass stays where you set it, keeping riders focused on the trail and not their mirror
- Independent convex safety glass provides a wide viewing angle and can be replaced without having to replace the whole mirror
- Color kits available and sold separately

SEIZMIK RZR 900S & 1000 MIRROR MOUNTS

- Designed specifically for Pursuit Mirrors and RZRs
- Allows mirrors to be mounted with Polaris Full Windshields
- 4mm thick steel minimizes vibration
- They can be used with any other windshield (or no windshield at all) to prevent clamps from scratching the roll cage.

This is what you have to cut to make their windshield work with regular 1.75” round tube clamp.

This is the mirror mount.

650353	**14.99**	G

THE PROBLEM
Pure Polaris full windshields for RZRs have a plastic sleeve that covers almost all of the roll cage A pillar. If you want to use the Pursuit mirrors, you have to cut the plastic sleeve to make room for our clamp.

These mirror mounts eliminate the need to cut the plastic sleeve.

Our mirror mount gets the mirrors off the roll cage tubes by attaching to the existing holes, using existing bolts.

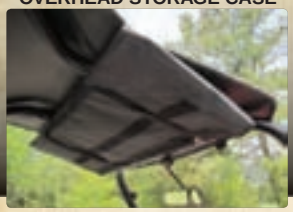
OVERHEAD STORAGE CASE



THREE WINDSHIELDS IN ONE!

This innovative new system is three windshields in one! Run it with the lower section as a half windshield for open air driving. Run just the upper section for great ventilation while still blocking wind and dust from hitting your face. Use both sections for full windshield protection.

- 3 windshields in one - full, half, and upper
- Constructed of thick .220" impact resistant optical acrylic
- Excellent fit and finish with gaskets in all the right places
- Integrates seamlessly with Seizmik Light Bar kits, Hood Rack, and Tops (not incl.)
- The low mass seam minimizes visual distortion and is sealed with a gasket to block water intrusion
- Easily installs without drilling
- Trailerable up to 65mph
- Storage case sold separately

- 3 configurations: upper, lower and full
- Configure the windshield based on weather conditions or driver preference
- Constructed of .220" optical-grade acrylic
- Steel header panel for added stability and reduction of wind intrusion
- Installs easily with basic hand tools and no drilling required
- Quickly configured on the fly without tools and all hardware stays on the roll cage regardless of configuration
- Plastic hinge holds two pieces together
- Integrated rubber bumpers keep pieces from rubbing together
- Clamps with ball studs ensure that windshield stays in place even over rough terrain
- Minimizes airflow into occupants face in all 3 configurations
- QuikFit Straps
- Trailerable to 65 mph
- Works with OEM roofs and nearly every aftermarket roof
- Works with nearly all soft and hard tops and Seizmik® accessories
- Fits with Pure Polaris Tops and RZR 4-seaters

FULL:
Full windshield for full protection of the elements.

UPPER:
For dusty trails because it pressurizes the cab, keeping out dust while allowing air into the cab.

PANELS

SOFT TOP AND REAR PANEL COMBO

The soft top has a best in class fit courtesy of Seizmik's new "Quikfit" tightening system. The tightening system uses two straps that wrap around the roll cage and buckle inside the cab. This reduces the installation time of the top and provides the best fit of any top in the industry. The system uses two straps that reduce the installation time of the tops and provide a tighter fit. What really sets these tops apart is their ability to be left on vehicles that are trailered up to 65 mph. This is possible because the tops are wrapped around the roll bar and velcros into place, creating a snug fit that eliminates any loose flaps.

- Durable UV resistant PVC coated denier nylon
- Secures to windshields with adhesive backed velcro
- Easily installs without tools or drilling
- Incredibly secure and tight
- Velcros down, so there are no loose flaps!
- Trailerable with properly installed windshields
- Huge back panel window
- Uses Seizmik's Quikfit tightening system to create a super tight fit
- Can be trailered to 65 mph

WARN

WARN FOG/TRAIL LIGHT KITS

At 3.5" (8.9 cm) in diameter, these lights are the optimal medium-sized fog lights. The 55W H3 halogen bulb and 66-degree bar-shaped light beam deliver great low-visibility performance. Features include hardened clear glass lenses; vaporized aluminum over steel compound curve reflectors for maximum light output; and impact-resistant polymer cases with O-ring seals for excellent water resistance. These lights also have a wireless control switch, so there's no need to run wires through the firewall.

Kit contains:

- Two lights
- Mounting hardware and wiring
- Wireless control
- Transmitter
- Rock guards and covers

ATV RACK COMBO BAG WITH COVER

NEW PRODUCT

Keep your gear organized, your drinks cold and protect your seat, handlebars and front rack from the elements with this incredible Rack Bag / Cooler / Cover all in one! Simply open the zipper located just behind your ATV's seat and pull out the cover. It's big enough to protect your seat, handlebars and front rack, yet stows away inside the bag like it's not even there! It takes only seconds to cover your ATV or stow it away. Constructed of rugged water-repellent and UV-resistant 600 denier polyester, the rack bag has 2 large zippered coolers with leak-proof liners, each holding up to 12 - 12 oz. cans. For fast access, there's a zippered pocket on the back and a mesh pocket on the front. The zigzag shock cord is great for holding down raingear or other items. Storm flaps keep rain away from the oversized zippers equipped with quiet riding zipper pulls. Attaches to rear ATV racks with 8 pair of heavy duty straps and ladder lock buckles.

NEW PRODUCT

DIRECTION 2 FENDER FLARES

These overfenders provide you with extra protection and greatly enhance the look of your ATV. The material used for this product is HMW hair-cell polyethelyne. This material is rigid yet flexible enough to withstand all the potential abuse an ATV rider can drum up.

Custom designed and made via vaccuum forming process these overfenders follow the natural lines of the existing fenders. Once installed, they look like as though they came directly from the factory.

This product greatly enhances the look of your ATV while adding unsurpassed extra protection against flying debris and mud. Ideal for the ATV enthusiast who has upgraded to larger wheels and is now getting soaked or the rider who simply wishes to give his ATV that custom look!

This is the solution for you! You will not be disappointed! This item includes all the necessary hardware for installation as well as detailed instructions.

COVER SAVER

Cover saver helps eliminate handgrips from tearing through the cover and aids in cover installation. Just slip "Handle Balls" over existing handgrips before installing cover; they allow the cover to slip on and off much easier and increases the life of the cover, especially while trailering. Good for Snowmobiles, ATVs, Watercrafts, Motorcycles etc.

PROTEK ATV SHIELD

The new Cobra ProTEK ATV Windshield features an edgy design to match the newer atv styling. The addition of ribs and contours give the ProTEK windshield added strength. The ProTEK has two mounting options; Standard or Rapid Release. Unlike other brands, you do not have to remove your Cobra ProTEK shield to trailer your ATV as long as it faces forward. The ProTEK has a universal fit that comes with or without a headlight cutout, and with black graphics.

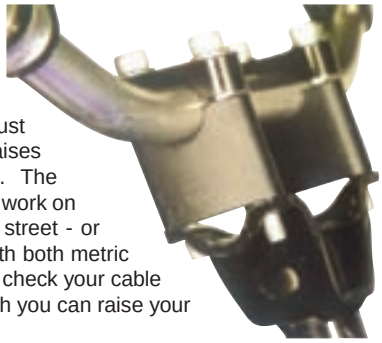
STAR SERIES HANDGUARD GAUNTLET

PM14258	**44.95 pr**	G

Keep your hands warm and dry no matter what the conditions. Designed to work with our Star Series handguards, these gauntlets keep out the cold, wind, rain, and mud and are great for snowmobiles, ATVs, and motorcycles. The unique “stay-open” design makes it easy to grab your bars and see your controls. The gauntlet extends your riding season and allows you to ride with thinner gloves, giving you a better feel.

UNIVERSAL BAR RISERS



Need a little bump in bar height? We've got just what you need. Our Universal Bar Riser raises 7/8" bars either 1" (25mm) or 1.6" (40mm). The unique design of these risers allows them to work on virtually any ATV, motorcycle - offroad and street - or snowmobile with 7/8" bars. Risers come with both metric and standard longer mounting bolts. Note - check your cable slack before purchase to determine how high you can raise your bars.

Universal 7/8" Bar Riser - 1.6" (40mm)	**PD15302**	**40.00**	G

Introducing the new PowerRiser from PowerMadd. This one piece design offers superior strength at an unequaled price. The PowerRiser provides dual pivot points so you can position the riser front to back, while positioning your bars up and down for the perfect bar placement. The PowerRiser comes in two widths – 3.25" for snowmobiles as well as Can Am and Polaris ATVs, and 4.75" for ATVs and motorcycles. Both widths allow you to use standard 7/8" bars or oversize 1 1/8" bars.

POWERRISER 325

The PowerRiser 325 comes in a 2" rise and will work on most snowmobiles with no cable modification. Check your cable slack for use on ATVs.
Note - One piece OE bar clamps will not work with the PowerRiser 325 - Replacement 7/8" bar clamps are required (PM15470)

STAR HANDGUARD SYSTEM

The strongest protection you can buy. The Star Series Handguard is designed to take a beating. The mounting brackets are tough aluminum, while the guard itself is made of two different types of plastic - a stiff spine for durability, and a softer colored body for flexibility. Designed to protect your hands from flying debris, rocks, bushes, branches, and mud, plus, keep your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through. In winter, remove the optional extensions for added wind protection.Designed with a universal mount system that works on ATVs, motorcycles and snowmobiles and requires only 1/2" of bar space.

