INFLATABLE SNOWSHOE

"Our motto is to get out there and experience winter - always better to be safe than sorry"

YUKON CHARLIE'S TREK SERIES

Out there enjoying yourself and something goes wrong - our NEW lightweight inflatable emergency snowshoes will help get you to safety. Extremely lightweight and packable to fit in any backpack, cargo space, or in the trunk of a vehicle. Inner bladder is designed to inflate easily and the outer cover is durable enough to withstand the rigors of getting through tough backcountry conditions. Our Fast Fit harness system is designed to fit most shoe sizes and keep you in securely when the snow gets deep.

- Durable inflatable construction provides a stable platform to get through the snow in an emergency situation
- Our fast fit 1-pull bindings provide easy in and out and a secure fit while in use
- Extremely portable (lightweight and small overall footprint for storage)

SPORTSSTUFF® JUSTA TUBE

NEW PRODUCT

JUSTA TUBE is not really just a tube! Sure it's a black donut, but it's a hypoallergenic black donut, much less likely to cause an allergic reaction than that old truck tube you used to use! The Schrader valve stem is shorter than a standard auto valve and has a tapered cap, so there's no discomfort or scratching legs. It's made of isobutylene isoprene synthetic rubber, an upgrade from a standard tire tube. It's more resistant to heat, abrasion, ozone and sunlight. JUSTA TUBE provides year round fun and is easy to store! It's a durable snow tube in winter. In summer, you'll enjoy it as a durable river, lake, pool or ocean float.

FIRESTIK WHIPS SAFETY FLAGS

These FireStiks have a special blend of fiberglass and resin that offers strength and durability that is always flexible, never brittle.

Each whip is shrink-wrapped in a protective layer of PVC tubing that eliminates sun-splintering and deterioration. Other benefits are increased durability and enhanced color visibility. The 3/8" - 24 threaded base is compatible with a large variety of brackets, mounts, springs, quick disconnects and other mounting hardware.

The 12" x 8" orange rectangular safety flags are made 100% oxford polyester: a durable fabric proven to resist fraying and color fading better than nylon or vinyl. Flag is removable and/or replaceable and rotates freely on the rod.

FRESH

What is one thing that no videos offer? EAST COAST RIDING and it's time to put an end to that. "FRESH" will shed a new light on the snow shredding community and make the northeast U.S. a sought after Mecca for snowmobiling. This season check out the newest release from Travis Steward as he follows the extreme riders of Rave X and the Outer Limits Sledstyle tour. Check out freestyle and free riding in the Northeast at its best. See footage of the Outer Limits tour riders ripping on snowmobiles, stunt bikes, quads, and 50's. Follow back flip action with Seth Bell on his 50 while catching up with Franky from the Vertical Outlaws on his stunt bike. Got trees? Well Maine does! Check out the way life should be in this epic video about aerial stunts, tree dodging, and back flipping. An extreme motorsports extravaganza! Check in with X games gold medalist and extreme snowmobiling pioneer, Dane Ferguson, as he takes his skills from the huge step ups of Turnagain Pass to the gnarly tree dodging experience of Maine's back country. See our buddy Sam "Samzilla" Rogers save the day hucking back flips for big New Hampshire crowds. Mix those two icons with the crazy local talent of Seth and Brandon Bell, Ben Copp, Ralph Gallagher, DJ Coffin, and Alex Bishop and you will see some serious shredding. Watch rider interviews and bonus footage featuring Darryl "D-Rail" Tait, a freestyle snowmobiler triumphing over his paralyzing back injury.

FRESH 2
"DON'T QUIT YOUR DAY JOB"

FRESH 2: Don't Quit your Day Job is another northeast U.S. based flick displaying the gnarly terrain of the Maine back country along with some great freestyle footage of the Outer Limits Tour. If you're looking for 200 foot cliff drops then there are ten other movies for that. This is different...this is FRESH. This year we teamed up with the East Coast Sno X series and ripped through Vermont, New York and New Hampshire plus hosted some great shows in our beautiful state of Maine. Watch the antics of Luke Maue, Brandon Bell, Seth Bell, Eric St. John, Fred Rasmussen and Joe Mclafferty as they perform big air stunts for the masses. Also, check out the back country ripping of Alex Bishop, Johnny Mac, Ralph Gallagher and Darryl "D-Rail" Tait. Most importantly...you can see shots from our year ending romp at Saddleback Mountain as we took over the terrain park and had some fun with the skiers and boarders including pro riders, Kevin Jellerson and Andrew Kahkonen. When you combine freestyle ski/board with snowmobiles you get AWESOME!!! In addition, this year we were able to grab some great footage of our buddy Darryl "D-Rail" Tait who has battled back from a paralysis a couple years ago. Hear the story from Darryl as he continues to rip on his sled and yes...back flip his wheelchair!!!

FRESH 3
"GROWING PAINS"

Back again is the crew that helped change the face of snowmobiling in the northeast U.S. The Rave X freestyle and back country crew have been working hard over the past few years to create a new lifestyle in the snowmobiling industry and bring new light to the northeast. This day and age it is not uncommon for northeastern riders to buy freestyle ramps or get long track snowmobiles to bring their shredding skills to the next level. By introducing this film series we have helped keep that fire burning in riders by showing them attainable riding in common Maine and New Hampshire locations. With some epic POW days and some gnarly freestyle events, Rave X and the crew are giving you their best film yet! Strap in for another adventure with this great crew. Bonus features include a short with Miss Rave X, Brietanya Lee Anderson plus the first ever Fan segment.

FRESH 4 "TALK IS CHEAP"

The Rave X Motorsports team is back for the new installment of the FRESH series Talk is Cheap. This year the boys are bringing more back country from Maine and New Hampshire plus a trip out west to top things off. As always, Fresh 4 will highlight footage from the Outer Limits Tour including the Rangeley, Maine snodeo, the Grande Prix de Valcourt, the New Hampshire Grass Drags and more. From back flips to back country, Rave X and their band of buddies is ripping up the northeast on sleds. More cameras, more riders and more footage! Bigger and better than ever, the Rave X boys are making it happen. Talk is Cheap.

592006	DVD	**24.95**	G

FRESH FIVE

Maine back country terrain is no force to be reckoned with. When you are ripping through the Maine woods you never know what you will find buried under the snow. Tree roots, rocks and stumps will stop at nothing to destroy a-arms, bulkheads, s-mods, bumpers and body parts. The riders of the Snow Mountain Mafia have teamed up with Rave X to conquer these obstacles and throw caution to the wind. Watch our buddies; Bill Turgeon, Shawn Huston, Matt and Jordan Berard, John McGovern, Ralphy, Mark York, Alex Bishop and Paul Beaudoin. Meanwhile the Rave X freestyle team continues to travel the northeast shredding ramps for big crowds and showing fans what snowmobiles are capable of. It never fails to amaze people what we can put these machines through. Ramps and freestyle have slowly been leaving the DVD scene but with Rave X movies that will never happen. Whether it is the Rangeley and Colebrook Snodeos or the famous New Hampshire Grass Drags in Fremont, NH. Check out the antics of Brandon and Seth Bell, Freddy Rasmussen, Joe Mclafferty, Jesse Moran, Jesse Croteau, Dave England, DJ Coffin and more. 55 Minutes long includes sticker and bonus footage

OLD IRON III

So just where are all these "Old Iron" sleds of yesteryear? Is this a disease, or an obsession, or simply a hobby? These mysterious questions are answered in this third in the series, "Old Iron III". We will showcase Old Iron machines in original, "as they were discovered" condition, right through to completed restorations. We find these gems in the possession of various collectors, and at vintage meets across the country. The Waconia Ride-In is the granddaddy of vintage and antique events, showcasing rare & unique restored sleds including this year's featured sled, the Rupp. You'll also get a front row seat at the parade of sleds entered in the annual ride. The A-1 Show in Michigan is where you'll find just about any part you'll need in the restoration process. We'll also make another visit to the Eagle River Vintage weekend to catch some vintage models racing, and we'll ride the trails in Naubinway, MI on some real beauties. Finally, we'll open the doors to some of the rarest and diverse individual collections presented to us through the eyes of passionate collectors. You won't believe your eyes! All this and much more. Shot in Hi-Definition.

BIG WHEEL SHOP DOLLY

Sno-Stuff has a new breed of shop dolly that isn't your average "run of the mill" shop dolly. Our Big wheeled sled mover has a number of distinct advantages over the competitions "same old-same old" design. The most obvious of which is our large diameter, narrow profile, and high strength wheels. These wheels allow for dramatic ease of motion over large obstacles, gravel, snow, slush, or garage thresholds. The solid core tires withstand the extreme weight of today's heaviest sleds without so much as a whimper. Another revolutionary design feature is our new "swept back" design, which aids in leverage for easy lifting. As importantly, it makes handlebar and windshield clearance problems a thing of the past because the balance point is achieved without the cross bar ever coming close to the handlebars or windshield. People with handlebar hooks, riser blocks or flared/high windshields will notice this benefit immediately.

Premium: yellow finish, Polymer wheels, industry exclusive remote activated leg extension kit for a-arm suspension
* Can be used with 151" and longer tracks with the addition of a track sling

Additional Features:
- Big Wheels for Easier Handling
- Large Diameter, Heavy Gauge Tube Construction
- Swept Back Design for Easier Lifting
- Industrial Grade Painted Finish
- Quick, Adjustable Lift Strap
- No Flat Tires
- Rubber Protected Lift Tubes
- PVC Coated Lift Hook
- UPS Shippable

RATCHETING TIE DOWN WITH WEB CLAMP

Erickson's NEW WEB CLAMP was designed to address the problem of what to do with excess webbing. The WEB CLAMP mechanism is much like a mouse trap, lift the spring loaded clamp and place the folded webbing under the clamp, release the spring loaded WEB CLAMP and you have trapped the excess web. Very simple and effective. SO NEAT!!

- Extra heavy duty 3/4" flat rubber tie downs with heavy reinforced ends and heavy 2-1/2" steel hooks
- Maximum resistance to all weather conditions

ROPE RATCHET TIE DOWNS

- The Rope Ratchet's construction lets you secure a wide variety of loads quickly and easily
- With Rope Ratchet, you simply attach the two hooks and pull the loose end of the rope to the secure tightness you need
- With Rope Ratchet tie-downs, you never have to worry about stretching, snapping back, or loosening
- Your load stays secure because the rope stays locked in place with every pull until you release it by pushing the convenient thumb lever
- Display packaged
- 3 sizes

CRITICAL GEAR BAG

The Holeshot Critical Gear Bag was designed to keep your gear clean and dry, whether riding dirt, mud, water, snow or ice.

- High performance waterproof fabric.
- Fully seam sealed.
- Waterproof roll-top closure does not wick moisture.
- Compact and lightweight.
- Large enough to store your extra gear.
- Flexible enough to fit into the smallest compartments.
- Perfect for grab-n-go situations out on the trail.
- 13 liters of storage capacity.