SOLD SEPARATELY:
- **MOUNTS**
- **OPTIONAL LARGE AIR DEFLECTORS**
- **OPTIONAL MIRRORS**
- **STAR SERIES HAND WRAP**

The all new Tri-Mount Kit offers another area to mount the handguards - just below the bend on the rise of the bars. This is an ideal choice when space is limited near the controls, especially on utility quads and some snowmobiles. Easy to mount because there is no need to move controls to make space. Note - works only on 7/8" bars.

POWERMADD SENTINAL HANDGUARDS

PowerMadd is excited to introduce our latest handguard offering! The Sentinel Handguard is designed to be the most stylish, durable and functional handguard to date. The Sentinel guard is larger compared to the Star Series which in turn gives you more protection. The mounting brackets are 6061 aluminum, while the guard itself is made of two different types of plastic—a stiff two piece spine for durability, and a softer colored body for flexibility.

The Sentinel protects your hands from flying debris, rocks, bushes, branches, and mud. Plus it keeps your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through. The Sentinel Handguard will work with: Sentinel Armor, Gauntlet, Flare, Hand Wrap, Mirror and Large Mirror.

Note: Requires mount kit **224050**, **224051**, **224052** or **PM14269**
Sentinel Handguards work with:

POWERMADD SENTINAL HANDGUARDS

NEW PRODUCT

OPTIONAL ACCESSORIES

SENTINEL MIRROR KIT

Introducing the Sentinel Mirror Kit. The kit includes two mirrors and all hardware needed to make the mirror fixed or folding. The Mirrors consist of a polypro plastic base and a 2.75" mirror which gives you safety and piece of mind. The mirror has been designed specifically for the Sentinel Handguards and follows the lines and shape of the guard for a clean look and they can fold in when not in use or if you use a cover. Our Sentinel Mirrors attach directly to your Sentinel Handguards with a few simple steps. The mirror kit will work with the Armor, Hand Wrap, Flare and Gauntlet. Note: Armor and Hand Wrap work with fixed mount only.

MIRROR SET - FIXED / FOLD IN	**224053**	**25.00**	G

SENTINEL ARMOR

The Sentinel Armor permanently attaches to the PowerMadd Sentinel handguards adding complete 360 degree protection. Utilizing the Sentinels popular style the Sentinel Armor looks good while doubling the amount of protection! The Sentinel Armor is constructed of light weight closed cell molded AEPE foam, which is both water proof and extremely durable. Works with both the Mirror Kit and Hand Wrap.

ARMOR	**224054**	**40.00**	G

HANDGUARD FLARE

The Flare was developed to attach over existing handguards and provides more than triple the amount of protection from roost, rocks, mud, and snow. By sweeping the Flare back towards the racer the amount of wind protection is significantly increased making them must-have for cold weather riding.

The unique mounting system allows it to work with most handguards including the PowerMadd Star Series, TrailStar and even original equipment guards. The ability to quickly install the Flare as conditions warrant makes this an accessory riders will definitely want to have on-hand.

The universal Hand Shifter works great on all models. Our hand operated shift levers mount to most ATV foot shift levers. Choose a long or short handle. We've developed a unique way to fasten the shifter's knob to the steel rod. Our hand shifter is sturdier than others, with stronger mountings, and a better finish. The Yamaha Big Bear is the only model we have found that our standard shifter doesn't fit. To satisfy that problem we have brought back a previous model that fits the Big Bear.

TWIST THROTTLE KITS

- Kit includes Motion Pro throttle and throttle cable to work with stock carb (includes carb cap if needed)
- Designed for ultimate throttle performance

CR PRO
Die-cast aluminum housing with black epoxy finish. Straight-pull assembly. Recommended for 34 mm or smaller straight-pull carburetors. 4 1/2 in. throttle tube with grip retaining ring.

TURBO
Polished die-cast aluminum housing. Opens 28-38 mm carburetors. Perfect ratio for off-road motorcycles or ATVs. Comes complete with cable adjuster and dust boot.

VORTEX
Made from die-cast aluminum with a gray finish and gray rubber mud cover. OEM-style replacement similar to most late model two-stroke Japanese MX bikes.

ALL BALLS ATV CABLES

- Black PVC outer jacket for maximum flexibility and durability.
- Steel inner casing that is tightly coiled for low compression.
- A pre-lubricated nylon inner sleeve guarantees smooth operation and long life.
- All wire ends are bird caged prior to terminal casting for superior pull-out resistance.
- EPDM molded rubber components for high UV resistance and long life.
- Injected molded components are manufactured from high strength POM material.

FOOT NOTES (FN)

006
Built before 2/10/99

009
Use with stock carb(s) requires carb cap(s) (01-0023) & adjuster(s) (01-0013). Eliminates TORS system & stock carb cap(s). Requires idle kit (08-0045) when used with stock carb(s) (sold separately). Warning - Disables the T.O.R.S. system and will not shut down engine in case throttle sticks open. A stuck throttle could result in uncontrolled acceleration and great bodily injury or death. This product is intended for closed course racing by expert riders only. Improper installation could result in great bodily injury or death. User assumes all responsibility for proper installation and use of this product.

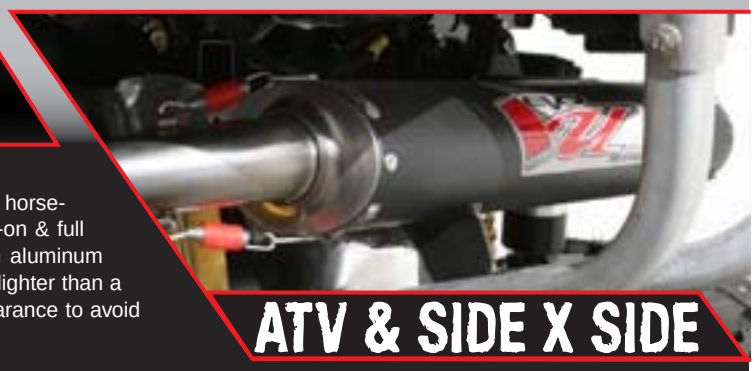
EXHAUST

EVO RACE SERIES

The Big Gun EVO Racing Series was designed to deliver maximum horsepower & torque gains throughout the RPM range. Made from .049 stainless steel tubing & an aluminum muffler canister, the EVO exhaust system is much lighter than stock units. Our sleek muffler design also allows for maximum clearance to avoid your exhaust from hitting the rear brake caliper.

EVO UTILITY SERIES

The Big Gun EVO Utility Series was designed to deliver raw horse-power & torque gains for utility ATVs & UTVs. All Utility slip-on & full systems are made from .049 stainless steel tubing and an aluminum muffler canister, the Big Gun Utility exhaust system is much lighter than a stock unit. Our sleek muffler design allows for maximum clearance to avoid collisions with the rear brake caliper.



EVO MINI SERIES

The Big Gun EVO Racing Series was designed to deliver maximum horsepower & torque gains throughout the RPM range. Made from .049 stainless steel tubing & an aluminum muffler canister, the EVO exhaust system is much lighter than stock units. Our sleek muffler design also allows for maximum clearance to avoid your exhaust from hitting the rear brake caliper.

ECO SERIES

The Big Gun ECO Series was designed with a few things in mind, performance, power, sound & craftsmanship. We guarantee that the ECO Series delivers these things all without hurting your wallet. Made for most popular dirtbike models, the ECO Series is made from .049 stainless steel tubing and a 6061 brushed aluminum muffler canister. All ECO Series Exhausts are slip-on systems only.

EXO SERIES

ATV & SIDE X SIDE

Introducing the NEW Big Gun EXO Series exhaust. As the Side x Side and ATV industries continue to expand, we realized the need for something bigger and better. The EXO series is our ground up approach at building an exhaust that could handle the huge demands of the larger, more powerful motors. The unique hexagon shaped muffler and coned inlet of the EXO series allow for significantly more volume, reducing overall sound output and decreased heat. The EXO Series is our largest, most durable, and most powerful exhaust yet.

- Light weight brushed aluminum muffler
- Hexagon shaped large diameter for more volume
- Internal sound wave altering technology
- Stamped 304 stainless steel coned inlet for more volume
- TIG welded reinforced muffler bracket
- 304 stainless steel mid pipe / head pipe
- Black powder coated stainless steel end tip
- Significant horsepower and torque gains
- Removable screen-type spark arrestor included
- Handmade in the USA

Two Brothers Racing
M-7 ATV/UTV EXHAUST CANISTERS

› Our new M-7 V.A.L.E.™ exhaust systems feature our exclusive Teflon coated, blunted, cast magnesium outlet and our exclusive X-Lite™ retaining ring. These exclusive Two Brother Racing features not only look great, but also significantly reduce the weight of the exhaust system.

› The V.A.L.E.™ inlet design eliminates the use of springs and creates an adjustable mount that is rock solid when fixed in place. The system also features a precision mandrel bent, thinwall s-bend tube, and for a full system, a header pipe custom fit for each model.

› **The P4 PowerTip™** was developed to fill the gap between the P1 and P1-X sound reducing tips. The P4 is more restrictive than our P1-X but quieter than the P1, reducing sound output between 5-6 dB on most pipes. Power loss is minimal. Not recommended for use with a spark arrestor screen.

› Like all of our other sound suppressors, the P4 is very easy to install - simply unbolt your existing M-7 endcap, drop in the P4 and reassemble. **Note: The P4 is only intended for use with our M series outlets.**

› Our **P1 PowerTip™** sound suppressor is a recommended accessory for our exhaust systems with M series endcaps. A straight-through sound diffuser, the TBR PowerTip™ quiets the pipe to about 3-4 dB with no significant reduction in horsepower. Not recommended for use with a spark arrestor screen.

› **Easy to install** - simply unbolt your existing M series endcap, drop in the P1 and reassemble.
Note: The P1 is only intended for use with our M series outlets.

› **The P1X PowerTip™** sound suppressor is a recommended accessory for our exhaust systems with M series endcaps. A straight-through sound diffuser, the TBR PowerTip™ quiets the pipe to about 7-8 dB with no significant reduction in horsepower. Not recommended for use with a spark arrestor screen.

› Like all of our other sound suppressors, the P1X is very easy to install - simply unbolt your existing M-7 endcap, drop in the P1X and reassemble.
Note: The P4 is only intended for use with our M series outlets.

› U.S. Forestry Service approved Spark Arrestors are included with all aluminum M-7 V.A.L.E.™ off-road slip-on exhaust systems. These tips mute the exhaust tone slightly with absolutely no loss of horsepower. Additionally these tips prevent the introduction of foreign matter into the exhaust system. This spark arrestor DOES NOT fit, nor is it intended to be used with the C2, C4 or C5 mufflers.

NAMURA TECHNOLOGIES INC.
PISTONS WITH AN ATTITUDE

NAMURA ATV PISTON & GASKET SETS

- All Namura Pistons have Molybdenium/Teflon skirt coatings that minimize resistance and wear to provide extended life
- All Namura Pistons have anodized domes that provide superior heat resistance and extended life span
- All Namura Pistons have super-high silicone content for additional strength
- All Namura Pistons have premium world class rings produced by the largest Japanese OEM supplier in the world
- Rings will fit OEM pistons
- Namura Top End Repair Kits include pistons, rings and top end gasket sets
- Namura Top End Gasket Sets are precision cut Klingersil coated steel head gaskets for better sealing and high-temperature resistance

PISTON KITS

MOS2 (Teflon/Molybdenum) Coated Skirts
A rolled on application process provides a bond that is 10 times stronger than other spray on coatings. Benefits include increased heat transfer, reduced friction and helping to eliminate cold seizures.

Machined Smooth Heads
Reflects combustion heat and reduces carbon buildup, protecting the top of the piston. Some tests have shown this feature can increase horse power and fuel economy by up to 6%

Anodized Domes
Increases heat resistance and durability; pistons with anodized domes are 75% stronger than non-anodized pistons

Hypereutectic Casting Process
Provides higher silicon content for reduced expansion rates and additional wear resistance; it also has an ability to withstand higher cylinder temperatures

GASKET KITS

Designed and produced using performance materials to provide greater reliability and durability to withstand the needs of today's hardest working engines.

TOP END REPAIR KITS

Provides you with all the necessary components to complete your rebuild: these include a Top-End Gasket Set, Pistons, Rings, Wrist Pins, Circlips and Silver Coated SCM415 High Strength Chromoly Needle Bearings where needed.

PROX RACING PARTS

Piston Kits

PROX pistons are precision machined on the latest, state of the art CNC equipment. The same low-expansion, low-friction piston alloy is used as is used for all major Japanese engine manufacturers. PROX Piston Kits are a first class solution to replace the original piston in your Motorcycle, Scooter, Moped, ATV, Personal Watercraft, etc. PROX Piston Kits for sleeved cylinders are available in standard size and a wide range of oversizes. The availability of oversizes up to 2mm significantly helps to increase the lifespan of a cylinder by offering more re-boring possibilities. PROX pistons for plated cylinders come in standard size, as well as in A, B, C, D+ oversizes. Take advantage of the additional oversizes to extend the lifespan of plated cylinders. All PROX Piston Kits are supplied complete with Piston Rings, Wrist Pin and Circlips, ready to install!

Connecting Rods

PROX Connecting Rod Kits are made out of the toughest alloys available today. O.E. specifications and tolerances are meticulously maintained, a guarantee for easy installation and trouble free performance. PROX Connecting Rod Kits come complete with Crankpin, Big-End Bearing, Small End Bearing and Washers.

Gasket Kits

Precision engineering and the use of first class materials guarantee that they meet or exceed O.E. standards.

Wiseco Performance Products

FORGED POWERSPORTS PISTONS

Powersports Forged Piston Advantage

Wiseco leads the performance aftermarket by producing the highest quality forged pistons for Dirt Bikes, ATV's, Snowmobiles, Outboard Marine, and Motorcycles right here in the USA. Wiseco is unique because we forge all of our own pistons in house, and produce all of our own forge tooling right here in the USA. This allows us to control all aspects of our manufacturing process from raw bar to skirt coating finished parts.

In addition, in-house dyno testing gives Wiseco the ability to develop state-of-the-art technology such as new shapes, coatings, and components, and lead the industry through rigorous R&D. Linking all segments of Wiseco's organization through design, testing, manufacturing, and distribution allows us to fulfill market needs with minimum lead-times.

Piston Engineering / ArmorGlide Coating

Wiseco ArmorGlide™

Some of our forged pistons offer our new ArmorGlide™ skirt coating, which is the result of testing, development, and benchmarking through Wiseco's rigorous in-house dyno program. The outcome is the ultimate in skirt coating toughness, lubrication, and bond technology working together to minimize friction, maximize horsepower, and provide improved wear resistance. Not only is ArmorGlide™ a high-tech lubricant that reduces friction, but it also allows the piston to be fitted tighter within the bore allowing a better ring seal and reduced noise from piston rock.

Top End Piston Kits

Wiseco's complete top end Piston Kits are offered for nearly every popular application in the powersports market. These kits contain everything you need to complete your rebuild the right way, the first time. High quality parts specifically chosen by us to match our forged pistons are included in this kit for easy one stop shopping.

- 4-stroke kits feature a 'race-ready' dome finish with smooth edges for improved combustion flow. Horizontal slot-pin oiling reduces friction and provides scuff resistance, along with a pressure seal groove for maximum ring seal.
- Most PK/SK/WK/VT kits from Wiseco feature a complete top end gasket kit that gives you everything you need to complete your rebuild from premium materials.
- 4-stroke race applications feature Wiseco's ArmorGlide™ skirt coating to provide reduced friction and noise to contribute to increased horsepower.
- Dedicated forgings used for superior strength to weight ratio utilizing aerospace alloy.
- High Performance ring kit and alloy pin included with each piston kit for extended life and sustained power.

WISECO

REPLACEMENT RINGS

Some Wiseco 4-Cycle ATV pistons have been manufactured with more than one ring type. The correct replacement ring style is stamped on the dome of the piston. EXAMPLE: 4419PS will be stamped with either a "C" or a "G" to indicate the correct replacement ring style to order. **ONLY WISECO REPLACEMENT RING SETS CAN BE USED ON WISECO PISTONS**.

2-CYCLE RINGS - MOTORCYCLE & ATV

All Wiseco 2-Cycle pistons are supplied with rings and circlips. Only Wiseco replacement ring sets can be used on Wiseco pistons. The replacement ring type and bore size (in millimeters) is stamped on the dome of the piston. Refer to this information to reorder correct replacement rings. Ring styles cannot be interchanged.

4-CYCLE RINGS - MOTORCYCLE AND ATV APPLICATIONS

All Wiseco 4-Cycle pistons are supplied with rings, wrist pins and circlips. Only Wiseco replacement ring sets can be used on Wiseco pistons. The replacement ring type and bore size (in millimeters) is stamped on the dome of the piston. Refer to this information to reorder correct replacement rings. Ring styles cannot be interchanged.

Manufactured in Italy, Vertex, the premier brand of OEM replacement pistons, is the OEM supplier to KTM and numerous European motorcycle and go-kart manufacturers. Vertex offers enthusiasts state-of-the-art, high-quality pistons for nearly any powersport use from motorcycles and ATVs to marine and karting. Manufactured to the highest standards in Japan, Vertex's piston rings are produced by the OEM suppliers so that they are direct OEM replacements. Vertex is the choice of those who truly seek the optimum in powersport performance in any application

VERTEX PISTON TYPES

- Replica: cast OE replica
- Race: unique cast GP style with only one compression ring
- Pro: forged replacement for a OE cast piston for better strength
- Replica BB: big bore stock compression cast piston
- Pro Replica: forged OE stock compression piston
- Pro BB: forged OE stock compression big bore piston
- Pro Race: unique forged GP style race piston with only one compression ring
- Pro HC: forged high compression pistons

CYLINDER WORKS CYLINDER KITS

As an alternative to costly OEM cylinders or the time consuming process of re-plating existing cylinders, Cylinder Works offers enthusiasts access to a complete line of OEM quality dirt bike and ATV replacement cylinders and cylinder kits. In addition to standard bore, stock compression replacement cylinder kits, Cylinder Works also turns up the horsepower with a full line of high-compression and big bore cylinder kits that look just like stock. Each kit comes complete with piston, rings and gaskets to get back on the trail quickly.

Cylinder Works OEM Replacement Cylinders and Cylinder Kits (standard bore/stock compression)
Re-plating or repairing an OEM cylinder takes time, And replacing an OEM cylinder with another OEM cylinder takes money - plenty of it. But Cylinder Works has a better answer: Get new now, get Cylinder Works!

Each Cylinder Works replacement cylinder is:
Stock in appearance • Precision hones • Nickel silicon carbide plated • OEM quality without the OEM price.

Cylinder Works replacement cylinder kits also contain:
Gaskets and seals needed for installation • Hand fitted, premium quality Vertex piston kit complete with piston rings, wrist pin and circlips.