Fits all brands	**650408**	**36.95**	G

QUICK-RELEASE TUNNEL BAG

Holeshot, maker of high quality performance driven products, presents the Holeshot Tunnel Bag, an innovative storage solution designed by sledders for sledders. Waterproof and expandable, this bag was designed, refined, pushed and pulled to create a product that exceeds your expectations.

The Holeshot Tunnel Bag features a versatile 4-point rubber hold-down system, allowing installation either lengthwise or crosswise and ensuring contents are secure on even the harshest trails. This system, along with the convenient handle, makes it easy to remove and take with you at the end of the day.

- Expandable main pocket with a double wall of waterproof material
- Top and side pockets for storing smaller yet essential items
- Two 2" webbing straps to secure larger items
- Shovel blade pouch on top for quick access
- Installs easily on both mountain and trail sleds

Fits all brands	**650409**	**149.95**	G

DASH BAGS

When you set out for an adventure, we understand it's important to have the essentials along with a few extras. This snow tight bag was meticulously designed to maximize every inch of space available. A completely protected mesh storage pocket fits behind the headlights to easily hold two pair of goggles and keep them warm, dry and safe. By strategically positioning the guage, a large, easy access space was created to store gloves, hats, sunglasses and snacks. We didn't stop there -- we know it's important to keep track of smaller but important items, so mesh pockets were designed to hold truck keys, lip balm or a wallet.

The Holeshot Dash Bag not only offers bountiful storage, it's the first and only bag to provide a convenient location for a smartphone. The clear vinyl window allows full touchscreen functionality without exposing your phone to the elements. Check weather, trail maps or simply see how many riding hours are left, all while keeping your device clean and dry. Don't have a smartphone? This spot can easily hold a GPS device or a trail map for convenient viewing. What's even better? This innovative bag installs in just minutes and requires no tools.

- Innovative design allows for bountiful storage on dash
- Bag keeps contents dry
- Smartphone/map pouch with useable screen

RISER BAG

The PowerMadd Riser Bag helps clean up your bars after putting on a larger riser block by covering up wires and gives you the added benefit of a pocket for storage and the pad for protection. It can be used on snowmobiles with at least a 3" riser. The Riser Bag comes with a unique mounting system that utilizes a 1" nylon strap and buckle to secure the bag to your bars and two 3" velcro straps on the sides of the bag for stability and to hide wires. The PowerMadd Riser Bag is made of heavy duty nylon material. The pocket comes with a water proof zipper and a water resistant wire inlet on the bottom. The side of the bag features a D-ring to attach your tether when not being used.

WOODY'S RACING GEAR BAG

Big enough to store all your outdoor gear but small enough to stow in the back seat or the back of your truck with enough room left for your buddy's stuff. It's made from 100% water-resistant nylon material with tough oversized zippers to protect your gear through miles of rough and wet travels. All high-wear areas are constructed for tough handling. The main cargo area has a wide opening and is flexible to fit all the odd shaped gear you'll need for a weeks worth of hunting, fishing or snowmobiling. Two screen mesh storage areas on each end of the bag are big enough to handle wet, dirty boots and outerwear or secure other items you don't want to pack in the main compartment. Available in black with orange trim and screen printed Team Woody's logos.

FIRESTIK WHIPS SAFETY FLAGS

These FireStiks have a special blend of fiberglass and resin that offers strength and durability that is always flexible, never brittle.

Each whip is shrink-wrapped in a protective layer of PVC tubing that eliminates sun-splintering and deterioration. Other benefits are increased durability and enhanced color visibility. The 3/8" - 24 threaded base is compatible with a large variety of brackets, mounts, springs, quick disconnects and other mounting hardware.

The 12" x 8" orange rectangular safety flags are made 100% oxford polyester: a durable fabric proven to resist fraying and color fading better than nylon or vinyl. Flag is removable and/or replaceable and rotates freely on the rod.

Protect your headlight and give your sled a custom look at the same time with a Lightshield from Holeshot! These attractive polycarbonate headlight covers are custom formed to precisely fit your sled's headlight and are available in custom colors for all the popular chassis from Polaris, Ski-Doo and Yamaha. Thumb your nose at the rocks, ice chunks, or branches that have threatened your headlight in the past. They apply directly to the outsides of your headlight with the proven security of extra-strength Velcro tabs.

FITTED LIGHTSHIELDS

Sometimes a little something makes a big difference. Our fitted, transparent cover offers an eerie cool glow when illuminated with today's high power headlights. Mounts and removes in seconds with supplied hook and loop fastener tabs. **NOT INTENDED FOR NIGHT USE.**

PERFORMANCE WINDSHIELDS

An industry first and Sno-Stuff exclusive that is bound to change the way we look at traditional windshields. The Peak Collection gets tons of style points for its bold in your face design. Aggressive aerodynamic "ribs" make this windshield definitely stand out from the crowd. Also a Sno-Stuff exclusive is the flat black racer finish with a rubberized coating. You really need to see it and feel it to get the full effect.

Cobra™ Windshields by PowerMadd are among the best selling snowmobile accessories on the market. Cobra™ Windshields sell because they offer outstanding protection from the wind. We were the first to introduce flared windshields that kept riders warm, and it remains our primary focus today. Secondly, we have always been of the belief that the windshield is the primary focal point on a snowmobile - it's the first thing people see when they check out your sled. So naturally, this key element should be a sleek, stylish and colorful component. We work hard to make Cobra™ Windshields make your sled look better than it did with the stock OEM windshield. And finally, Cobra™ Windshields are known throughout the industry as the most durable windshields available. They are made of premium virgin polycarbonate plastic and are molded using material that is appreciably thicker than the windshields made by our competitors. The net result is an incredibly tough windshield designed to take the punishment that sledders are famous for delivering.

UNMATCHED PROTECTION: First and foremost, Cobras protect you from the wind... no more frozen fingers, hands and upper body.

GREAT AERODYNAMICS: Cobras slip through the wind with little drag. Less drag means more speed!

COLD WEATHER DURABILITY: Cobras are molded from bullet-proof (.80") Polycarbonate plastic. They remain flexible in the cold and take punishment better than any other shield on the market.

HOT DESIGN: Our shape design comes from countless hours of testing. Our Graphics lead the industry!

PLEXUS PLASTIC CLEANER PROTECTOR & POLISH

Originally developed for use in aviation, Plexus is quite simply the most effective product you can buy for cleaning, protecting and polishing clear and colored plastics. Plexus actually seals the pores of the plastic. It makes small scratches less visible, leaving a surface that is fresh, lustrous and protected. Plexus dries perfectly, no smears, no scratches, no smudges and no oily, tacky or sticky residue. It’s anti static and can be applied in seconds.

COVER SAVER

Cover Saver helps eliminate hand grips from tearing through the cover and aids in cover installation. Just slip “Handle Balls” over existing hand grips before installing cover; they allow the cover to slip on and off much easier and increases the life of the cover, especially while Trailering. Good for Snowmobiles, ATV’s, Watercrafts, Motorcycles, etc.

HOLESHOT SKID PLATES

THESE ARE ORIGINAL EQUIPMENT SKID PLATES • NOT JUST FOR RACERS ANYMORE!

Designed for the snowmobile enthusiast who loves to get the most out of the sport and needs maximum protection for their sled. The original 3-RIB design makes it the toughest Skid Plate available on the market today. Holeshot has unmatched attention to detail, such as easy fit and perfect color match, built into each part. Not all snowmobile skidplates are created equal. If it doesn't say Holeshot™, it's nothing more than a chunk of plastic! Holeshot™ was the originator of the snowmobile skidplate, and we still lead the industry today with the best fit, the best quality construction, the best design and the hottest custom colors. These aren't just for aesthetic appeal, they will prevent costly repair and save you hours of labor replacing a belly pan.

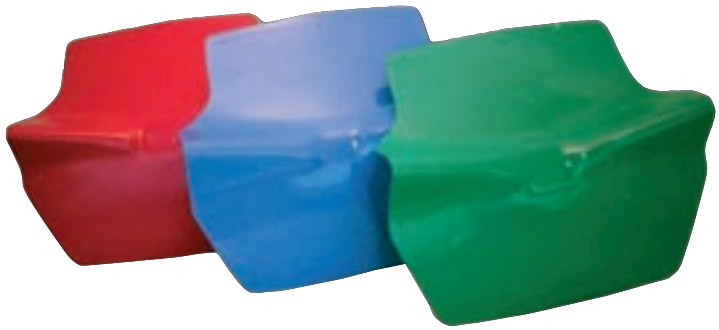
TRACTION STRIPS



Sno-Stuff Universal Traction Strips are designed to be used "Your Way". Buy as many as you need and place them where you want--it's up to you. No prefab sheets here. Because of their smaller size, they can be added to your existing OEM running boards or used to design a large traction area from scratch. The large 3/8" high pyramid design provides tons of extra traction at a fraction of the weight and cost of other designs. Easily installs with supplied rivets. Sold in packages of twenty.

SNOSTUFF PROGLIDERS

- Sno-Stuff now offers a full line of PRO-GLIDERS available to fit Arctic Cat, Polaris, Ski-Doo, and Yamaha. Nothing else compares to the protection of a Sno Stuff PRO-GLIDER belly pan protector! Sno-Stuff PRO-GLIDERS are designed to offer protection from the front of the belly pan to the front of the track tunnel
- Manufactured with smooth, contoured surface that reduces friction and greatly increases deep snow flotation
- Made from High Density Polyethylene (HDPE) material for high strength skid frame/radius rod protection
- Unique wide design provides superior support coverage
- Prevents snow from packing in the holes and below the engine, which reduces melting and ice formation
- Bigger than OEM
- Attaches directly to the front bumper to eliminate snow spray between the bumper and nose cone on old generation Polaris models
- Available in many colors for the customized look
- Includes mounting hardware and instructions

SKINZ SNOW FLAPS

SKINZ UNIVERSAL SNOW FLAPS

The Mountain snow flap is made from durable HMW-PE .093 material which stays flexible for mountain style or snow cross riding
Dimensions: 16.5" wide x 20" long.

The Trail snow flap is made from .125 HMW-PE for a stiffer flap needed for trail style riding.
Dimensions: 18" wide x 23" long.

Both flaps incorporate an SPG impression that is subtle but stylish.
All hardware necessary for installation included.
Snow flaps can be custom trimmed or fashioned to any machine.
Perfect for custom tunnels or modified machines including stock snowmobiles.

SKINZ FLEX STYLED SNOW FLAPS

The FLEX Styled Snow flap is formed from a durable blended HMW-PE material for extra flexibility.

The Mountain Short is 10" long
The Trail is 16" long
Width is 16" on both

The flaps do not come pre-drilled. They are universal fit and you drill out for your individual needs.
All hardware necessary for installation included (large flange rivets/backing washers).