Cylinder Works High-Compression Kits (standard bore/high compression)
As we all know, higher compression equals more horsepower and that's exactly what Cylinder Works high compression cylinder kits provide. Just like out OEM replacement cylinders, our high compression cylinder kits look like stock, but they're not. In addition to their stock appearance, Cylinder Works high compression cylinder kits also feature precision honing, nickel silicon carbide plating and a price that's hard to beat.

With the exception of a mechanic, the Cylinder Works big bore kits provide everything you need to transform a bike or ATV from modest to monster in one box.

In addition to the stock appearance, nickel silicon carbide plated, precision honed, big bore cylinder, each kit contains:
All needed gaskets and seals to complete the installation • A Vertex big bore piston, complete with piston rings, wrist pin and circlips.

VALVE TRAIN & CAMSHAFTS

Wiseco's new Valve Train components are the next great products available to maximize the performance of your highly stressed racing engine!

Each new product is made from premium materials for maximum strength and durability, and exceed OEM tolerances and specifications.

Rigorous in-house engineering and testing ensures each product bearing Wiseco's name lives up to the highest standards in quality and performance!

CAMSHAFTS

Wiseco cams produce great torque and horse power gains. Each cam is rigorously tested to produce real "seat of the pants" power increases.

- Produces a camshaft that is tougher and stronger than cast iron cams. Requires no core exchange.
- Reduces friction on the cam buckets and reduces galling at high RPM's.
- Optimizes the valve timing and closes the valves with the perfect deceleration profile. This eliminates valve bounce and reduces premature valve failure.
- Installs using OEM components. No extra parts or special setup required.

VALVES

Manufactured to the highest quality standards and specifications. Exceed OEM standards.

- Just like our pistons, forged valves offer higher strength and fatigue properties due to the 1-piece construction.
- Offers superb surface hardness and wear resistance.

CAM CHAINS

- Manufactured to the highest quality standards and specifications. Exceed OEM standards.

HOT CAMS CAMSHAFTS

As the leader in innovation, design and development of aftermarket dirt bike and ATV high-performance camshafts, a set of Hot Cams is certain to give the added boost that dirt bike and ATV enthusiasts are looking for. CNC crafted from billet steel and with multiple stages to choose from for many applications, Hot Cams delivers the performance and feel of a custom cam for a fraction of the price. Ease of installation is also a big benefit when it comes to Hot Cams, as nearly all cams require no additional machine work and utilize the stock valve springs. And, as has always been the policy at Hot Cams, you can keep your original cams since a core exchange is never required

MUDBUSTER CAMS
Hot Cams Products, Inc. makes cams for many play bikes and for many utility ATVs with our Mudbuster line. With a Mudbuster cam, utility 4x4 ATVs will enhance the low-end engine performance, with no top-end performance loss. Honda Rubicon, Rincon, Prairie 650 & 700, Grizzly 660, and Polaris Sportsman 700 are just some of the Mudbuster cams.

CAMSHAFTS STAGE 1
This camshaft boosts horsepower substantially in the mid-range and perks up throttle response. Package includes bearings, thus, utilizes the O.E.M. sprocket and auto-decompression mechanism and does not need spring change or head adjustment. Required valve modification and jetting is minimal and similar with all the other Hot Cams products, this camshaft is built out of all new billet materials. In short terms, customer nee not have to replace a core.

- Single-cam motor. Excellent midrange and top-end power increase. Uses stock valve springs and rockers. *Does not use auto-decompression mechanism.

CAMSHAFTS STAGE 2
This high-performance camshaft increases horsepower considerably from mid-range to top-end and enhances over-rev. It comes complete with bearings, utilizes the O.E.M. sprocket, and requires no spring change or head modification. Required valve adjustment and jetting is minimal as well. This camshaft is made of all new billet materials. The customer does not have to exchange a thing.

- Single-cam motor. More top-end power than Stage 1 with midrange gain. Uses stock valve springs and rockers. *Does not use auto-decompression mechanism.

CAMSHAFTS STAGE 3
This high-performance camshaft increases top-end horsepower and over-rev substantially over the Stage 2 and is ideal for Supermoto, desert, big-bore and stroker applications. It is available in a complete package with bearings. It utilizes the O.E.M. sprocket and does not demand any spring change or head modification. Created out of all new billet materials, it does not require valve adjustment and jetting is at minimum. Similar with other camshafts, there's no need to alter anything.

BLACK DIAMOND VALVES

All KPMI® Black Diamond™ Stainless steel valves are impregnated by a special German process to a depth of .002, with a surface build up of .0002. This Black Diamond process improves wear properties, reduces friction, and provides resistance to corrosion and wear that is superior to chrome and nickel electrolysis plating. Each valve is designed using Finite Element Analysis software, and profiles are tested on our computerized flow bench. Black Diamond™ Valves are lightweight, strong, one piece forgings with profiles that provide excellent flow characteristics.

LIGHTWEIGHT RACING VALVE SPRING KITS

- Kibblewhite uses only the highest quality materials for the valve springs and are precisely machined for the best possible fit and durability for your motorcycle or ATV.
- Kibblewhite valve springs come complete with lightweight racing titanium retainers, chrome silicon springs, steel collars, and keepers as required for one engine.
- The Kibblewhite valve spring kit is easy to install and helps reduces valve float in the high revving engines, adding durability and reliability to the engine.

VALVE GUIDES

We choose to use the copper based C63000 nickel-aluminum bronze as a material to make our bronze valve guides because of its ideal characteristics for the application. The 5% nickel content provides superior resistance to wear, and the approximately 80 percent copper content delivers outstanding heat conductivity. KPMI® guide profiles are designed to have minimal effect on the airstream while maintaining critical cross sectional thickness in high temperature areas, which promotes high performance and endurance.

PRO X ENGINE VALVES

PROX Valves are made in Europe to high quality standards. By using a forged one-piece titanium alloy with several integrated material micro structures, specific and different material properties are created in area's where needed. The high tech Ti3Al alloy has also very good material properties at high temperatures. The special coating creates considerably lower friction between the valve and other parts like valve guides. Therefore the PROX valves exceed OE specifications in dimensions and reliability.

BRONCO ATV ENGINE VALVES

- OFFERING OEM REPLACEMENT AND HIGH PERFORMANCE STAINLESS STEEL VALVES
- SOLD INDIVIDUALLY
- OEM VALVES MEET OR EXCEED OEM QUALITY. COME IN (SUH35HT) STAINLESS STEEL FOR EXHAUST & (SUH3) STEEL FOR INTAKE VALVES.
- PERFORMANCE VALVES FEATURE FORGED ONE-PIECE CONSTRUCTION, NITRIDE COATING, MODIFIED RADIUS, SWIRL POLISH, CHROMED STEMS, AND STELLITE TIPS. EXTREMELY LONG LASTING, REDUCED FRICTION FOR QUICKER AND HIGHER REVS

BOTTOM END REBUILD KITS

FORGED BOTTOM END ADVANTAGE

The foundation of any bottom end rebuild is a solid forged crankshaft assembly, which provides strength and reliability far surpassing any cast part that lacks consistency. Forged crankshafts due to their lighter weight, more compact dimensions and better inherent dampening, rev higher and run smoother than their cast counterparts.

This part of the engine has a huge amount of stress due to twisting and bending 1000's of times a minute while running under load, you don't want an inferior product here to ruin a motor. Wiseco engineers have designed our crankshafts to meet or often exceed OEM tolerances giving you the best base for your bottom end.

CRANKSHAFTS / CONNECTING RODS

Wiseco powersports crankshafts feature a double forged connecting rod made from dedicated forgings. The rods maintain superior strength, durability, and dimensional consistency through improved grain flow. Shot peening eliminates residual stress and oil slots are located to maximize lower rod oiling and extend bearing life.

Coated bronze thrust washers have a dimpled design to increase oil retention and reduces stress between the connecting rod, washer, and crank web. Double-drilled small ends provide the piston pin with extra lubrication and cooling, reducing distortion of top end due to thermal transfer from the piston.

Wiseco has designed these crankshafts and connecting rods to work together with our pistons to provide the smoothest rotating assembly possible. Having a complete bottom end that is made of 100% forged material will give you the piece of mind that your motor will be able to withstand any abuse within reason.

Professional racers as well as weekend riders choose these solid kits to reduce failure rates and take advantage of the horsepower and immediate torque a light weight bottom end can deliver.

BOTTOM END KIT FEATURES

- Each kit contains everything you need to complete your rebuild the right way, the first time- crankshaft and connecting rod, all applicable bearings, and complete bottom end gasket kit made to meet or exceed OEM.
- Wiseco connecting rods are double forged from a dedicated forging and feature shot peening, oil slots, and coated bronze thrust washers.
- Bottom end gasket kits are made from premium materials, exceeding OEM standards, to provide exceptional seal between critical mating surfaces.
- Main bearings are manufactured to the highest quality standards. Each is case hardened for maximum life and smooth operation at high RPM's.
- Corrosion resistant surface treatment to prevent corrosion and pitting over long term use or storage. This will add to the life as well the strength of the assembly.
- Top end of rod is bushed for oil retention and eliminates pin galling. The bottom end rod bores are case hardened to 58-62 RC to optimize bearing running surface.
- The crank pin bearings are manufactured from the highest quality, hot rolled steel case hardened to 58-62 RC to extend the lifetime of the assembly.
- Caged needle roller bearings to provide the highest possible RPM.

HOT RODS CRANKSHAFTS

Hot Rods crankshafts are regarded as the premier alternative to costly manufacturer cranks. But, in addition to being a cost effective alternative, Hot Rods crankshafts also bring a level of uncompromising quality, design and innovation not seen in its competitors. One such innovation would be the Hot Rods line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance, but do so without costly case machining, custom cam chains and spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

HEAVY DUTY DROP-IN STROKER CRANKSHAFTS

In addition to Hot Rods heavy duty OEM replacement crankshafts, Hot Rods also offers a full line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance and increased displacement, but do so without costly case machining, custom cam chains or spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

Additional Hot Rods stroker crankshaft features:

- All stroker crankshafts are sold complete and ready for installation with the original proven Hot Rods connecting rods, top end bearings and crankshaft webs
- Factory assembled and trued

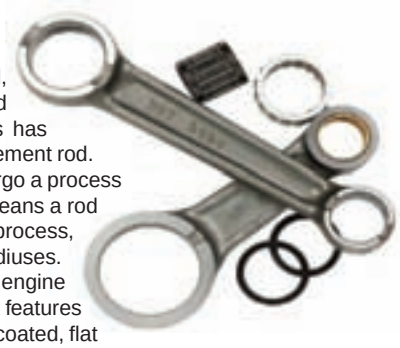
CONNECTING RODS



One single connecting rod is where it all began for Hot Rods and, now, with over a decade of experience, continuously improved designs and an ever expanding line of applications; Hot Rods has continued to be, not only "The Original" aftermarket replacement rod, but the best aftermarket replacement rod. All of our rods are created from 8620 case hardened steel. But, in addition to that, our rods also undergo a process of double forging which helps to improve grain flow as well as dimensional consistency — and that means a rod of uncompromising strength. To improve fatigue durability, all of our rods are also shot peened. This process, utilizing a stainless steel shot, helps to remove stress risers and creates more smoothly blended radiuses. And, in the end, a Hot Rods connecting rod is one of the most durable rods that enthusiasts and engine builders can buy. However, a rod is only as good as its supporting parts and that's why a Hot Rods kit features only the most advanced and durable bearings, crank pins and thrust washers. Case hardened, silver coated, flat profile KU bearings are used throughout our entire line and high-quality, long shouldered KZ bearings are used in our two-stroke wrist pin bearing applications. In short, our bearings are just as tough and reliable as our rods. Even our crank pins are subjected to the same rigorous standards as our rods and bearings. Each Hot Rods crank pin is created from hot-rolled ASTM 4115 steel and case-hardened to a level of 58–62 Rc.

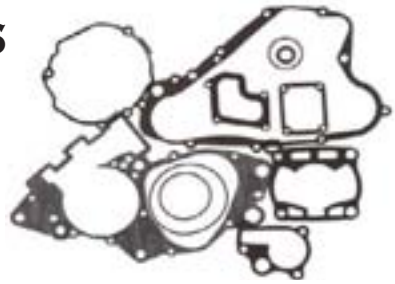
COMETIC ENGINE GASKETS



- The highest quality gaskets available
- Cometic gaskets are constructed from spring steel or graphite
- Spring steel gaskets are made from a stainless steel shim design coated with a .0001" thickness of silicone on both sides
- Graphite material is impervious to fuels, coolants and oils
- Engine case rebuild gasket kits include all gaskets needed for a lower end rebuild (base gasket not included)

FUEL & INTAKE

HIFLOFILTRO®
PREMIUM FILTERS

WHY HIFLO?

Providing unbeatable performance and exceptional value, Hiflofiltro is the best-selling brand of aftermarket filters for motorcycles, scooters, and ATVs worldwide. The filters are also supplied to original equipment manufacturers as well as private label brands.

Materials
To achieve our quality aims and to ensure the consistency of our products, we use only premium materials from well known manufacturers: steel from Toyota Tsusho and NKK Japan, glue from Henkel Germany, filter paper from Ahlstrom Filtration Finland, Hollingsworth & Vose USA and Awa Paper Japan.

Production
The Hiflofiltro-Thai Yang Kitpaisan factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963. With the experience of more than four decades, continuous research and development and modern production facilities, we manufacture some of the best quality filters in the world.

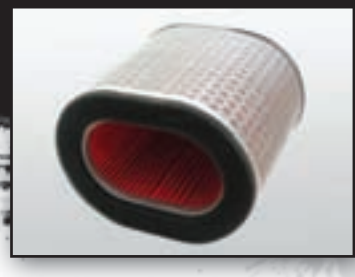
Quality Control
Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory. The whole manufacturing process, including the checking of raw materials, individual filter testing, is regularly audited and verified independently by TÜV SÜD.

PREMIUM OIL FILTERS

Hiflofiltro is the world's first TÜV approved oil filter. Constructed using the best materials available, all Hiflofiltro oil filters meet or exceed original equipment performance levels.

OE REPLACEMENT AIR FILTERS

Hiflofiltro air filters are manufactured to fit the factory air box and are a direct replacement for original equipment filters. Top quality powerflow filtering media, developed for modern high performance engines.



DUAL-STAGE RACING FOAM AIR FILTERS

Competition off-road air filters manufactured in the Netherlands using a special dual-layer foam, formulated for maximum filtration and optimum air flow for improved power. Top quality materials and superior construction allow the filter to be used over and over again without any loss of performance.

K&N DIRECT MOUNT FILTERS

Remove your airbox and mount this filter directly to your factory carburetor.

FILTER CHARGER OIL

K&N Air Filter Oil is the only oil specially formulated to work in combination with the cotton fabric in K&N Filtercharger elements providing a superior air filtration system. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric. Saturation is maintained until the element is cleaned with K&N Air Filter Cleaner.

AIR FILTER CLEANER & DEGREASER

NOTE: Do not use on polished or anodized aluminum.

K&N Air Filter Cleaner is the only cleaner formulated to clean K&N Filtercharger elements. K&N Cleaner works to dissolve the dirt build up and old filter oil, and can be washed away with water. It is biodegradable and safe on paint, chrome, cast aluminum, plastic, rubber and vinyl when used as directed.

FACTORY REPLACEMENT UNI AIR FILTERS - ATV

The principal of how foam air filters work is simple: "open cell" polyurethane foam is wetted with specially developed filter oil. The "sticky" filter oil is suspended in the path of the dirty air on the strands of the web-like cell structure of the foam. This makes it impossible for dirt to pass through the depth of the filter without sticking to the strands. As the outer strands become loaded with dirt particles, the wetted strands down stream start trapping dirt, allowing the entire thickness to be utilized. This prevents surface loading or air restriction for 80% of the surface life of the air filter element. When the filter is sufficiently dirty it can be easily washed, re-oiled and re-used.

FILTER CLEANER

KL608 7.95 B

Improves air flow and performance • Cleans fabric and foam air filters • Cleans oil, dust, dirt and sand from filters • Rinses clean with water • Environmentally safe formula • 16 oz.

FOAM FILTER OIL

KL606 8.95 B

Improves air flow • Traps dust, dirt and sand • Filters out micron sized particles • Blocks out moisture and water • Waterproof formula will not clog • Klotz red color for easy application • Environmentally safe formula • 15.25 oz.

FABRIC FILTER OIL

KL607 8.50 B

Improves air flow • Filters out micron sized particles • Traps dust, dirt and sand • Quickly penetrates and will not run off • Moisture resistant formula • Easy application • Environmentally safe formula • 16 oz.

MOTION PRO OIL FILTER MAGNETS

- Easy to install, just attach to base of standard oil filter
- Standard oil filters only trap particles down to 20 microns, leaving the most harmful 5 to 20 micron particles to circulate through your engine
- This powerful six point magnet traps harmful, abrasive hard metal particles down to 1 micron that regular oil filters don't
- Must have item during engine break in
- No gimmick, these things really work to reduce wear, and significantly increase engine life
- Available in two sizes to fit most spin on or cartridge oil filters
- Makes any oil filter better than a high performance oil filter
- Reusable for up to 5 oil filter changes

BOYESEN ATV PRO SERIES REEDS

Q: What advantage do Pro Series Reeds have over Power Reeds?
A: Pro Series dual-stage reeds combine a carbon-fiber top reed with a fiberglass bottom reed for unrivaled performance. The Pro Series Reeds are more responsive than our traditional Power Reeds. The carbon-fiber top reed has excellent response characteristics that provide even quicker acceleration, stronger throttle response, and more over-rev than our standard Power Reeds. The fiberglass bottom reed provides stability and longer reed life.

THE VFORCE4 REED VALVE SYSTEM

The all-new VForce4 is built upon the solid foundation that has made the VForce3 such a success for the last 10 years. While the VForce3 has been continually refined over the years, this is a complete redesign of the entire system. While the most obvious change on the all-new VForce4 is certainly the full-length reed stops, let's take a look at some of the other significant changes as well.

- All-new reed petal resin system, carbon fiber and lay-up
- Pre-curved reed petal ensures better seal at tip
- Wider reed cage for maximum airflow
- Combined reed tip area increased by 10.5% resulting in increased total air flow
- Airfoil shape added to cage tip to increase air velocity from outer ports
- Long reed stops added to progressively slow petal tip velocity, for increased petal durability
- Reduced frontal area of central wing by 15.6% combined with a more aerodynamic shape

The TMX features a flat slide design in a smooth bore Venturi to provide improved throttle response and wider powerband. The float system with independently moving floats, working with a main jet enclosed in a baffle chamber, allows the TMX to perform smoothly without hesitation on the roughest terrain. TMX Series Carburetors are available in 35mm bore sizes for 125cc race engines, and in 38mm bore sizes for use in 250cc race engines.