SQUARE STYLE RAIL GRIPS

Some sleds are equipped with square, extruded rails. These sleds may have grooves molded into them and some do not. The sleds with grooves running lengthwise only give minimal additional traction sideways and no grip front to back. The sleds where they machine in grooves definitely grip, but they shred boots and knees. Snow Bug Square Style Rail Grips fit over and install on all square or semi-square extruded rails.
As long as they don't run coolant through the running boards, these will work. Sold per pair.

REV SEAT RISER

- The ESR (Ergonomic Seat Riser) kit takes you to the next level of comfort and control. The rider forward design of the Rev was a great leap forward, but as we all know, the seat level is just a little low. This puts an unnecessary strain on your knees and back. The E.S.R. kit combines 3" of additional pre-cut foam with a gripper-style seat cover which makes riding the Rev a real dream.
- The additional height eliminates knee and back fatigue and improves control by allowing you to stand more comfortably for powder or bad trails.
- Installation is easy. Remove your seat (5 minutes), remove the staples holding on your old cover, insert the foam and recover with the new E.S.R. cover and re-install the seat.

ANGLED FOOTREST

These angled footrest provide much more comfortable position for your feet when in the seated position. Installing these into your SKI-DOO will give you more control by allowing you to easily grip the top of the footwell area with the toe end of your boot. Also when riding in the stand up position they keep your feet from sliding into the footwell areas, keeping you in the optimum balance and control area. Sold per pair with mounting hardware.

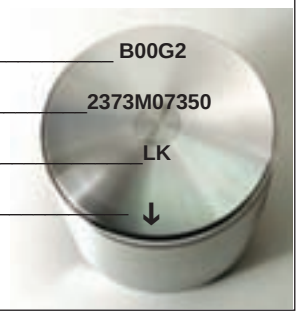
WISECO Snowmobile Pistons & Kits



(M-Series) Part Number System

Wiseco has changed the part numbers on all Snowmobile piston kits. The P-Series part numbers have been converted to the new M-Series part numbering system.

You will find the current pistons have the new (M-Series) part numbers and the old obsolete pistons have retained the old part number system.

The P-Series system was based on the English or imperial measuring system. The M-Series part numbering system was implemented to ensure accuracy for today's high performance snowmobile motors.

WISECO RING BUYER'S GUIDE

All Wiseco rings can be used in cast iron, nickel ceramic platings (Nikasil), boron composite and Electro-fusion bores. **CAUTION:** Unless otherwise noted, Wiseco rings cannot be used in chrome plated bores. Engine damage will occur. * CSM, CDM, KAM & KDM rings are designed to be used in chrome bores.

WISECO PISTON, INC. , LIMITED WARRANTY

WISECO warrants this product will be free from defects in material and workmanship for thirty (30) days following date of original purchase. If the product is found by WISECO to be defective, such products will, at WISECO'S option, be replaced or repaired at cost to WISECO. All products alleged by Purchaser to be defective must be returned to WISECO, postage prepaid, within thirty (30) days warranty period. This limited warranty does not cover labor or other costs or expenses incidental to the repair and/or replacement of products or parts. This limited warranty does not apply to any product which has been used in a hi-performance application, or racing or is subject to misuse, mishandling, misapplication, neglect (including but not limited to improper maintenance), accident, improper installation, modification (including but not limited to use of unauthorized parts or attachments), or adjustment or repair performed by anyone other than WISECO. The parties hereto expressly agree that the purchaser's sole and exclusive remedy against WISECO shall be for the repair or replacement of the defective product as provided in this limited warranty. This exclusive remedy shall not be deemed to have failed of its essential purpose so long as WISECO is willing and able to repair or replace defective goods.

THIS LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THOSE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOT EXPRESSLY SET FORTH HEREIN. ANY PRODUCT WHICH MAY BE SOLD BY WISECO BUT WHICH IS NOT MANUFACTURED BY WISECO IS NOT WARRANTED BY WISECO, BUT IS SOLD ONLY WITH THE WARRANTIES, IF ANY, OF THE MANUFACTURERS THEREOF.

WISECO'S liability (whether under the theories of breach of contract or warranty, negligence or strict liability) for its products shall be limited to repairing or replacing parts found by WISECO to be defective, or at WISECO'S option, to refund the purchase price of such product. In no event shall WISECO be liable for incidental or consequential damages arising out of or in connection with the product. Consequential damages shall include, without limitation, loss of use, income or profit, or losses sustained as the result of injury (including death) to any person, or loss of or damage to property.

Any claim by purchaser regarding this product shall be deemed waived by the purchaser unless submitted in writing to WISECO within the earlier of (i) fifteen (15) days following the date Purchaser discovered, or by reasonable inspection should have discovered, any claimed breach of this limited warranty, or (ii) thirty (30) days following the date of original purchase. Any cause of action for breach of this limited warranty shall be brought within six months from the date the alleged breach was discovered or should have been discovered, whichever occurs first.

This limited warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

HYPERDRIVE PISTON KITS

We are proud to bring you the next step in the evolution of performance powersports pistons. Our newest line is made from a space-age aluminum alloy which maintains it's high tensile strength up to 700ºF (380ºC), 50% higher than a conventional cast piston. This high temperature resistance significantly improves fatigue strength and impact toughness, which means that we will keep you riding longer and harder than the competition.

The images above show two cast aluminum pistons that have been magnified to 1,000 nanometers. They were both soaked for 100 hours at 600ºF to simulate operating conditions.
It is easy to see that the conventional aluminum alloy's particles coarsen significantly. This weakening of the material's bonds will lead to a sharp drop in piston strength. While the particles of our new aluminum alloy have only coarsened slightly, showing that they are still able to maintain a higher strength for longer periods.
Additional testing shows that the biggest hardness drop occurs after 10 hours of use. Our new aluminum alloy still maintains twice the hardness of conventional alloys, even after 20 hours!

KIT INCLUDES:
- **1 PISTON**
- **1 RING SET**
- **1 WRIST PIN**

GASKET MATERIAL KITS

K101 10.95 L

In this kit there are seven pieces of material for custom made gaskets. Each piece measures approximately 6 inches by 6 inches.

KIT CONTAINS THE FOLLOWING:	
Two	Metal reinforced heat gasket material, app. .040”
Two	Heat resistant compressed nitril cellulose, app. .015”
One	Steel reinforced exhaust material, app. .045 - .050”
One	Cork and rubber nitril based material, app. 1/16”
One	Treated paper gasoline and oil resistant, app. 1/32”

K102 13.95 L

In this kit there are five pieces of material for custom made gaskets. Each piece measures approximately 8 inches by 8 inches.

KIT CONTAINS THE FOLLOWING:	
One	Metal reinforced heat gasket material, app. .040”
One	Heat resistant compressed nitril cellulose, app. 1/64”
One	Steel reinforced exhaust material, app. .045 - .050”
One	Cellulose flange gasket material, app. 1/32”
One	Treated paper gasoline and oil resistant, app. 1/32”

LIQUID GASKET

Excellent padding properties make this semi-drying, visco-elastic sealer the perfect product for sealing joint surfaces with large clearance. Special synthetic rubber provides excellent cushion to absorb vibrations and impacts without failure, especially where coolants are involved.

PERFORMANCE FILTERS

K&N OIL FILTERS

K&N powersports oil filters are 'TUV' product endorsed and 'TUV' factory production monitored. This means every K&N oil filter is equal to or will exceed all OEM specifications. Our filters contain a modern synthetic filter media, designed for ultimate flow with less pressure drop, yet engineered for outstanding filtration to meet or exceed all OEM specifications. K&N powersports 'spin-on' oil filters feature a heavy-duty metal can. Most of these have a 17mm nut affixed onto the end that allows for easy installation and removal. The 17mm nut is crossed-drilled so racers can safety wire the filter to their bike.

HIFLOFILTRO PREMIUM FILTERS

Hiflofiltro is the world's first TÜV approved oil filter. Constructed using the best materials available, all Hiflofiltro oil filters meet or exceed original equipment performance levels.

HIFLO PREMIUM OIL FILTERS

WHY HIFLO? **Providing unbeatable performance and exceptional value, Hiflofiltro is the best-selling brand of aftermarket filters for motorcycles, scooters, and ATVs worldwide. The filters are also supplied to original equipment manufacturers as well as private label brands.**

Materials

To achieve our quality aims and to ensure the consistency of our products, we use only premium materials from well known manufacturers: steel from Toyota Tsusho and NKK Japan, glue from Henkel Germany, filter paper from Ahlstrom Filtration Finland, Hollingsworth & Vose USA and Awa Paper Japan.

Production

The Hiflofiltro-Thai Yang Kitpaisan factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963. With the experience of more than four decades, continuous research and development and modern production facilities, we manufacture some of the best quality filters in the world.

Quality Control

Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory. The whole manufacturing process, including the checking of raw materials, individual filter testing, is regularly audited and verified independently by TÜV SÜD.

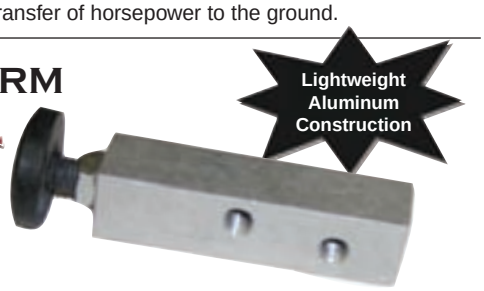
SKI DOO ENGINE TORQUE ARM

FOR 583-670 FORMULA Z, 670 SUMMIT AND SUMMIT X (NOT FOR REED VALVE TWINS)



You experience better performance with the clutches in alignment. The SLP Torque Arm holds the engine in place to have consistent belt alignment. Less belt and clutch wear is also a benefit. The arm is equipped with a damper to avoid transmitting vibration into the chassis.

SP2326	**33.95**	A

Proper clutch alignment under load means optimum clutching efficiency, allowing maximum transfer of horsepower to the ground.

YAMAHA ADJUSTABLE ENGINE TORQUE ARM

FOR YAMAHA 700 TRIPLE SX AND MOUNTAIN MAX

This lightweight aluminum torque arm helps improve your clutch performance by holding the engine true. This push style torque arm is adjustable to insure proper center to center spec and torque fit.

SP2325	**49.95**	B

Proper clutch alignment under load means optimum clutching efficiency, allowing maximum transfer of horsepower to the ground.

POLARIS ENGINE STABILIZER KIT

FOR POLARIS 2005-06 IQ 700 (755) / 900 TWINS (NOT COMPATIBLE WITH ELECTRIC START)

Hold your engine securely in place with this Engine Stabilizer Kit from SLP. This kit combines an SLP Torque Arm and SLP Push Arm to ensure proper engine alignment for maximum performance and consistency. The Torque Arm mounts on the PTO (clutch) side of the engine in the electric start mounting holes and pulls to the bulkhead. The Push Arm mounts on the MAG (recoil) side of the engine and pushes from the bulkhead to the recoil housing. Both the Torque Arm and Push Arm utilize special vibration absorbing products to limit vibration transferred to the chassis. Benefits include: substantially increased belt life, reduced belt and clutch heat, more horsepower transferred to the ground and more consistent performance from one condition to another.