Mikuni TMX Series Carburetors are intended for off-road riding and racing use only. Not legal for sale or use in California or other locations where similar pollution laws may apply.

POWER JET KIT

Power Jet Kits are used in two-stroke engine applications to improve midrange throttle response and add additional fuel to wide open throttle running conditions, especially with snowmobile clutches. Kits may be installed easily on Mikuni TM and VM Series carburetors.

The Jet Needle controls the fuel mixture in the mid-range 1/4-3/4 throttle position. The taper of the needle determines the amount of the fuel. For example: the thinner the diameter of the needle, the more fuel will be drawn. The thicker the diameter of the needle, the less fuel can be drawn.

MIKUNI

CARBURETOR PARTS & ACCESSORIES

MIKUNI NEEDLE JET • PRIMARY TYPE

The needle jet is the main fuel passage to the main bore of the Mikuni carburetor. Depending on the inside diameter of a specific needle jet, this will also affect the function of the needle. Therefore, needle jets and needles act together as the main system in controlling the amount and mixture of the fuel which is drawn in mid-range 1/4-3/4 throttle operation.

MIKUNI

CARBURETOR PARTS & ACCESSORIES

MIKUNI NEEDLE JET • BLEEDER TYPE

The needle jet is the main fuel passage to the main bore of the Mikuni carburetor. Depending on the inside diameter of a specific needle jet, this will also affect the function of the needle. Therefore, needle jets and needles act together as the main system in controlling the amount and mixture of the fuel which is drawn in mid-range 1/4-3/4 throttle operation.

THROTTLE VALVES

To determine a left hand or right hand throttle valve you must look at it from the intake side (cutaway facing you) to see what side your idle adjustment is on. If it is on the left side, it is a LH throttle valve and if it is on the right side it is a RH throttle valve.

MIKUNI CARBURETOR TOOL KIT

LP15866 14.95 L

* All machines to be converted must have an external crankcase impulse line to operate the Mikuni Fuel Pump. This is a universal kit containing all of the major components necessary to convert to Mikuni Carburetion. Because of the variety of machines that used the Tillotson and Mikuni carburetors, this is not a bolt on direct replacement kit. Jetting, fuel pump installation, cable installation to controls, fuel and impulse line installation are all part of the dealer's custom installation.

A BETTER FUEL FILTER FOR ALL GAS-POWERED ENGINES

What is Visu-filter®?

A highly reliable fuel filter system so unique that Visu-filter® signals the need for replacement in motorcycles, lawn tractors, snowmobiles, jet skis, rototillers, air compressors, and more! The strong, high-impact nylon housing is extremely transparent for immediate viewing. Many styles and sizes available. Wide selections of filter media such as polymer-treated paper with automotive specifications, stainless steel screens and polyester screens.

- Protects engine from harmful contaminants
- No leak, high impact nylon construction
- Functions as a reservoir for trapping water
- Cleaner burning engine, less emission and less smoke
- Better throttle response; improvement in engine performance
- Some increase in power and fuel efficiency

K&L AIR CUT OFF VALVES

Here's an inexpensive alternative to the costly OEM assembly. To prevent "afterburn" generated by a lean fuel mixture when closing the throttle, the air cut-off valve temporarily closes the slow-jet air passage, creating an instantly richer mixture. Included in these high quality kits are all parts necessary for a complete rebuild (diaphragm, spring and o-ring). Made in Japan.

K&L CARBURETOR REPAIR KITS

Each kit contains all necessary gaskets, o-rings, float valve assembly or float needle and jets to rebuild one OEM carburetor body. Made in Japan. Carb repair kits with an asterisk (*) have no needle jet, jet needle, main jets or pilot jets in kit. **IMPORTANT NOTE:** Many kits have multiple applications - the jets and jet needles provided may not be the right sizes for your application. ***Always check and verify all jet sizes before installation. Note: Kit 721107 does not include Float Needle or Float Valve Assembly.***

MR. FUNNEL

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel by Mr. Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

What Model Do I Need?

The Mr. Funnel Fuel Filter comes in four different fast-flow models (See below). Models differ mainly on flow rate. If your need is to transfer five gallons or less of fuel, then the F1 and F3 are for you. If you are transferring more then 5 gallons, then the F8 and F15 are right for you. Our F15 is our fastest flow model at up to 15 gallons per minute! This model can also be used at a fuel pump. Get your Mr. Funnel Fuel Filter today, and keep your engine running smooth!

A range of high performance, compact and lightweight batteries designed to provide maximum power from minimum space. Designed to meet the increasing demands of today's high performance machines the Yuasa YTZ range are the only powersports battery in the world to incorporate expanded plate technology. Smaller, lighter and more volume efficient, Yuasa YTZ batteries provide greater starting power from minimum space. Factory sealed and activated they are completely spill proof enabling multi-angle fitment, never require topping off and are maintenance free for the life of the battery.

- Up to 80% more starting power per Kg
- Maximum power – minimum space
- Reduced self discharge for longer life

MAINTENANCE FREE

Absorbed Glass Mat (AGM) Technology is an advanced battery design used in Yuasa's Maintenance Free Batteries that eliminates water loss. Once it's filled with acid the battery is permanently sealed - so you'll never need to fill it with water or check the acid level.

Long Life
Because of its lead calcium design, the AGM battery will hold its specific gravity more than three times longer than conventional lead antimony types. This means much longer periods between charges when the battery is used in a standby mode, like winter storage.
And to remain factory-fresh the AGM battery is shipped dry along with its own pack of high-gravity acid that's added at the time of installation.

Sealed, Non-spillable
Once filled with acid from its special packs, the AGM battery is virtually maintenance free. It's totally sealed and all of the acid is absorbed in the special plates and separators, so there is no need to worry about acid leaks on valuable vehicle parts and accessories.

Selected types also available in Factory Activated (filled, sealed and charged at the factory).

YUMICRON CX

The YuMicron CX was the first small engine starting battery to use "lead calcium" technology. This special technology means the YuMicron CX generates more power, requires less maintenance, and lasts longer than any other conventional battery.

More Power
Because of its unique design, the CX will generate 5% to 8% more cold cranking amperage than our own high-output YuMicron lead-antimony battery. For high compression machines, this means greater reserve capacity and more starting power.

Less Maintenance
The YuMicron CX lead calcium technology also reduces water loss, so the CX requires servicing (water filling) only about one-eighth as often as ordinary lead-antimony types.

Longer Life
The YuMicron CX holds its specific gravity more than three times as long as lead-antimony type batteries resulting in a longer shelf life. This feature means longer periods between charges, especially during winter months.

Yuasa Yumicron/Yumicron CX Batteries are shipped dry with no acid. To order acid for your battery first check the acid volume needed on the Battery Specification Chart then order part # SO-ACID for every 21 oz. needed.

CONVENTIONAL

A workhorse battery engineered to protect against corrosion, withstand vibration and deliver high cranking power.

The industry standard for motorcycles and riding mowers, our Conventional Battery is anything but conventional. This workhorse is for applications requiring operation on uneven surfaces and vibrating environments - even when the weather's dealing its worst. It's the rugged, reliable and dependable battery that customers are looking for!

These features are built into our conventional manifold vented battery - and every battery in the YUASA line:

- Patented separators provide high cranking power
- Through-partition construction delivers maximum power
- Unique sealed posts resist corrosion for longer battery life
- Polypropylene cover and container thwart damage from gas, oil, and impact
- Heat-sealed, bonded unit fabrication protects against seepage and corrosion

POWER SONIC BATTERIES

Tough. Reliable. Whether you ride daily, seasonally, or just on weekends, you'll get more enjoyment out of your motorcycle, ATV, PWC or snowmobile with a Power Sonic battery. Our batteries perform reliably during off-road, over water and cold weather use, and keep their charge even after months of storage. Available in traditional flooded or the new sealed AGH designs, Power Sonic batteries are built to withstand punishing vibration, salt spray, gas and oil, and protect against equipment-damaging spills, corrosion and seepage. And because nothing ruins a weekend faster than a dead battery, we use advanced designs and manufacturing techniques to shorten current paths and reduce resistance, giving you higher cranking power and maximum battery life.

MAINTENANCE FREE HIGH PERFORMANCE

SEALED MAINTENANCE FREE

Once these batteries are put into service, they become a completely sealed unit requiring a lot less maintenance than Conventional Batteries. Although the battery still needs to be charged on a regular basis if your vehicle is not in use, there is no need to monitor the fluid level in this battery type. Unlike the Conventional Battery, once this type battery is sealed, it becomes spill proof, which can eliminate damage from battery acid that can occur from using a flooded battery.

FACTORY ACTIVATED MAINTENANCE FREE

The same convenience and technology as the Sealed Maintenance Free Batteries mentioned above, except this battery is sealed and activated at the time of manufacture. Very convenient to the point that all that needs to be done is put the battery into your vehicle and you are ready to ride. The only downside of this type of battery is that all batteries once activated have a shelf life, and if this battery is not going to be used right away, or be put in a vehicle that is not going to ridden on a regular basis, the battery will need to be kept charged on a battery maintainer.

POWER SONIC BATTERIES

Tough. Reliable. Whether you ride daily, seasonally, or just on weekends, you'll get more enjoyment out of your motorcycle, ATV, PWC or snowmobile with a Power Sonic battery. Our batteries perform reliably during off-road, over water and cold weather use, and keep their charge even after months of storage. Available in traditional flooded or the new sealed AGH designs, Power Sonic batteries are built to withstand punishing vibration, salt spray, gas and oil, and protect against equipment-damaging spills, corrosion and seepage. And because nothing ruins a weekend faster than a dead battery, we use advanced designs and manufacturing techniques to shorten current paths and reduce resistance, giving you higher cranking power and maximum battery life.

MAINTENANCE FREE

SEALED MAINTENANCE FREE

Once these batteries are put into service, they become a completely sealed unit requiring a lot less maintenance than Conventional Batteries. Although the battery still needs to be charged on a regular basis if your vehicle is not in use, there is no need to monitor the fluid level in this battery type. Unlike the Conventional Battery, once this type battery is sealed, it becomes spill proof, which can eliminate damage from battery acid that can occur from using a flooded battery.

FACTORY ACTIVATED MAINTENANCE FREE

The same convenience and technology as the Sealed Maintenance Free Batteries mentioned above, except this battery is sealed and activated at the time of manufacture. Very convenient to the point that all that needs to be done is put the battery into your vehicle and you are ready to ride. The only downside of this type of battery is that all batteries once activated have a shelf life, and if this battery is not going to be used right away, or be put in a vehicle that is not going to ridden on a regular basis, the battery will need to be kept charged on a battery maintainer.

CONVENTIONAL

This type of batteries has flooded electrolyte and is very accessible. These batteries have to be carefully and periodically maintained. The conventional batteries are normally less expensive than the other types mentioned, but with the cost savings come more maintenance. You will need to add distilled water from time to time to prevent the battery from sulfating. Water loss is a normal characteristic of this type of battery because of the high temperature inside, and the process of electrolysis and evaporation. This means the fluid level of the battery needs to be checked on a regular basis. Conventional batteries also tend to discharge more rapidly than AGM type batteries.

Battery Tender Lithium Battery FAQs:

What is the difference between Lithium Ion batteries and Lithium Ion Phosphate batteries?
Lithium-ion batteries are rechargeable batteries that use lithium as one of their active components. Lithium Ion Phosphate Batteries are a type of lithium-ion batteries known for their long life and inherent safety.

How does the “Lead Acid Equivalent” capacity rating compare to Flooded, AGM, and Gel cell battery ratings?
The capacity of lead acid batteries decreases markedly when discharged at high currents such as when starting a vehicle. This effect is much less for a lithium battery. In fact, when discharged at a current equal to its capacity, a 2 A-hour lithium ion phosphate battery will have as much capacity as a 9 A-hour lead acid battery.

Can I use a standard Lead Acid charger/maintainer for my Battery Tender® lithium battery?
As long as the battery charger does not have a desulfation mode and the peak voltage does not exceed 14.8V during the charge cycle it can be used to charge a Battery Tender® Lithium Battery. Of course the best way to charge and maintain a Battery Tender® Lithium Battery is to use a Battery Tender® Lithium Battery Charger.

What is the best way to store my battery long term?
A Battery Tender® Lithium Battery has virtually no self-discharge and has a shelf life of 2 years. The best way to store the battery is disconnected from the vehicle in a clean and dry location with the protective covers installed on the positive terminals.

How do I prevent water damage or corrosion to my battery?
A Battery Tender® Lithium Battery has a waterproof construction however the battery should be kept clean to minimize corrosion. A corrosion inhibitor can also be used on the terminal and connections.

How do Lithium batteries Cold Cranking Amps “CCA” rating compare to Lead Acid batteries?
When talking about lithium batteries used for engine starting the term CCA is used when making comparisons of the cranking ability to that of a lead acid battery in the same application. It is important to select a Battery Tender® Lithium Battery that has a CCA rating that is equal or greater than the lead acid battery it is replacing.

What happens if I hook up my battery charger to the wrong terminals?
If you happen to hook up your battery charger cables in reverse (positive cable to negative terminal and negative cable to positive terminal) then you will potentially damage the battery.

What happens if I hook up my battery to the wrong terminals on my vehicle?
If you incorrectly connect your battery to the wrong cables (positive cable to negative terminal and negative cable to positive terminal) then there is a chance for spark and damage to the battery

VRLA Valve Regulated Lead Acid.
‡‡‡ Includes 10mm spacer for use in replacing YB14A-A1 and YB14A-A2.
S Includes 20mm spacer for use in replacing YB16CL-B.
C Requires use of Yuasa Cover/Spacer Kit part no. 478651
‡ The YTX20 series batteries may be used as an optional upgrade, but some modification to the hold down may be necessary. See label for retrofit cautions.
‡‡ Top and front terminal mounts only.
(1) Eliminates need for sensor (needs to be disabled).

YUASA MB-2040 BATTERY CHARGER

- High Output charging current (4 amps)
- High Voltage capable (20 volts) – designed to improve recovery of sulfated batteries
- Switchable Mode operation
- "Fast Mode" – for quick vehicle set-up
- "Normal Mode" – ideal for smaller batteries, initial activation, and deeply discharged batteries
- Commercial Grade – perfect for Dealer / Shop use
- Suitable for all battery types – Conventional, as well as MF (AGM), including YTZ
- Automatic Shut-Off
- Reverse Polarity Protection / Spark-free Operation (UL / CUL) approved)
- Durable construction for longer life
- 3 year limited warranty

PART #	DESCRIPTION		
920-227	Battery Charger	254.95	E

YUASA BATTERY CHARGER/MAINTAINER

- Fully automatic three level charge cycle for effective charging
- Reaches 14.4 volts peak, then automatically switches to float
- Designed to prevent overcharging
- AC power LED indicator
- Charging and float mode LED display
- Reverse polarity protection
- Spark-free operation
- Durable construction for longer life
- Battery accessory leads and fused ring connectors included
- 12 ft. output cord
- 3 year limited warranty

Yuasa's Automatic 1A 12V battery charger is the industry's most powerful plug-in wall charger. Combining the latest technology and a host of user-friendly features, this compact, high power unit provides optimum amperage return and is designed to fully charge and maintain conventional and sealed maintenance free batteries.

258008	Charger/Maintainer	37.95	E
920-230	Ring Connector	6.95	E

YUASA BATTERY TESTER

- Developed exclusively for the Powersports industry
- Determines accurate battery status in seconds
- Single load, dynamic resistance technology minimizes battery drain during test
- Tests both charged and discharged batteries accurately
- 1 year limited warranty

PART #	DESCRIPTION		
920-229	Battery Tester	239.95	E

YUASA JUMPER CABLES

- Easy to use, easy to store
- Convenient storage bag
- Heavy duty, 8 ft., 8 gauge cables won't stiffen or freeze
- Tangle resistant, encased rubber grips for safer use

BATTERY TENDER® PLUS

The Battery Tender® Plus is a 1.25 amp battery charger designed to fully charge a battery and maintain it at proper storage voltage without the damaging effects caused by trickle chargers. Included is a quick connect ring terminal harness for hard to reach areas and alligator clips for an alternate connection.

- Temperature compensated to ensure optimum charge voltage according to ambient temperature.
- Automatically switches from full charge to float charging mode.
- Battery Tender® at 1.25 amps will charge as fast or faster than any 3 amp charger available.
- Reverse Polarity Protection to ensure user safety. Red & Green Lights Alternately Flash in this condition.
- Complete 4-step charging program (Initialization, Bulk Charge, Absorption Mode, Float Mode).
- 10 year Warranty!

WATERPROOF 800

This compact 800 mA battery charger has all the charge characteristics of its cousin the Battery Tender® Junior. It incorporates highly efficient surface mount technology electronic components. The interior is completely encapsulated, protected from shock, vibration, and moisture by an electrically insulating, thermally conductive, flame retardant, synthetic epoxy resin compound. It's tough, affordable, and a strong, innovative battery charging solution. This charger is no larger than a standard computer mouse yet packs 800 millamps of pure constant current charging power. Coupled with a brain (IC chip), the charger will constantly monitor, charge, and then maintain your battery --- even while totally submersed under water! Perfect for all outdoor types of ATV's, watercraft, motorcycles, boats, or anywhere water is a threat.

- "Supersmart" Technology
- Spark Proof
- Short Circuit Protected
- Reverse Polarity Protected
- Waterproof
- Weighs only 1 Pound
- 3 Year Warranty

WATERPROOF POWER TENDER PLUS 12V @ 5A

WATERPROOF, Shock & Vibration Resistant, Lightweight (LESS THAN 4 POUNDS), compact charger designed for either portable operation or permanent mounting. Charges and maintains both flooded and sealed, maintenance free, AGM, lead acid batteries. Float / Maintenance function maintains batteries at proper storage voltage without the damaging effects caused by trickled chargers. The Power Tender PLUS is easy to use, it's rugged, its compact, it's packed with power, and it's backed by the reputation of the undisputed battery charger industry leader, DELTRAN.

- WATERPROOF !!
- Shock & Vibration Resistant
- Lightweight - LESS THAN 4 POUNDS!
- Microprocessor Controlled, BTP Technology
- Charges both flooded & sealed maintenance free lead acid batteries.
- Charges any size (capacity) lead acid battery.
- Reverse Polarity Protection (VIA EXTERNAL IN-LINE FUSE).
- Complete FOUR-Step Charging Program (Initialization, Bulk, Absorption, & Float / Maintenance).
- 2 Year Warranty

BATTERY TERMINAL CLEANER & ACID NEUTRALIZER

Provides a one-step solution to battery terminal corrosion removal and acid neutralization. Delivers a powerful, heavy-duty foam that clings to battery surfaces, provides extended contact time and neutralizes acid quickly. Helps eliminate power leaks and aids in restoring full starting power. Features a low odor, non-flammable, water-soluble formula. Contains a unique color indicator that turns red in the presence of acid, then changes back to yellow when the acid is neutralized. Leaves behind a residual film that provides short term corrosion resistance.