POLARIS ENGINE TORQUE ARM

This new torque arm kit holds the engine in place when under hard acceleration or heavy load. Benefits include better and more consistent horsepower transfer to the ground, lower belt/clutch temperatures, better belt and motor mount life.

PART #			DESCRIPTION
236178	**109.95**	A	2011-12 Polaris 800 Rush, RMK, Assault, Switchback, & Switchback Assault

POLARIS SLP ENGINE PUSH ARM

FOR POLARIS 600/700/800 TWINS (RECOIL FRONT SIDE)

The high torque of the new twins creates an unwanted movement of the engine. SLP's Push Arm helps eliminate this problem by pushing from the right side shock tower to the front of the recoil. When used in conjunction with a Torque Arm, engine movement is nearly eliminated, keeping clutching efficiency optimized without increasing vibration.

SLP UNIVERSAL SNOW DEFLECTORS

When riding in deep snow, the exhaust outlet can become partially plugged causing reduced performance and even bogging. The universal snow deflector creates a trench in the snow allowing free flow for the exhaust. It will fit most snowmobiles. The deflector requires a flat mounting area of 1"x 3 1/2", just forward of the exhaust outlet.

SP09002	**27.95 ea**	B

EXHAUST VALVE SPRINGS

Polaris exhaust valves open with cylinder pressure. As you go up in elevation, cylinder pressures are reduced causing exhaust valves to open later than they should or in some cases not at all. This can cause poor and inconsistent top end horsepower. Changing to lighter exhaust valve springs allows the exhaust valves to open at the proper time maintaining proper top end horsepower and running consistency. Sold each.

TEMPERATURE SENSOR BYPASS PLUG

The new Polaris 600/700/800 Twin with Premium/Regular key switch setting retards the timing if water temperature exceeds a certain level. These sensors fail, and when they do, your sled will not run properly. This simple bypass plug allows you to disconnect the temperature sensor as a quick and easy troubleshooting test.

L.A. Sleeve produces a complete snowmobile line of centrifugally spun cast iron cylinder sleeves. LASCO sleeves with exacting port specifications, chrome-moly iron alloy, high tensile strength material provide the rebuilder with ease of installation, trouble free boring and a long lasting engine life.

SLP LIGHTWEIGHT STEEL SILENCERS

Lighten up your snowmobile by replacing the stock silencer with SLP's lightweight version. Each SLP silencer has been dyno tested and field verified to insure maximum reliable horsepower is attained while shedding the desired weight. Sound level emissions are also a focus at SLP. We strive for the quality, robust sound that you desire while keeping the sound levels low. Many of our models have been tested by SLP and passed the SAE J-2567 stationary sound test below the state adopted 88 decibel limit. All silencers are finished with ceramic coating which not only looks great, but also reduces radiant heat emissions by as much as 40%, resulting in cooler underhood temperatures.

SNO STUFF RUMBLE PACKS

If you are looking for performance you have come to the right place. Sno-Stuff Rumble Pack Silencers continue to set new standards in the industry. All Rumble Packs are designed from the ground up with performance, quality and reliability as primary goals. In other words, we did our job so all you have to do is ride, and ride hard, extensive dyno testing with the best equipment available insures accuracy and honesty that others can not match. We pride ourselves in making sure that the fit is perfect with no modifications to the belly pan necessary for installation. We did not stop there either. The exclusive Rumble Pack internal design allows for stock like sound levels but with an exhaust note that is nothing like stock at all. After all, something this exceptional in performance, looks and quality should get noticed. No other silencer in production offers all these qualities at such an affordable price. You will not be disappointed. Canister configuration: Single. Metal type: Steel. Finish: Polished stainless steel.

ELECTRICAL & IGNITION

YUASA BATTERIES

Not all snowmobiles have an electric start, but if you are lucky enough to own a model that does, you know one thing: you want it to start when you push that button. And so does the manufacturer. That is why they choose Yuasa. Some of Yuasa's most heavy-duty batteries live under the hoods of some of the biggest and fastest snow machines in the country. Just ask Arctic Cat, Bombardier (Ski-Doo), Kawasaki, Polaris and Yamaha. Manufacturers demand the best and they overwhelmingly choose Yuasa. So should you.

MAINTENANCE FREE HIGH PERFORMANCE

If high power is top priority in a replacement battery, look to Yuasa's High Performance Maintenance Free batteries. Yuasa means more power, less maintenance and longer life. Yuasa's High Performance Maintenance Free batteries are your best choice for motorcycles, utility vehicles, scooters, ATVs, riding mowers, personal watercraft and snowmobiles.

ALL OF THE FEATURES OF A STANDARD MAINTENANCE FREE *PLUS*
Increased Power – Up to 30% more cranking amps thanks to a radial grid design and additional plates.
Selected types also available in Factory Activated (filled, sealed and charged at the factory).

YTZ MAINTENANCE FREE

A range of high performance, compact and lightweight batteries designed to provide maximum power from minimum space. Designed to meet the increasing demands of today's high performance machines the Yuasa YTZ range are the only powersports battery in the world to incorporate expanded plate technology. Smaller, lighter and more volume efficient, Yuasa YTZ batteries provide greater starting power from minimum space. Factory sealed and activated they are completely spill proof enabling multi-angle fitment, never require topping off and are maintenance free for the life of the battery.

- Up to 80% more starting power per Kg
- Maximum power – minimum space
- Reduced self discharge for longer life
- Superior vibration resistance

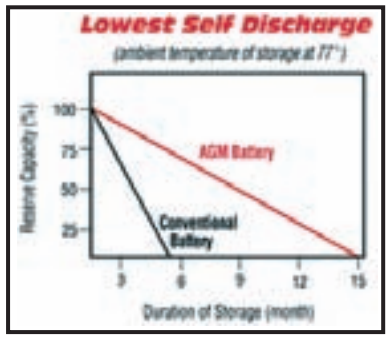
MAINTENANCE FREE



Absorbed Glass Mat (AGM) Technology is an advanced battery design used in Yuasa's Maintenance Free Batteries that eliminates water loss. Once it's filled with acid the battery is permanently sealed - so you'll never need to fill it with water or check the acid level.

Long Life
Because of its lead calcium design, the AGM battery will hold its specific gravity more than three times longer than conventional lead antimony types. This means much longer periods between charges when the battery is used in a standby mode, like winter storage.
And to remain factory-fresh the AGM battery is shipped dry along with its own pack of high-gravity acid that's added at the time of installation.

Sealed, Non-spillable
Once filled with acid from its special packs, the AGM battery is virtually maintenance free. It's totally sealed and all of the acid is absorbed in the special plates and separators, so there is no need to worry about acid leaks on valuable vehicle parts and accessories.

Selected types also available in Factory Activated (filled, sealed and charged at the factory).

YUASA BATTERIES

Not all snowmobiles have an electric start, but if you are lucky enough to own a model that does, you know one thing: you want it to start when you push that button. And so does the manufacturer. That is why they choose Yuasa. Some of Yuasa's most heavy-duty batteries live under the hoods of some of the biggest and fastest snow machines in the country. Just ask Arctic Cat, Bombardier (Ski-Doo), Kawasaki, Polaris and Yamaha. Manufacturers demand the best and they overwhelmingly choose Yuasa. So should you.

YUMICRON

The Yuasa YuMicron gives you a powerful advantage. Its high technology separators allow two extra plates per cell to be installed, for a 30% improvement in cranking performance

The Power Advantage

This added power is an outstanding benefit for heavily accessorized machines or high compression engines. Its high cranking power is also a real bonus for easier starting.

YUMICRON CX

The YuMicron CX was the first small engine starting battery to use "lead calcium" technology. This special technology means the YuMicron CX generates more power, requires less maintenance, and lasts longer than any other conventional battery.

More Power
Because of its unique design, the CX will generate 5% to 8% more cold cranking amperage than our own high-output YuMicron lead-antimony battery. For high compression machines, this means greater reserve capacity and more starting power.

Less Maintenance
The YuMicron CX lead calcium technology also reduces water loss, so the CX requires servicing (water filling) only about one-eighth as often as ordinary lead-antimony types.

Longer Life
The YuMicron CX holds its specific gravity more than three times as long as lead-antimony type batteries resulting in a longer shelf life. This feature means longer periods between charges, especially during winter months.

~ IMPORTANT ~

Yuasa Yumicron/Yumicron CX Batteries are shipped dry with no acid. To order acid for your battery first check the acid volume needed on the Battery Specification Chart then order part # SO-ACID for every 21 oz. needed.

CONVENTIONAL

A workhorse battery engineered to protect against corrosion, withstand vibration and deliver high cranking power.

The industry standard for motorcycles and riding mowers, our Conventional Battery is anything but conventional. This workhorse is for applications requiring operation on uneven surfaces and vibrating environments - even when the weather's dealing its worst. It's the rugged, reliable and dependable battery that customers are looking for!

These features are built into our conventional manifold vented battery - and every battery in the YUASA line:

- Patented separators provide high cranking power
- Through-partition construction delivers maximum power
- Unique sealed posts resist corrosion for longer battery life
- Polypropylene cover and container thwart damage from gas, oil, and impact
- Heat-sealed, bonded unit fabrication protects against seepage and corrosion

POWER SONIC BATTERIES

Tough. Reliable. Whether you ride daily, seasonally, or just on weekends, you'll get more enjoyment out of your motorcycle, ATV, PWC or snowmobile with a Power Sonic battery. Our batteries perform reliably during off-road, over water and cold weather use, and keep their charge even after months of storage. Available in traditional flooded or the new sealed AGH designs, Power Sonic batteries are built to withstand punishing vibration, salt spray, gas and oil, and protect against equipment-damaging spills, corrosion and seepage. And because nothing ruins a weekend faster than a dead battery, we use advanced designs and manufacturing techniques to shorten current paths and reduce resistance, giving you higher cranking power and maximum battery life.

MAINTENANCE FREE HIGH PERFORMANCE

SEALED MAINTENANCE FREE

Once these batteries are put into service, they become a completely sealed unit requiring a lot less maintenance than Conventional Batteries. Although the battery still needs to be charged on a regular basis if your vehicle is not in use, there is no need to monitor the fluid level in this battery type. Unlike the Conventional Battery, once this type battery is sealed, it becomes spill proof, which can eliminate damage from battery acid that can occur from using a flooded battery.

FACTORY ACTIVATED MAINTENANCE FREE

The same convenience and technology as the Sealed Maintenance Free Batteries mentioned above, except this battery is sealed and activated at the time of manufacture. Very convenient to the point that all that needs to be done is put the battery into your vehicle and you are ready to ride. The only downside of this type of battery is that all batteries once activated have a shelf life, and if this battery is not going to be used right away, or be put in a vehicle that is not going to ridden on a regular basis, the battery will need to be kept charged on a battery maintainer.

CONVENTIONAL

This type of batteries has flooded electrolyte and is very accessible. These batteries have to be carefully and periodically maintained. The conventional batteries are normally less expensive than the other types mentioned, but with the cost savings come more maintenance. You will need to add distilled water from time to time to prevent the battery from sulfating. Water loss is a normal characteristic of this type of battery because of the high temperature inside, and the process of electrolysis and evaporation. This means the fluid level of the battery needs to be checked on a regular basis. Conventional batteries also tend to discharge more rapidly than AGM type batteries.

Battery Tender Lithium Battery FAQs:

What is the difference between Lithium Ion batteries and Lithium Ion Phosphate batteries?
Lithium-ion batteries are rechargeable batteries that use lithium as one of their active components. Lithium Ion Phosphate Batteries are a type of lithium-ion batteries known for their long life and inherent safety.

How does the "Lead Acid Equivalent" capacity rating compare to Flooded, AGM, and Gel cell battery ratings?
The capacity of lead acid batteries decreases markedly when discharged at high currents such as when starting a vehicle. This effect is much less for a lithium battery. In fact, when discharged at a current equal to its capacity, a 2 A-hour lithium ion phosphate battery will have as much capacity as a 9 A-hour lead acid battery.

Can I use a standard Lead Acid charger/maintainer for my Battery Tender® lithium battery?
As long as the battery charger does not have a desulfation mode and the peak voltage does not exceed 14.8V during the charge cycle it can be used to charge a Battery Tender® Lithium Battery. Of course the best way to charge and maintain a Battery Tender® Lithium Battery is to use a Battery Tender® Lithium Battery Charger.

What is the best way to store my battery long term?
A Battery Tender® Lithium Battery has virtually no self-discharge and has a shelf life of 2 years. The best way to store the battery is disconnected from the vehicle in a clean and dry location with the protective covers installed on the positive terminals.

How do I prevent water damage or corrosion to my battery?
A Battery Tender® Lithium Battery has a waterproof construction however the battery should be kept clean to minimize corrosion. A corrosion inhibitor can also be used on the terminal and connections.

How do Lithium batteries Cold Cranking Amps "CCA" rating compare to Lead Acid batteries?
When talking about lithium batteries used for engine starting the term CCA is used when making comparisons of the cranking ability to that of a lead acid battery in the same application. It is important to select a Battery Tender® Lithium Battery that has a CCA rating that is equal or greater than the lead acid battery it is replacing.

What happens if I hook up my battery charger to the wrong terminals?
If you happen to hook up your battery charger cables in reverse (positive cable to negative terminal and negative cable to positive terminal) then you will potentially damage the battery.

What happens if I hook up my battery to the wrong terminals on my vehicle?
If you incorrectly connect your battery to the wrong cables (positive cable to negative terminal and negative cable to positive terminal) then there is a chance for spark and damage to the battery

VRLA Valve Regulated Lead Acid.
‡‡‡ Includes 10mm spacer for use in replacing YB14A-A1 and YB14A-A2.
S Includes 20mm spacer for use in replacing YB16CL-B.
C Requires use of Yuasa Cover/Spacer Kit part no. 478651
‡ The YTX20 series batteries may be used as an optional upgrade, but some modification to the hold down may be necessary. See label for retrofit cautions.
‡‡ Top and front terminal mounts only.
(1) Eliminates need for sensor (needs to be disabled).

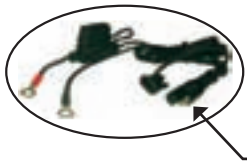
YUASA CHARGERS & CHARGING ACCESSORIES

YUASA MB-2040 BATTERY CHARGER

- High Output charging current (4 amps)
- High Voltage capable (20 volts) – designed to improve recovery of sulfated batteries
- Switchable Mode operation
- “Fast Mode” – for quick vehicle set-up
- “Normal Mode” – ideal for smaller batteries, initial activation, and deeply discharged batteries
- Commercial Grade – perfect for Dealer / Shop use
- Suitable for all battery types – Conventional, as well as MF (AGM), including YTZ
- Automatic Shut-Off
- Reverse Polarity Protection / Spark-free Operation (UL / CUL) approved)
- Durable construction for longer life
- 3 year limited warranty



PART #	DESCRIPTION

YUASA BATTERY CHARGER/MAINTAINER

- Fully automatic three level charge cycle for effective charging
- Reaches 14.4 volts peak, then automatically switches to float
- Designed to prevent overcharging
- AC power LED indicator
- Charging and float mode LED display
- Reverse polarity protection
- Spark-free operation
- Durable construction for longer life
- Battery accessory leads and fused ring connectors included
- 12 ft. output cord
- 3 year limited warranty

Yuasa's Automatic 1A 12V battery charger is the industry's most powerful plug-in wall charger. Combining the latest technology and a host of user-friendly features, this compact, high power unit provides optimum amperage return and is designed to fully charge and maintain conventional and sealed maintenance free batteries.

WATERPROOF 800 INTERNATIONAL

This compact 800 mA battery charger has all the charge characteristics of its cousin the Battery Tender® Junior. It incorporates highly efficient surface mount technology electronic components. The interior is completely encapsulated, protected from shock, vibration, and moisture by an electrically insulating, thermally conductive, flame retardant, synthetic epoxy resin compound. It's tough, affordable, and a strong, innovative battery charging solution. This charger is no larger than a standard computer mouse yet packs 800 millamps of pure constant current charging power. Coupled with a brain (IC chip), the charger will constantly monitor, charge, and then maintain your battery --- even while totally submersed under water! Perfect for all outdoor types of ATV's, watercraft, motorcycles, boats, or anywhere water is a threat. International universal input voltage works anywhere in the world 100-240 AC Volts 50/60 Hz.

- "Supersmart" Technology
- Spark Proof
- Short Circuit Protected
- Reverse Polarity Protected
- Waterproof
- Weighs only 1 Pound
- 3 Year Warranty

The NOCO Genius Multi-Purpose Battery Chargers are designed with versatility in mind. All of the chargers in the multi-purpose line are packed with features that are designed to diagnose, recover, charge and maintain a wide range of batteries, in a wide range of applications. The quick connect system allows users to move one charger between multiple applications with ease. Eyelet Terminal Connectors can be left installed on some vehicles, while utilizing the Battery Clamp Connectors or 12V Plug Connectors to charge and maintain other applications. Overall, the NOCO Genius multi-purpose battery chargers are perfect for users looking for flexibility and who want the ability to quickly switch between applications.

G750

.75A (750mA)
6V & 12V

WICKED SMALL, WICKED SMART!
The G750 is a smart, 5 Step, fully automatic switch-mode battery charger and maintainer. The G750 is best for small battery applications from 1.2-30Ah, such as charging your Motorcycle, ATV, Jet Ski or Snowmobile. In addition to charging, the G750 can effectively maintain any 6V or 12V batteries in larger applications, such as Cars, RVs, Boats and Trucks.

G1100

1.1A (1100mA)
6V & 12V

WICKED CAPABILITY, WICKED SMART!
The G1100 is a smart, 7 Step, fully automatic switch-mode battery charger and maintainer. The G1100 is best for small battery applications from 2.2-40Ah, such as charging your Motorcycle, ATV, Jet Ski or Snowmobile. In addition to charging, the G1100 can effectively maintain any 6V or 12V batteries in larger applications, such as Cars, RVs, Boats and Trucks.

G3500

3.5A (3500mA)
6V & 12V

WICKED VERSATILITY, WICKED SMART!
The G3500 is a smart, 8 Step, fully automatic switch-mode battery charger and maintainer. The G3500 restores batteries to their original capacity, recovers slightly sulfated batteries, charges batteries in cold climates, rescues drained batteries and provides maintenance charging to increase battery life. A versatile battery charger that provides charging modes for both large and small batteries from 1.2-120Ah, such as Cars, RVs, Boats and Trucks, as well as for Motorcycles, ATVs, Jet Skis or Snowmobiles.

PART #	MFG #		
650211	G3500	**74.95**	E

G7200

7.2A (7200mA)
12V & 24V

WICKED FEATURES, WICKED SMART!
The G7200 is a smart, 12 Step, fully automatic switch-mode battery charger and maintainer. The G7200 restores batteries to their original capacity, recovers slightly sulfated batteries, charges batteries in cold climates, rescues drained batteries, and provides maintenance charging to increase battery life. A powerful battery charger with specialized charging modes for recovering severely drained batteries that will not accept a normal charge. Suitable for most 12V and 24V battery capacities from 14-230Ah, such as Motorcycles, ATVs, UTVs, Snowmobiles, Jet Skis, Cars, RVs, Boats and Trucks.

Automatically Diagnoses, Recovers, Charges & Maintains Your Batteries!
NOW THAT'S SMART...WICKED SMART!

The G4 is a smart, 7 Step, fully automatic switch-mode battery charger and maintainer with 4 independent battery banks. The G4 allows different battery sizes, voltages (6V or 12V), and chemistries to be charged at the same time safely and efficiently. The G4 is best for charging multiple small battery applications from 2.2-40Ah, such as Motorcycles, ATVs, Jet Skis or Snowmobiles. In addition to charging, the G4 can effectively maintain any 6V or 12V batteries in larger applications, such as Cars, RVs, Boats and Trucks. With 4 independent battery banks, the G4 is the best way to keep all of your vehicles maintained at the same time.

Wicked Smart Features:

- **INTEGRATED AC CORD MANAGER** — Route the AC cord out of any side of the charger and store excess cord under the charger for convenience
- **CHARGE MULTIPLE BATTERIES** — Charge multiple batteries independently at the same time, including both 6V & 12V as well as multiple chemistries
- **ABNORMALITY PROTECTION** — Automatically shuts "off" if charger remains in Bulk charge mode for an extended period of time
- **6V/12V COMPATIBILITY** — Charges 6V & 12V batteries
- **FULLY INTERACTIVE** — Automatically adjusts itself to changing current needs
- **DESIGNED FOR SAFETY** — Reverse polarity, short circuit, open circuit, spark proof, overheat, overcurrent & overcharge
- **REMOVABLE CHARGE CABLES** — Add and remove charge cables for clean and professional installations
- **EXTENDABLE CONNECTORS** — Plug-n-play connectors for easy accessory changes
- **MULTIPLE BATTERY CHEMISTRY** — Safely charges Wet, Gel, MF & AGM batteries
- **RAPID CHARGING TECHNOLOGY** — Charges batteries 2X faster than traditional linear battery chargers
- **RECOVERY MODE** — Recovers deeply discharged & sulphated batteries with pulse charging
- **HF/HE SWITCH MODE DESIGN** — High-frequency, high-efficiency for a lightweight, compact charger
- **VARIABLE INPUT COMPENSATED** — 100% full charge even with varying A/C input voltages
- **AUTO-MEMORY** — Returns to last selected mode when restarted
- **COLD/AGM MODE** — Optimized charge mode for cold weather or AGM batteries

SOLAR BATTERY CHARGERS + MAINTAINERS

BATTERY LIFE+

BRING LIFE TO YOUR BATTERIES WITH THE POWER OF THE SUN

Solar panels are comprised of photovoltaic cells ("photo" meaning light, "voltaic" meaning electricity) that convert sunlight into power. The sun gives off enormous amounts of energy in the form of heat and light, which is captured by the cells. In turn, the power from the light essentially loosens electrons from the cells in order to create a flow of energy. This energy is then directed to either a storage unit (such as a battery) or through a regulator (such as our FLEX line) directly to a device. This allows you to generate energy wherever you go, as long as the sun is shining.