MULTI-PURPOSE BATTERY CHARGERS

The NOCO Genius Multi-Purpose Battery Chargers are designed with versatility in mind. All of the chargers in the multi-purpose line are packed with features that are designed to diagnose, recover, charge and maintain a wide range of batteries, in a wide range of applications. The quick connect system allows users to move one charger between multiple applications with ease. Eyelet Terminal Connectors can be left installed on some vehicles, while utilizing the Battery Clamp Connectors or 12V Plug Connectors to charge and maintain other applications. Overall, the NOCO Genius multi-purpose battery chargers are perfect for users looking for flexibility and who want the ability to quickly switch between applications.

G750

.75A (750mA)
6V & 12V

WICKED SMALL, WICKED SMART!
The G750 is a smart, 5 Step, fully automatic switch-mode battery charger and maintainer. The G750 is best for small battery applications from 1.2-30Ah, such as charging your Motorcycle, ATV, Jet Ski or Snowmobile. In addition to charging, the G750 can effectively maintain any 6V or 12V batteries in larger applications, such as Cars, RVs, Boats and Trucks.

NOCO genius wicked smart chargers

Automatically Diagnoses, Recovers, Charges & Maintains Your Batteries!
NOW THAT'S SMART...WICKED SMART!

The G4 is a smart, 7 Step, fully automatic switch-mode battery charger and maintainer with 4 independent battery banks. The G4 allows different battery sizes, voltages (6V or 12V), and chemistries to be charged at the same time safely and efficiently. The G4 is best for charging multiple small battery applications from 2.2-40Ah, such as Motorcycles, ATVs, Jet Skis or Snowmobiles. In addition to charging, the G4 can effectively maintain any 6V or 12V batteries in larger applications, such as Cars, RVs, Boats and Trucks. With 4 independent battery banks, the G4 is the best way to keep all of your vehicles maintained at the same time.

Wicked Smart Features:

- **INTEGRATED AC CORD MANAGER** — Route the AC cord out of any side of the charger and store excess cord under the charger for convenience
- **CHARGE MULTIPLE BATTERIES** — Charge multiple batteries independently at the same time, including both 6V & 12V as well as multiple chemistries
- **ABNORMALITY PROTECTION** — Automatically shuts "off" if charger remains in Bulk charge mode for an extended period of time
- **6V/12V COMPATIBILITY** — Charges 6V & 12V batteries
- **FULLY INTERACTIVE** — Automatically adjusts itself to changing current needs
- **DESIGNED FOR SAFETY** — Reverse polarity, short circuit, open circuit, spark proof, overheat, overcurrent & overcharge
- **REMOVABLE CHARGE CABLES** — Add and remove charge cables for clean and professional installations
- **EXTENDABLE CONNECTORS** — Plug-n-play connectors for easy accessory changes
- **MULTIPLE BATTERY CHEMISTRY** — Safely charges Wet, Gel, MF & AGM batteries
- **RAPID CHARGING TECHNOLOGY** — Charges batteries 2X faster than traditional linear battery chargers
- **RECOVERY MODE** — Recovers deeply discharged & sulphated batteries with pulse charging
- **HF/HE SWITCH MODE DESIGN** — High-frequency, high-efficiency for a lightweight, compact charger
- **VARIABLE INPUT COMPENSATED** — 100% full charge even with varying A/C input voltages
- **COLD/AGM MODE** — Optimized charge mode for cold weather or AGM batteries
- **AUTO-MEMORY** — Returns to last selected mode when restarted

SOLAR BATTERY CHARGERS + MAINTAINERS

BATTERY LIFE+

BRING LIFE TO YOUR BATTERIES
WITH THE POWER OF THE SUN

Solar panels are comprised of photovoltaic cells ("photo" meaning light, "voltaic" meaning electricity) that convert sunlight into power. The sun gives off enormous amounts of energy in the form of heat and light, which is captured by the cells. In turn, the power from the light essentially loosens electrons from the cells in order to create a flow of energy. This energy is then directed to either a storage unit (such as a battery) or through a regulator (such as our FLEX line) directly to a device. This allows you to generate energy wherever you go, as long as the sun is shining.

PART #		
650281	32.95	B

BATTERY LIFE+ SOLAR 5

5 Watt Solar Battery Charger

PART #		
650282	63.95	B

Keeps 12-volt lead-acid batteries fully charged and maintained through solar power and provides up to 180mA (for the 2.5 Watt) / 410mA (for the 5 Watt) charging current to counteract parasitic drain of most vehicles, such as cars, boats, trucks, motorcycles, ATVs, RVs, lawn mowers, and more. Safely charges wet cell, gel cell, AGM, enhanced flooded battery or any maintenance-free battery. Built-in safety protection for short-circuit, open-circuit, and over-current. Its ultra-low profile design makes it simple and easy to install, and completely weatherproof for outdoor use (rated at IP65). Integrated LED indicator illuminates when generating power. Thin film technology for performance in low-light, cloudy and overcast conditions.

CDI BOX / REV KIT

Procom offers you a wide selection of CDI Box / Rev Kit for Honda, Yamaha, Suzuki, Kawasaki, Polaris, Bombardier and many more...

High Performance • Faster Than Ever

How It Works?

1. We have built in the best ADVANCED timing curves ready to plug in and go.
2. Increased additional 1,000+ RPMs over stock CDI.
3. Stronger spark energy for easier start

Our improved CDI Box will drive your machine faster than ever!

RECTIFIER

Improved Rectifier / Regulator
Increases Horsepower up to 8%

High Performance • More Horsepower

FASTER

Q: How does the re-designed Rectifier increase horse-power?

A: We built an extra sensor and switch in the unit. When the battery is near fully charged, the sensor instructs the Magneto Rotor to run without cutting the magnet field. The rotor then runs lighter and saves the power to the engine. The engine gains more horsepower to drive your ATV faster!

POWERJET

Most fuel injected engines run very lean and this is fine except for when demanding maximum power output on the track, especially when you have sport exhausts installed. Being able to simply adjust the fuel/air ratio in those conditions would be wonderful wouldn't it?

The PowerJet Fuel Controller allows just that! You can adjust the fuel map from -4% to +10% by selecting one of the 10 settings. We even incorporated a stock setting which means no change compared to stock.

Our PowerJet is a simple yet complicated device. It measures the outside air temperature very close to where the stock sensor is located, and adjusts the signal from the OEM air temperature sensor to the ECU to make use of the built in Air Temperature Correction factor that is built into every stock ECU.

What this accomplishes is that the ECU is told that the intake air is a little cooler than it is, and the ECU will respond by injecting a fraction more fuel depending on the PowerJet setting. You as a rider will notice a substantially improved engine response when you twist the throttle.

The neat thing is that when under constant load (constant speed) the oxygen sensor in the exhaust will make the ECU correct the fuel/air ratio back to stock! However, as soon as the system notices an increase in power it switches from closed loop (oxygen sensor feedback) back to open loop (no feedback) and will correct the fuel/air ratio by the amount you selected on the PowerJet.

PowerJet can be easily installed by plugging it in between the stock AIT sensor which is usually located somewhere on the airbox and the bike's wiring harness. Each PowerJet comes with the exact plug in connectors and installation will normally only take a few minutes. Finding the air temperature sensor usually takes more time than plugging in the PowerJet.

You can leave the PowerJet sitting under the bodywork somewhere as it is designed to be rugged and waterproof. After figuring out what setting works best with your specific engine/exhaust/intake combination you typically do not need to adjust it any more.

PowerJet comes with a full one year warranty.

MAGIC POWER BOX

A New Concept of Power!

POWER

Installaton is very easy. Just attach the leads to your battery mounts.

773-400
99.00 B

Compatible with any ATV, Motorcycle, Watercraft or Snowmobile with an electric start!

Concept of the Magic Power Box: Without the Magic Power Box, when you throttle up your machines, the battery output voltage is unstable; it changes between 11V and 15V, the spark energy is inconsistent and your machine lacks power. With the Magic Power Box, the output voltage will be almost 100% stable. Your machine can reach the maximum power.

• Increase Horse Power • Increase Torque • Quicker Throttle Response
• Increase Spark Energy • Improve Fuel Efficiency • Easier Start & Runs Cleaner
• Less Spark Fouling • Brighter Headlights • Longer Battery Life • Reduce the Radio Noise

WISECO FUEL CONTROLLERS

WISECO

To get the most out of upgrades like high compression pistons, performance camshafts, exhausts or another power adding components, adjusting the amount of fuel being delivered is a logical next step. Much like re-jetting or adjusting the pilot, needle, and main jet circuit in a carburetor, Wiseco's 3.5 Fuel Management Controllers can really enhance the performance of aftermarket parts. Wiseco's new Generation 3.5 Fuel Management Controllers for EFI tuning are extremely simple and easy to use and better yet they require no dyno, complex hookups, power supplies, or extra wiring harnesses! With the push of a button, you can easily adjust fuel delivery by adding/subtracting fuel from each zone to work in conjunction with your latest modifications. The display lights on the controller will display the injector pulse duration, which provides instant feedback for where to make the tuning adjustments. Simply plug the included connector into the existing factory wiring harnesses, mount the controller for easy access, and make the adjustments without ever leaving the seat of your bike/ATV. It doesn't get any easier than this to dial in your new EFI engine.