PART #		
650281	32.95	B

BATTERY LIFE+ SOLAR 5

5 Watt Solar Battery Charger

PART #		
650282	63.95	B

Keeps 12-volt lead-acid batteries fully charged and maintained through solar power and provides up to 180mA (for the 2.5 Watt) / 410mA (for the 5 Watt) charging current to counteract parasitic drain of most vehicles, such as cars, boats, trucks, motorcycles, ATVs, RVs, lawn mowers, and more. Safely charges wet cell, gel cell, AGM, enhanced flooded battery or any maintenance-free battery. Built-in safety protection for short-circuit, open-circuit, and over-current. Its ultra-low profile design makes it simple and easy to install, and completely weatherproof for outdoor use (rated at IP65). Integrated LED indicator illuminates when generating power. Thin film technology for performance in low-light, cloudy and overcast conditions.

BATTERY CHARGER ACCESSORIES

WICKED SMART OPTIONS
Genius accessories are designed to expand the versatility of the NOCO Genius multi-purpose battery chargers. The accessories offer different ways to connect to batteries, extend the reach of the chargers, add connections to multiple vehicles, replace existing connectors and more.

BATTERY CLAMP CONNECTOR
Fits G750-G7200

PART #		
650213	14.95	L

The GC001 Battery Clamp Connector works with NOCO Genius battery chargers and allows the battery chargers to connect quickly to any battery. Replace a lost connector or add a set to a convenient location for easy charging. The Quick Connect cable makes connecting the Battery Clamp Connector simple.

EYELET TERMINAL CONNECTOR
Fits G750-G7200

PART #		
650214	10.95	L

The GC002 Eyelet Terminal Connector works with NOCO Genius battery chargers and allows the battery chargers to connect quickly to any battery. Replace a lost connector or permanently mount one on your ATV, Motorcycle, Car, Boat or any other vehicle for easy charging. The Quick Connect cable makes connecting the Eyelet Terminal Connector simple.

12V PLUG CONNECTOR
Fits G750-G3500

PART #		
650215	15.95	L

The GC003 12V Plug Connector works with NOCO Genius battery chargers and allows the battery chargers to charge and maintain your vehicle's battery by simply plugging into the 12V auxiliary plug/cigarette lighter. The Quick Connect cable makes connecting the 12V Plug Connector simple. Ideal for motorcycles where the battery compartment is difficult to access.

10' EXTENSION CABLE
Fits G750-G7200

PART #		
65016	17.95	L

Extend the reach of your NOCO Genius battery charger and accessories with the GC004 10' Extension Cable. With Quick Connect connectors on both ends, connecting the 10' Extension Cable is simple. Using this accessory may increase the battery charger time.

12 VOLT CELL PHONE CHARGER

How many times have you been out on the trail and your phone dies because of searching for a signal or from the cold temperatures? PowerMadd has an inexpensive solution! Our 12 Volt Cell Phone Charger installs easily to any machine with a 12-volt battery. The charger has a replaceable 2-amp in-line fuse and a micro USB connector. The charger will work with all phones with a micro usb charging port (will work with iPhones but requires adapter - NOT INCLUDED).

- Requires 12 DC volts
- Micro USB connector
- 2-amp in-line fuse for system protection
- Installs easily
- Compatible with most Android, Windows phones and iPhones(requires adapter).

Note: This cell phone charger can only be powered by a 12 volt DC battery. If connected to an AC electrical system, damage to the cell phone may result.
iPhone4 users: A micro usb to 30 pin adapter is required.
iPhone5 users: A micro usb to lightning port adapter is required.

PIAA

POWERSPORTS

PIAA BULBS

GREATER PERFORMANCE: PIAA bulbs are engineered with XTRA Technology for greater performance per watt than any other bulb on the road. (XTRA is a term coined by PIAA to designate a high-efficiency bulb that is designed to produce greater light output than its rated power consumption, i.e. 55W = 85W of light output.) Greatly enhance your ability to see and be seen. A metal bond holds the heat-resistant glass tube securely to prevent cracks and leaks. A welded focus ring and one-piece filament support assures proper positioning.

BRILLIANT COLOR: Beam color affects visibility and eye strain over long periods. The brilliant white/blue light allows comfortable night driving over extended periods of time. PIAA bulbs are both a performance upgrade and an aesthetic enhancement. You will see the difference even in the daytime.

WARRANTY AND SUPPORT: PIAA is so confident in the durability and reliability of our products that we offer a no questions asked, replacement of any halogen bulb that fails within one year of purchase.

PIAA H4 EXTREME WHITE PLUS BULB

PIAA STANDARD HALOGEN BULB

Super Plasma GT-X

The Super Plasma GT-X bulbs offer an unmatched combination of fashion and performance with a bluish-purple color very similar to H.I.D. and the closest yet to sunlight.

Xtreme White / Xtreme White Plus

The Xtreme White Series of bulbs have a cool white light output that gives the driver better color recognition on depth perception and better contrast. The blue top coat adds a slight blue tint to a lamp with no loss of performance.

Intense White

The Intense White bulbs produce a radiant white beam andprovide the best possible balance between performance and bulb life.

Star White

Star White bulbs are significantly whiter and brighter than stock halogen and will increase bulb performance without taxing your vehicle's electrical system.

Ion Crystal / Plasma Ion Yellow

Ion Crystal coating transforms white light into amber light without diminishing the strength of the beam. Ion Crystal technology allows as much as 95% of the light produced by the bulb to pass through, compared to as little as 65% through dyed glass. The long wavelength Plasma Ion beam reduces refraction for dramatically increased visibility in snow, rain and fog.

HALOGEN HEADLAMP BULBS

ARCTIC CAT | POLARIS | SKI DOO | YAMAHA - SEE APPLICATION GUIDE ON OPPOSITE PAGE

ALL WEATHER
(AW) These bulbs are designed for rain, fog and snow and are just as bright as standard halogens. The all weather dichroic coating keeps the glare down from the elements.

ALL WEATHER BLUE
(AWB) Same advantages as the all weather, plus the blue coating is more noticeable to oncoming traffic. Note: The coating does decrease the light output slightly.

GOLD
(G) The biggest advantage is its ability to be seen by oncoming traffic.

XENON BOOSTED
(XPB) Best performing lamp on clear nights, the xenon gas increases the light output to compensate for the special vycor blue coating. These combinations bring the light as close to daylight as possible.

LED TAILLIGHT BULB

The two characteristics of this new lamp that are the most significant and immediately noticeable will be the rotating action of the LED when the taillight is in service, and the pulsating action of the LED when the brake light is in use.

(For DC Systems Only)

SKI DOO HIGH BEAM REPLACEMENT SWITCH

- Fits on most newer Ski Doo models
- A lot of riders will bump this with their knees or this will simply break off in the cold when a rider depresses it too hard. Instead of buying the entire switch assembly, just replace the part!

IMPORTED CDI BOXES

- High quality replacement CDI Boxes plug in and mount the same as original equipment
- Some case designs differ slightly, but will mount the same at the original point
- CUYUNA - JOHN DEERE - KOHLER - POLARIS - SKI DOO - YAMAHA
- NOTE: NOT FOR USE ON ULTRALIGHT AIRCRAFT

NOT FOR USE ON ULTRALIGHT AIRCRAFT
High quality, replacement CDI boxes plug-in and mount the same as original equipment. Some case designs may differ slightly, but all mount at the original location W/ the original hardware. (CDI boxes that replace originals W/ 4-bolt mounting include an adapter plate.)

WARRANTY DISCLAIMER
All CDI boxes are tested twice to insure quality. Before installing a new CDI box, check all ignition components and connections to be sure they are W/in tolerances. If some components are out of spec, they can cause premature CDI failure. However, no warranties are extended by the manufacturer and we will not be able to accept any returns of these units.

WATER TEMPERATURE SENSORS

Temperature sensors work with the machine's computer system to measure/monitor engine temperatures including the lube/oil and coolant in order to control radiators, cooling fans and thermostats. If the sensor fails, a warning light will usually show up on the machine's gauge and can cause overheating which can lead to serious issues if not replaced.

DEUCE SPEED GUARDS

One of the best selling hand guards on the market just got better. The Deuce Speed Guard hand guard system has been developed by professional riders to meet the rigors of competition and is designed to be lightweight, easy to mount and provide the maximum protection without restricting the levers and hands. The unique design is custom co-injected from a high-impact polyethylene composite - the rigid center spine is durable to withstand anything the trail or track can throw at you while the outer body is made of a softer, more resilient compound for flexibility. The large profile face offers broad protection for your hands, levers and handlebar controls.

Features and Benefits:
Over-sized design for optimal roost protection • Co-injected molding process • Protect your hands and levers from rocks, mud, ice chunks and roost • Easy to install • Handlebar-direct mounting • Requires NO drilling • Fully adjustable hardware to customize guard positioning • Made in the USA • Hardware sold separately.

STAR HANDGUARD SYSTEM

Handguards with standard removable air deflector.

SOLD PER PAIR.
MOUNTS SOLD SEPARATELY (SEE BELOW)

The strongest protection you can buy. The Star Series Handguard is designed to take a beating. The mounting brackets are tough aluminum, while the guard itself is made of two different types of plastic - a stiff spine for durability, and a softer colored body for flexibility. Designed to protect your hands from flying debris, rocks, bushes, branches, and mud, plus, keep your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through. In winter, remove the optional extensions for added wind protection. Designed with a universal mount system that works on ATVs, motorcycles and snowmobiles and requires only 1/2" of bar space.

SOLD SEPARATELY:
- MOUNTS
- OPTIONAL LARGE AIR DEFLECTORS
- OPTIONAL MIRRORS
- STAR SERIES HAND WRAP

The all new Tri-Mount Kit offers another area to mount the handguards - just below the bend on the rise of the bars. This is an ideal choice when space is limited near the controls, especially on utility quads and some snowmobiles. Easy to mount because there is no need to move controls to make space. Note - works only on 7/8" bars.

POWERMADD SENTINAL HANDGUARDS

PowerMadd is excited to introduce our latest handguard offering! The Sentinel Handguard is designed to be the most stylish, durable and functional handguard to date. The Sentinel guard is larger compared to the Star Series which in turn gives you more protection. The mounting brackets are 6061 aluminum, while the guard itself is made of two different types of plastic—a stiff two piece spine for durability, and a softer colored body for flexibility.

The Sentinel protects your hands from flying debris, rocks, bushes, branches, and mud. Plus it keeps your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through. The Sentinel Handguard will work with: Sentinel Armor, Gauntlet, Flare, Hand Wrap, Mirror and Large Mirror.

Note: Requires mount kit **224050**, **224051**, **224052** or **PM14269**

OPTIONAL ACCESSORIES

SENTINEL MIRROR KIT

Introducing the Sentinel Mirror Kit. The kit includes two mirrors and all hardware needed to make the mirror fixed or folding. The Mirrors consist of a polypro plastic base and a 2.75" mirror which gives you safety and piece of mind. The mirror has been designed specifically for the Sentinel Handguards and follows the lines and shape of the guard for a clean look and they can fold in when not in use or if you use a cover. Our Sentinel Mirrors attach directly to your Sentinel Handguards with a few simple steps. The mirror kit will work with the Armor, Hand Wrap, Flare and Gauntlet. Note: Armor and Hand Wrap work with fixed mount only.

HANDGUARD FLARE

The Flare was developed to attach over existing handguards and provides more than triple the amount of protection from roost, rocks, mud, and snow. By sweeping the Flare back towards the racer the amount of wind protection is significantly increased making them must-have for cold weather riding. The unique mounting system allows it to work with most handguards including the PowerMadd Star Series, TrailStar and even original equipment guards. The ability to quickly install the Flare as conditions warrant makes this an accessory riders will definitely want to have on-hand.

POWERRISER 325

- The PowerRiser 325 is 3.25" wide and 2" tall and fits on most snowmobiles with no cable modification needed. For ATV installation please check the amount of slack in your cables before purchasing. This updated version has been modified to work with all original equipment bar clamps – even the one piece style bottom clamps.
- If you are looking for more than a 2" riser check out the Pivot Adapter kit or Universal Pivot Riser. For ATVs with wider bar clamps, check out the PowerRiser 425.

7 INCH PIVOT RISERS

- Our pivot style riser family now includes a 7" block which allows riders to raise their bars to the exact height they prefer.
- Pivot riser blocks are designed to be used on stock "T" style steering posts or on flat top steering posts with the PowerMadd Pivot Adapter. If your sled has a "T" post you can easily raise your bars by replacing the stock pivot riser with a taller or shorter PowerMadd Pivot Riser. The pivot riser is tapped so that is works with your stock handlebar clamps and existing bolts, or the clamps and bolts provided with the matching PowerMadd Pivot Adapter.

- Machined from 6061-T6 aluminum for maximum strength
- PowerMadd's Pivot Style Risers directly replace OEM Pivot Style Risers that come on newer Arctic Cat, Polaris and Ski Doo snowmobiles with pivot style steering stem
- Some snowmobiles may need PowerMadd's Throttle Extension Kit when using riser blocks
- Allows the handlebars and rider to move forward, optimizing the center of gravity and improving the handling and control (like the Ski-Doo MZX-REV chassis concept)
- Snowmobiles not currently equipped with Pivot Style Riser Blocks need to use a Pivot Adapter Kit (below)
- Utilizes existing OEM bolts and clamps

UNIVERSAL PIVOTING RISER SYSTEM

This innovative riser system works on all brands of snowmobiles with a flat steering post! The Universal Pivoting Riser raises your bars 3" and can be used without additional riser blocks. Dual pivot points allow for bars to be positioned front to back and rotated up or down. Use additional riser blocks to increase bar height an additional 1", 2" or 3".

UNIVERSAL BAR RISERS

Need a little bump in bar height? We've got just what you need. Our Universal Bar Riser raises 7/8" bars either 1" (25mm) or 1.6" (40mm). The unique design of these risers allows them to work on virtually any ATV, motorcycle - offroad and street - or snowmobile with 7/8" bars. Risers come with both metric and standard longer mounting bolts. Note - check your cable slack before purchase to determine how high you can raise your bars.

Vibration Dampening Core

- Spider SLT grips are designed with a Vibration Damping Core. This Acoustical Rebound Layer is engineered with a specially shaped core with an innovative boundary layer. This gives you a grip with less vibration at the hand which reduces hand fatigue and arm pump, and also lets you listen to feedback from the machine and tailor your response accordingly.

Traction Gel

- Spider SLT grips feature Traction Gel – a specially formulated compound that sheds mud and water so that it stays tacky even when wet making it easier to hold on. This gives better control and less rider fatigue. Just like a competition tire, Traction Gel breaks in and continues to offer top performance throughout the life of the grip.
- Traction Gel allows flexible placement of wires – put them where you want them.

SPIDER SLIM LINE SLT • ATV, PWC, SNOWMOBILE • 7/8”

The Spider SLT Grip provides dual layer technology with a vibration damping inner core for riders using Thumb Throttles. The SLT's outer gel layer provides a super tacky surface that is easy to hang on to, a small flange that protects your hand, and a closed end to keep out water, snow and mud.

- Firm first layer uses new acoustical rebound core to reflect vibration and improve durability
- Softer outer layer shed mud and water, increase gripping power, reduces vibration for more comfort and less fatigue
- End caps reinforced to improve durability Slim Line SLT specially made for ATV, watercraft, and snowmobile
- These grips have a small flange with a closed end, and are available in 9 colors!
- Four integrated safety wire grooves

788 TRIPLE DENSITY EXTRA SLIM 7/8" - 1"

In all triple density models, the hard density inner tube and the medium density grip ends flanges help toward maximum grip efficency.

- Firm on the inside, gel density toward the palm of your hand and medium density on the ends
- Riders are always looking for soft grips that don't slip on the bar
- Stronger inner sleeve helps minimize grip movement, while providing both a soft gel material and a harder material where needed.

- Cable adapter and fasteners constructed of the highest quality stainless steel
- Gold anodized aluminum throttle lever can be operated with one finger for safer sidehilling
- Safety features includes rubber accordion boot (keeps snow out of cable housing) and safety pin (locks left throttle from use while trail riding, etc.)
- Throttle fits over grip on most models, does not interfere with handwarmers
- Kit includes all hardware, allen wrenches, and instructions for installation in approximately 20 minutes

SNOWMOBILE BRAKE LINES

Streamline brake lines are manufactured using high quality Teflon lined stainless steel braided hose which have a UV protected PVC covering which will not fade or change colors. All brake lines come with triple chrome corrosion tested fittings for ultimate corrosion resistance. Out brake the competition with 80-90% less expansion than rubber brake lines.

FUEL & INTAKE

MOTOTASSINARI VFORCE3

For the VForce 3, Moto Tassinari has continued to build upon their industry leading design that doubles the reed tip surface of a standard reed valve. The advantages of doubling the reed tip surface are numerous. On a VForce, with its less restrictive design, the reed petals only travel half the distance of a standard valve resulting in greater air flow through the entire RPM range and increasing reed petal life. Throttle response and horsepower is greatly increased with the addition of a VForce, however, fuel economy is typically also greater, due to the efficiency of a VForce reed valve system. Exclusive to the VForce 3 is our patent pending snap together cage design that utilizes symmetrical reed petals, eliminating the need for different tip shape that accelerates the air mixture over the reed tips, ensuring increased airflow for increased horsepower. The new design completely eliminates the need for screws, so when you do need to finally replace your worn reeds the job is literally a SNAP. Whether you're looking for more horsepower, additional RPMs, higher efficiency, longer reed petal life or an ultra light replacement for your heavy conventional stock cages, look no further than the VForce 3, by Moto Tassinari.

THE BOYESEN POWER X WING ADVANTAGE

- INCREASES horsepower and torque in 2-stroke and 4-stroke engines.
- AERODYNAMIC design maximizes velocity generation and power gain.
- WING CHANNEL minimizes disturbance at needle jet without affecting jetting curve.
- PRECISION fit doesn't reduce size of carburetor bore so there is no loss of power.

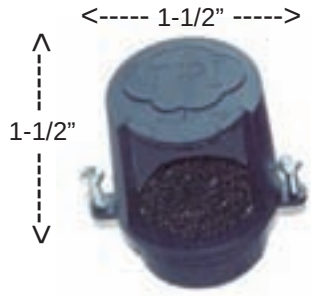
TPI VALVES

THUNDER PRODUCTS

TOTAL PERFORMANCE INTAKE (TPI Valve)



Adjustable, filtered airbox opening all the time! • ATVs, Dirt Bikes and Snowmobiles • Change of altitude and temperature can be compensated for in the middle of your ride • Open to the leanest position or close completely to the richest position or somewhere in between.

2 STROKE = 1 valve per 200 cc, provides tuning of up to 3 jet sizes

4 STROKE = 1 valve per 300 cc, provides tuning of up to 3 jet sizes

These valves are easily installed using 2 small screws, and the foam filter can be taken out for cleaning. A fine filter for ATV and dirt conditions and a coarse filter for snowmobiling applications are available.

THE EQUALIZER

Low Speed Circuit Tuning: The Equalizer Bottle will convert poor burning "puddled" fuel into efficient atomized fuel. This will increase low end Torque and fuel economy.

REED SPACER KIT

- Increased performance and quicker throttle response
- CNC machined aluminum spacers increase the torque curve in the lower part of the RPM range
- Up to 3HP increase on some engines from low to upper mid-range (big twins respond well to spacers)
- Clean up low speed burble on engines with restricted intake tracts
- Reduction on carb to airbox clearance eliminates air leaks around air boots

AIR FILTER CLEANER AND DEGREASER

K&N Air Filter Cleaner is the only cleaner formulated to clean K&N Filtercharger elements. K&N Cleaner works to dissolve the dirt build up and old filter oil, and can be washed away with water. It is biodegradable and safe on paint, chrome, cast aluminum, plastic, rubber and vinyl when used as directed. 12 per case. NOTE: Do not use on polished or anodized aluminum

FILTER CHARGER OIL

K&N Air Filter Oil is the only oil specially formulated to work in combination with the cotton fabric in K&N Filtercharger elements providing a superior air filtration system. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric. Saturation is maintained until the element is cleaned with K&N Air Filter Cleaner.

UNI FILTERS

UNI SNOW POD URETHANE END WITH COLLAR

UNI "Pod" foam air filters with durable urethane mounting bases are long lasting and extremely efficient. By removing the air box, adding these universal direct bolt-ons, and some re-jetting you will find increased horsepower throughout the power band. The sno Pods are designed specifically for snowmobiles. The foam itself is very porous compared to a conventional dirt style filter, so they suck in much more air, much more efficiently.

POWDER SNOW PRE-FILTER For Arctic Cat Mountain Cat and ZR models with air intake grate above footwell

Eliminate the stock air intake grate from plugging with the SLP powder snow pre-filter kit. This unique material repels powder snow and water while passing air right through. A must for anyone riding in powder snow conditions.

HIGH FLOW™ INTAKE KIT For Crossfire 8 / M8 / HCR, 800/1000 Crossfire R / CFR Crossfire 1000 / M1000

The stock M and Crossfire 800/1000 intake is quite restrictive, primarily in the nose of the hood where the air intake tapers down and connects to the bellows. We have eliminated this restriction by increasing the volume of the air intake in this area. This intake kit further maximizes consistency by utilizing two additional vents that are positioned low and forward. These vents draw in cold dense air, even when the upper outside stock intake vents get partially plugged in deep powder snow. It increases midrange power for better throttle response and delivers an additional 2 horsepower peak.

HIGH FLOW™ INTAKE KIT For 2012-15 Arctic Cat 800 Twin

Eliminate the restriction in the stock intake with the addition of this new SLP High Flow™ intake kit. This kit reduces the vacuum placed on the airbox by 50% through strategically adding two Powder Valves™ with pre-filters. The way they work is as soon as the engine intake needs more air than the stock system can provide, the Powder Valves™ open, delivering the required amount of air to the engine. As an added benefit the intake air temperature sensor is relocated closer to the throttle bodies, providing more accurate temperature reading to the ECU. This results in increased throttle response, more top-end power and better consistency. Sold in kit form.

POWDER SNOW PRE-FILTER

For Polaris for IQ Chassis Intake

This Powder Snow Pre-filter Kit for Polaris IQ Chassis increases intake surface area for increased performance. It also eliminates the stock foam filters that are prone to falling out and getting lost. The pre-filter securely fastens to the hood to provide a more positive seal for improved cold air intake with less chance of snow ingestion through the intake vents. This kit features an attractive brushed aluminum grate which utilizes a special pre-filter material that repels snow and water, yet maintains high airflow.

PRE-FILTER
For Ski Doo REV

The stock air intake of the REV is known for plugging when running in powder snow conditions. Eliminate this plugging problem with the SLP powder snow pre-filter. This unique material repels powder snow and water while passing air right through. A must for anyone riding in powder snow conditions.

SP14198	**32.95**	A

HIGH FLOW™ INTAKE
For Ski Doo REV except RT chassis models

The REV's stock air intake is restrictive and because of its placement, it is prone to plugging with powder snow and ice. This results in a significant loss in horsepower, which makes the sled very inconsistent when running in deep snow conditions. This High Flow™ Intake Kit corrects these problems by providing more than double the intake surface area for added airflow to the engine. Its placement, as well as its design, which utilizes a powder snow pre-filter that repels snow and water, reduces the tendency of powder snow and ice plugging by shedding the snow rather than allowing it to build up.

This High Flow™ Intake Kit for the Ski-Doo XP increases the air intake surface area by 33% to reduce the chance of the intake plugging in powder snow conditions. It is located higher than the stock intake and within reach of the rider so that any snow that collects on it can be easily wiped away. This kit consists of a molded plastic adapter that seals between the stock air box and the hood along with an intake grate that utilizes our pre-filter material that repels snow and water while passing air right through. This kit is a must for anyone riding powder snow conditions.

HIGH FLOW™ INTAKE
For Ski Doo 800 E-TEC XM/XS Chassis

This High Flow™ Intake kit for the XM/XS Ski-Doo models adds additional intake surface area to provide more available cold air to the engine for more horsepower and running consistency. It utilizes our famous Powder Valve™ system that is vacuum operated and only opens when the demand of theengine places a vacuum on the air box. It combines these with a filter placed in the side of the cowling just in front of the fuel tank and above the tunnel. The kit fully seals the surrounding area to insure that only cold air is being induced into the system. It is especially beneficial when running in deep snow condi- tions where the stock filters are being plugged. It is also highly recommended to compliment other horsepower adding parts.

HOT AIR OUTLET VENTS
For Arctic Cat 2012-16, F, XF, M, 2014-16 ZR

These vents provide hot air escape from the chassis for cooler underhood temperatures which helps to maintain higher horsepower. The left side vent helps to keep the clutches running cool, which considerably reduces the chance for performance loss due to heat saturation and improves belt life. The right side helps reduce underhood heat given off by the exhaust system for a more consistent running engine. Vents utilize a powder snow pre-filter that repels snow and water, yet allows air to pass right through it. Sold as a kit, includes one right and one left side vent.

236385	**59.95**	B

These kits feature SLP's all new Max Flow™ air vent technology. This new technology utilizes injection molding to encapsulate either our Flow-Rite™ material or our new highly durable stainless steel mesh depending on the application to provide the maximum air flow through the chassis while keeping snow out. This injection molding process allows us to produce vents that more readily shed the snow, are more durable. These vents are unmatched in quality and appearance.

HOT AIR ELIMINATION™ KIT For 2012-15 Polaris 600 RMK/Switchback Assault, 2011-15 800 RMK, Switchback RMK, Assault RMK, Switchback Assault

These new vent kits provide strategically placed inlet and outlet vents to evacuate the hot air that's trapped inside your engine compartment. Sold either per side or per pair in kit form.

These kits feature SLP's all new Max Flow™ air vent technology. This new technology utilizes injection molding to encapsulate either our Flow-Rite™ material or our new highly durable stainless steel mesh depending on the application to provide the maximum air flow through the chassis while keeping snow out. This injection molding process allows us to produce vents that more readily shed the snow, are more durable. These vents are unmatched in quality and appearance.

All exhaust (right) side vents utilize stainless steel mesh (except optional middle side vent).

Middle Side Panel Vent does not utilize Max Flow™ Technology

POLARIS FOOTWALL VENTS

For Polaris 2007-11 RMK RAW Chassis

This Footwell Vent Kit helps to effectively remove hot underhood heat from the chassis. These vents considerably reduce the chance of performance loss due to heat saturation for a more consistent running engine. They are installed just above the footwells and are sold as a set, one right and one left hand vent.

SP32552	**69.95**	A

HOT AIR ELIMINATION KIT

For Ski Doo REV except RT Chassis Models

The REV is in desperate need of additional chassis ventilation to eliminate unwanted underhood heat build up. This kit effectively forces cold air into the chassis via two FLow-Rite™ Intake Kits located in the rear of the shock tower. It then evacuates the hot air out of the chassis via an attractive brushed aluminum outlet grate. The outlet grate utilizes a powder snow pre-filter to eliminate powder snow build up or ingestion. Hot Air Elimination Kit includes, Air Outlet Grate and (2) Flow-Rite™ intake kits.

Hot Air Elimination Kit	**SP14120**	**75.95**	B
Air Outlet Grate Only	**SP14121**	**42.95**	B

HOT AIR ELIMINATION KIT For Ski-Doo XP

SLP Hot Air Elimination Kits help reduce stagnant underhood hot air to maintain higher horsepower by delivering additional cold air intake and hot air escape from the chassis. This kit includes one shock tower air inlet vent, an upper side panel air vent, and one outlet vent. Each vent utilizes a powder snow pre-filter that repels snow and water, yet allows air to pass right through.

Left (Clutch) Side	**SP32555**	**89.95**	A
Right (Exhaust) Side	**SP32556**	**109.95**	A

HOT AIR ELIMINATION KIT
For Ski-Doo XS & XM

Get rid of the hot air that's trapped inside your engine compartment with this new Hot Air Elimination™ Kit. This kit increases the air inlet as well as the outlet areas to efficiently provide the necessary air flow through the chassis. Sold per side in kit form, each vent can be purchased separately if desired.

Right Side Kit (includes 2 vents, shock tower inlet vent and side panel rear outlet vent)	**236161**	**57.95**	B

All exhaust (right) side vents utilize stainless steel mesh.

These kits feature SLP's all new Max Flow™ air vent technology. This new technology utilizes injection molding to encapsulate either our Flow-Rite™ material or our new highly durable stainless steel mesh depending on the application to provide the maximum air flow through the chassis while keeping snow out. This injection molding process allows us to produce vents that more readily shed the snow, are more durable. These vents are unmatched in quality and appearance.

HOT AIR OUTLET VENTS
For 2014-15 Yamaha Viper RTX, LXT, XTX, STS, MXT

These vents provide hot air escape from the chassis for cooler underhood temperatures which helps to maintain higher horsepower. The eft side vent helps to keep the clutches running cool, which considerably reduces the chance for performance loss due to heat saturation and improves belt life. The right side helps reduce underhood heat given off by the exhaust system for a more consistent running engine. Vents utilize a powder snow pre-filter that repels snow and water, yet allows air to pass right through it. Sold as a kit, includes one right and one left side vent.

A BETTER FUEL FILTER FOR ALL GAS-POWERED ENGINES

What is Visu-filter®?

A highly reliable fuel filter system so unique that Visu-filter® signals the need for replacement in motorcycles, lawn tractors, snowmobiles, jet skis, roto tillers, air compressors, and more! The strong, high-impact nylon housing is extremely transparent for immediate viewing. Many styles and sizes available. Wide selections of filter media such as polymer-treated paper with automotive specifications, stainless steel screens and polyester screens.

- Protects engine from harmful contaminants
- No leak, high impact nylon construction
- Functions as a reservoir for trapping water
- Cleaner burning engine, less emission and less smoke
- Better throttle response; improvement in engine performance
- Some increase in power and fuel efficiency

The TMX features a flat slide design in a smooth bore Venturi to provide improved throttle response and wider powerband. The float system with independently moving floats, working with a main jet enclosed in a baffle chamber, allows the TMX to perform smoothly without hesitation on the roughest terrain. TMX Series Carburetors are available in 35mm bore sizes for 125cc race engines, and in 38mm bore sizes for use in 250cc race engines.

Mikuni TMX Series Carburetors are intended for off-road riding and racing use only. Not legal for sale or use in California or other locations where similar pollution laws may apply.

POWER JET KIT

Power Jet Kits are used in two-stroke engine applications to improve midrange throttle response and add additional fuel to wide open throttle running conditions, especially with snowmobile clutches. Kits may be installed easily on Mikuni TM and VM Series carburetors.

The Jet Needle controls the fuel mixture in the mid-range 1/4-3/4 throttle position. The taper of the needle determines the amount of the fuel. For example: the thinner the diameter of the needle, the more fuel will be drawn. The thicker the diameter of the needle, the less fuel can be drawn.

THROTTLE VALVES

To determine a left hand or right hand throttle valve you must look at it from the intake side (cutaway facing you) to see what side your idle adjustment is on. If it is on the left side, it is a LH throttle valve and if it is on the right side it is a RH throttle valve.

* All machines to be converted must have an external crankcase impulse line to operate the Mikuni Fuel Pump. This is a universal kit containing all of the major components necessary to convert to Mikuni Carburetion. Because of the variety of machines that used the Tillotson and Mikuni carburetors, this is not a bolt on direct replacement kit. Jetting, fuel pump installation, cable installation to controls, fuel and impulse line installation are all part of the dealer's custom installation.

SLP LOGICAL HIGH COMPRESSION DRIVE CLUTCH SPRINGS

FOR ARCTIC CAT AND POLARIS

SLP's line of drive springs allows you to choose a spring that not only gives you the engagement that you desire, but also delivers proper peak RPM. For higher engagement, increase the 2.50" compression rate. For lower engagement, decrease it. For higher peak RPM, increase the 1.25" compression rate. For lower peak RPM, decrease it.Manufactured using only the Highest Quality Chrome-Silicone wire that has been shot peened to make a very durable spring that is resistant to sag and breakage.
